 T & Th: 9-3
 F: 1-5
 S: 9-1

Dr. Randy M, W & F: 9-1
 T & Th: 3-8

Dr. Gerry M, W & F: 1-8
 S: 9-1

Why I am a Doctor of Chiropractic

Because I honor the inborn potential of everyone to be truly healthy.

Because I desire to help the newborn, the aged, and those without hope.

Because I choose to care for the person with the disease, NOT the disease.

Because I wish to assist rather than intrude; to free rather than control.

Because I seek to correct the cause, not its effect.

Because I know doctors do NOT heal, only the body can heal itself.

Because I have been called to serve others.

Because I want to make a difference.

Because everyday I get to witness miracles.

Because I know it is right.

Misalignment of
spinal bone
(Vertebral
Subluxation)

Distortion in
nerve system
function

Distortion in
body function
(Examples: lack
of concentration,
decrease in
performance)

Decrease in
quality of life

NOITAXULBUS

Many of you are probably wondering what's with the "noitaxulbus." Is it something to do with tax season? Is it something that opposes busing? Well, if you haven't figured it out yet, let us give you a clue. It's related to chiropractic (come on, you should have figured that at least!!)

And what's the million-dollar word in chiropractic? YES... SUBLUXATION!!! So, the question is what does noitaxulbus have to do with subluxation? (Although by now you must be catching on!) That's right, it's subluxation backwards. The Strauss Chiropractic Center wants you to know subluxation forwards and backwards.

Subluxation, vertebral subluxation to be specific, refers to the slight misalignments of the bones of the spine that occur and distort the proper function of the nerve system and, consequently, the proper function of the body as a whole. Because virtually every cell, tissue, and organ in your body is connected to your brain by the nerve system, optimal function of the body is directly dependent upon optimal function of your nerve system.

Fortunately (or unfortunately), research has shown that pressure as light as the weight of a dime can reduce nerve function from 100% down to only 60%. This pressure is the same as that which occurs in the presence of a vertebral subluxation.

What's more, optimal body function is directly related to many aspects of life including mental sharpness, physical performance, and emotional stability, all of which obviously determine the overall quality of your life.

This means that vertebral subluxation can directly affect the overall quality of your life!!!

And since many of the things you do EVERYDAY could cause vertebral subluxation, it makes sense to have your spine checked for vertebral subluxation on a weekly basis to ensure the highest quality of life for yourself, your family, and your friends and loved ones.

NOITAXULBUS... subluxation...now you know it forwards and backwards.
