

EREBA 17 - 21

Range :

Three-phase reversible heat pump
2 models available, sizes 17 and 21

Range of use :

Heating capacity : 17 to 21 kW
Cooling capacity : 16 to 20 kW

Use :

EREBA is a range of Air/Water packaged reversible heat pumps designed for new or existing installations:

- New or renovated single family homes as back up operation
- Small business premises.

With a maximum heating temperature of 60°C (57°C for size 21), these heat pumps can be connected to all types of emitter: radiators, fan coil units or underfloor heating systems.

EREBA range is designed to be installed outdoors

Description :

- R410A refrigerant
- Complete integrated hydraulic module: variable speed accelerator pump, 8L expansion tank, screen filter, safety valve
- Installation in series up to 4 units
- INVERTER Twin Rotary DC compressor
- Superior frost protection with integrated electric heat trace cable
- WUI remote control terminal supplied as standard
- Communication with CMS using Modbus protocol or control via potential-free (dry) contacts
- Eurovent certification
