

# Controls

## V300

### Range :

- Wall-mounted version with display
- Flush-mounted version or Major Line CV and NCV
- Radiofrequency terminal with repeater
- Zone timer

### Use :

V300 is a CIAT networked electronic control, designed to control comfort units which are not self-contained (ductable, cassettes, AHU, etc.).

### Description :

- Master/slave function for managing several comfort units with the same volume (Hall, Reception, Open Space, etc.)
- 4 operating speeds: Comfort / Economy / Frost Protection and Off, compliant with article 23 of Thermal Regulation RT2012 for rooms with intermittent occupancy rates.
- Eubac certification with optimum control accuracy coefficients for integration in RT calculation engines
- AA energy efficiency labelling as per Eubac certification
- A zone timer to manage comfort units in 6 independent zones
- Optimised management of HEE motors with a 0-10V signal
- The Epure One function, with CIAT patented/particulate sensor
- It integrates into the Hysys offer and into the Comfort pack
