Dr. Sal: M: 1-8
Th: 9-3

PARKING LOT PAVING **(Round 2!)**

**It's long overdue—
and it truly needs to be done.**

**That said, it *does* mean we'll
have to **CLOSE** for a couple of
days.**

As you may have noticed (or seen in the photos), our parking lot is in serious need of repair. After gathering more than a dozen estimates last year and giving the project careful consideration, we're finally moving forward with repaving the entire lot.

The work is currently scheduled for **Thursday, September 24th, and **Friday, September 25th**, *weather permitting*. Because of this, the office will be **CLOSED** both days. If the schedule needs to change for any reason, please keep an eye out—we'll send updates by email and post on Facebook as needed.**

If you have any questions or concerns, feel free to call the office at 215.946.6815.

Happy Birthday Chiropractic!!!

September 18th marks the day the first chiropractic adjustment was given in 1895. Despite 130 years of existence, tons of positive patient reviews, and scientific evidence, chiropractic still suffers from many misconceptions, myths, and outright misrepresentations.

Here are some fun facts about
Chiropractic Care:

- The word “chiropractic” literally means “done by hand.”
- Over 35 million people visit a chiropractor every year.
- The cracking noise during an adjustment is called *cavitation*. It's simply gas being released from the fluid inside the joint.
- Chiropractors complete over 4,200 hours of classroom, lab and clinical training.
- Chiropractic care isn't just for adults. Infants and children regularly receive care as well.
- Athletes rely on chiropractic care for performance and recovery.
