PRODUCTS

**PACKAGED. WATER COOLED UNITS
IXH/RXH RANGE (HORIZONTAL).
IXV/RXV RANGE (VERTICAL)
PRODUCT PHASE OUT.
IXH/RXH (models 25-40); IXV/RXV**

What's new?

The horizontal compactly-constructed water/air units (range RXH / IXH), models from 25 to 40 are not anymore available for commercialization. **Models from 50 to 120 remains available (12kW – 41kW).**

The vertical compactly-constructed water/air units (range RXV / IXV) is also phase out.

Both are old ranges designed with R407C refrigerant

INTRODUCTION

HORIZONTAL WATER AIR UNITS RXH/IXH (R407C)

Models from 25 to 40 (6 to 10 kW) in the horizontal compactly-constructed water/air units (RXH / IXH units) are not anymore available for commercialization. **Models from 50 to 120 remains available (12kW – 41kW).**

The compressors used for those models (25 to 40) have been phased out, and there are not compressors in stock, so it is not possible anymore to book an order.

VERTICAL WATER AIR UNITS RXV / IXV (R407C)

Range RXV / IXV is completely phase out.

Models from 30 & 40 (8-11kW) are not anymore available due to the phase out of compressors. And rest of models (50-65-80) will be also removed from portfolio (last order accepted by: 01/03/2019).
