Thank you to those of you who have gone online and reviewed the Strauss Chiropractic Center. We really appreciate your time and effort and have had several new people join the practice because of your kind words. If you would like to post your own review and don't know how, simply ask at the office and we will walk you through it!
Thanks again!

Strauss Chiropractic Center's Top 7 Best Kept Secrets

1. **We really don't care who you see.** That means you needn't worry about hurting anyone's feelings here. What's important to us is that you're having your spine checked, NOT who's checking it. See the calendar or the website (or call the office) if you need specific hours.
2. **You can't judge the wait time by the number of cars in the parking lot.** Sometimes as many as four cars belong to employees. And if two chiropractors are working, the line moves very quickly. Just come on in!
3. **The popping sound doesn't mean "it went in."** People often think that the sound indicates an adjustment was made. NOT TRUE!! You can "pop" all your joints, it doesn't mean you're moving anything. It's just gas escaping from the joint capsule. The truth is you can make noise and not be adjusted, and you cannot make noise and get a great adjustment. They don't make noise when they go out, do they?
4. **Your payment is NOT a donation.** We are not a charity. We provide a service (an excellent one at that) and we expect that you will pay us something. We just don't want money to be a reason that you are not getting care, so we allow you to determine your own fee (and have for almost 60 years!)
5. **Chiropractic is NOT about your back; it's about your life.** Too many people use chiropractic as an aspirin for back pain. The only reason we check your back is because that's where your spine and your all-important nerve system is. Chiropractic improves your nerve system and consequently your WHOLE body and your WHOLE life.
6. **EVERYONE needs REGULAR chiropractic care.** We are all beating our spines up every day. From your first day until your last, physical, chemical and emotional stresses are constantly bombarding your body and your spine. You and your whole family should be having your spines checked regularly.
7. **There's MAGIC in a healthy spine!** Your nerve system controls your whole body and your whole life. The healthier your nerve system is the healthier and happier your whole life will be.
