

# CONDENCIAT CL2

## Range :

New range CL2 with propeller fans (EC motor)  
Five models available

## Range of use :

Cooling capacity: 7 to 19 kW

## Use :

Air-cooled condensing unit for cooling of small businesses or industrial processes. May be connected from a distance to a direct-expansion heat exchanger (air-handling unit coil or air conditioner, or multi-tube or brazed-plate water-cooling evaporator).

## Description :

- Complete packaged unit housed in a corrosion-resistant recyclable plastic casing
- Scroll compressor with low sound level
- 1 to 2 propeller fans with speed variator (EC motor)
- All-season operation (-15 to +45°C) with condensation pressure controlled by electronic board and pressure sensor. Variable rotation speed of fans
- HP and LP safety pressure switch
- Shut off and control valves
- R-410A refrigerant
