

Controls

V30

Range :

3 models:

- Wall-mounted with potentiometer, to be connected by installer
- Wall-mounted with potentiometer, Hotel version, to be connected by installer
- Built-in factory fitted in terminal units

Use :

The V30 control system is a specific CIAT control system with an innovative design, developed thanks to our expertise and dedicated to fan coil units.

The V30 control system is a CIAT electronic control system devised to control a non-independent air conditioning terminal unit (UTA and cassette-type fan coil units...) for applications using 2 pipes, 2 pipes/2 wires, 4 pipes with recycled air.

Description :

- Electronic On/Off control
- Potentiometer for setting the desired temperature (hotel version)
- A single electronic terminal that meets all individual control needs.
- The accuracy of electronic control programmable by switches.
- Window contact for energy savings.
- 3 fan speed
