This Little Brown Sign Could Save Your Life!

Oneida County Snowmobile Clubs have placed brown, 3 digit number signs throughout the County at key intersections. In the event of an emergency, the 911 operator will ask you for this number. Their emergency response system can identify these numbers and give important location information to rescue personnel.

PAY ATTENTION TO THESE INTERSECTION NUMBER SIGNS.
They can save lives!

Emergency Care for the Snowmobile Accident Victim(s)

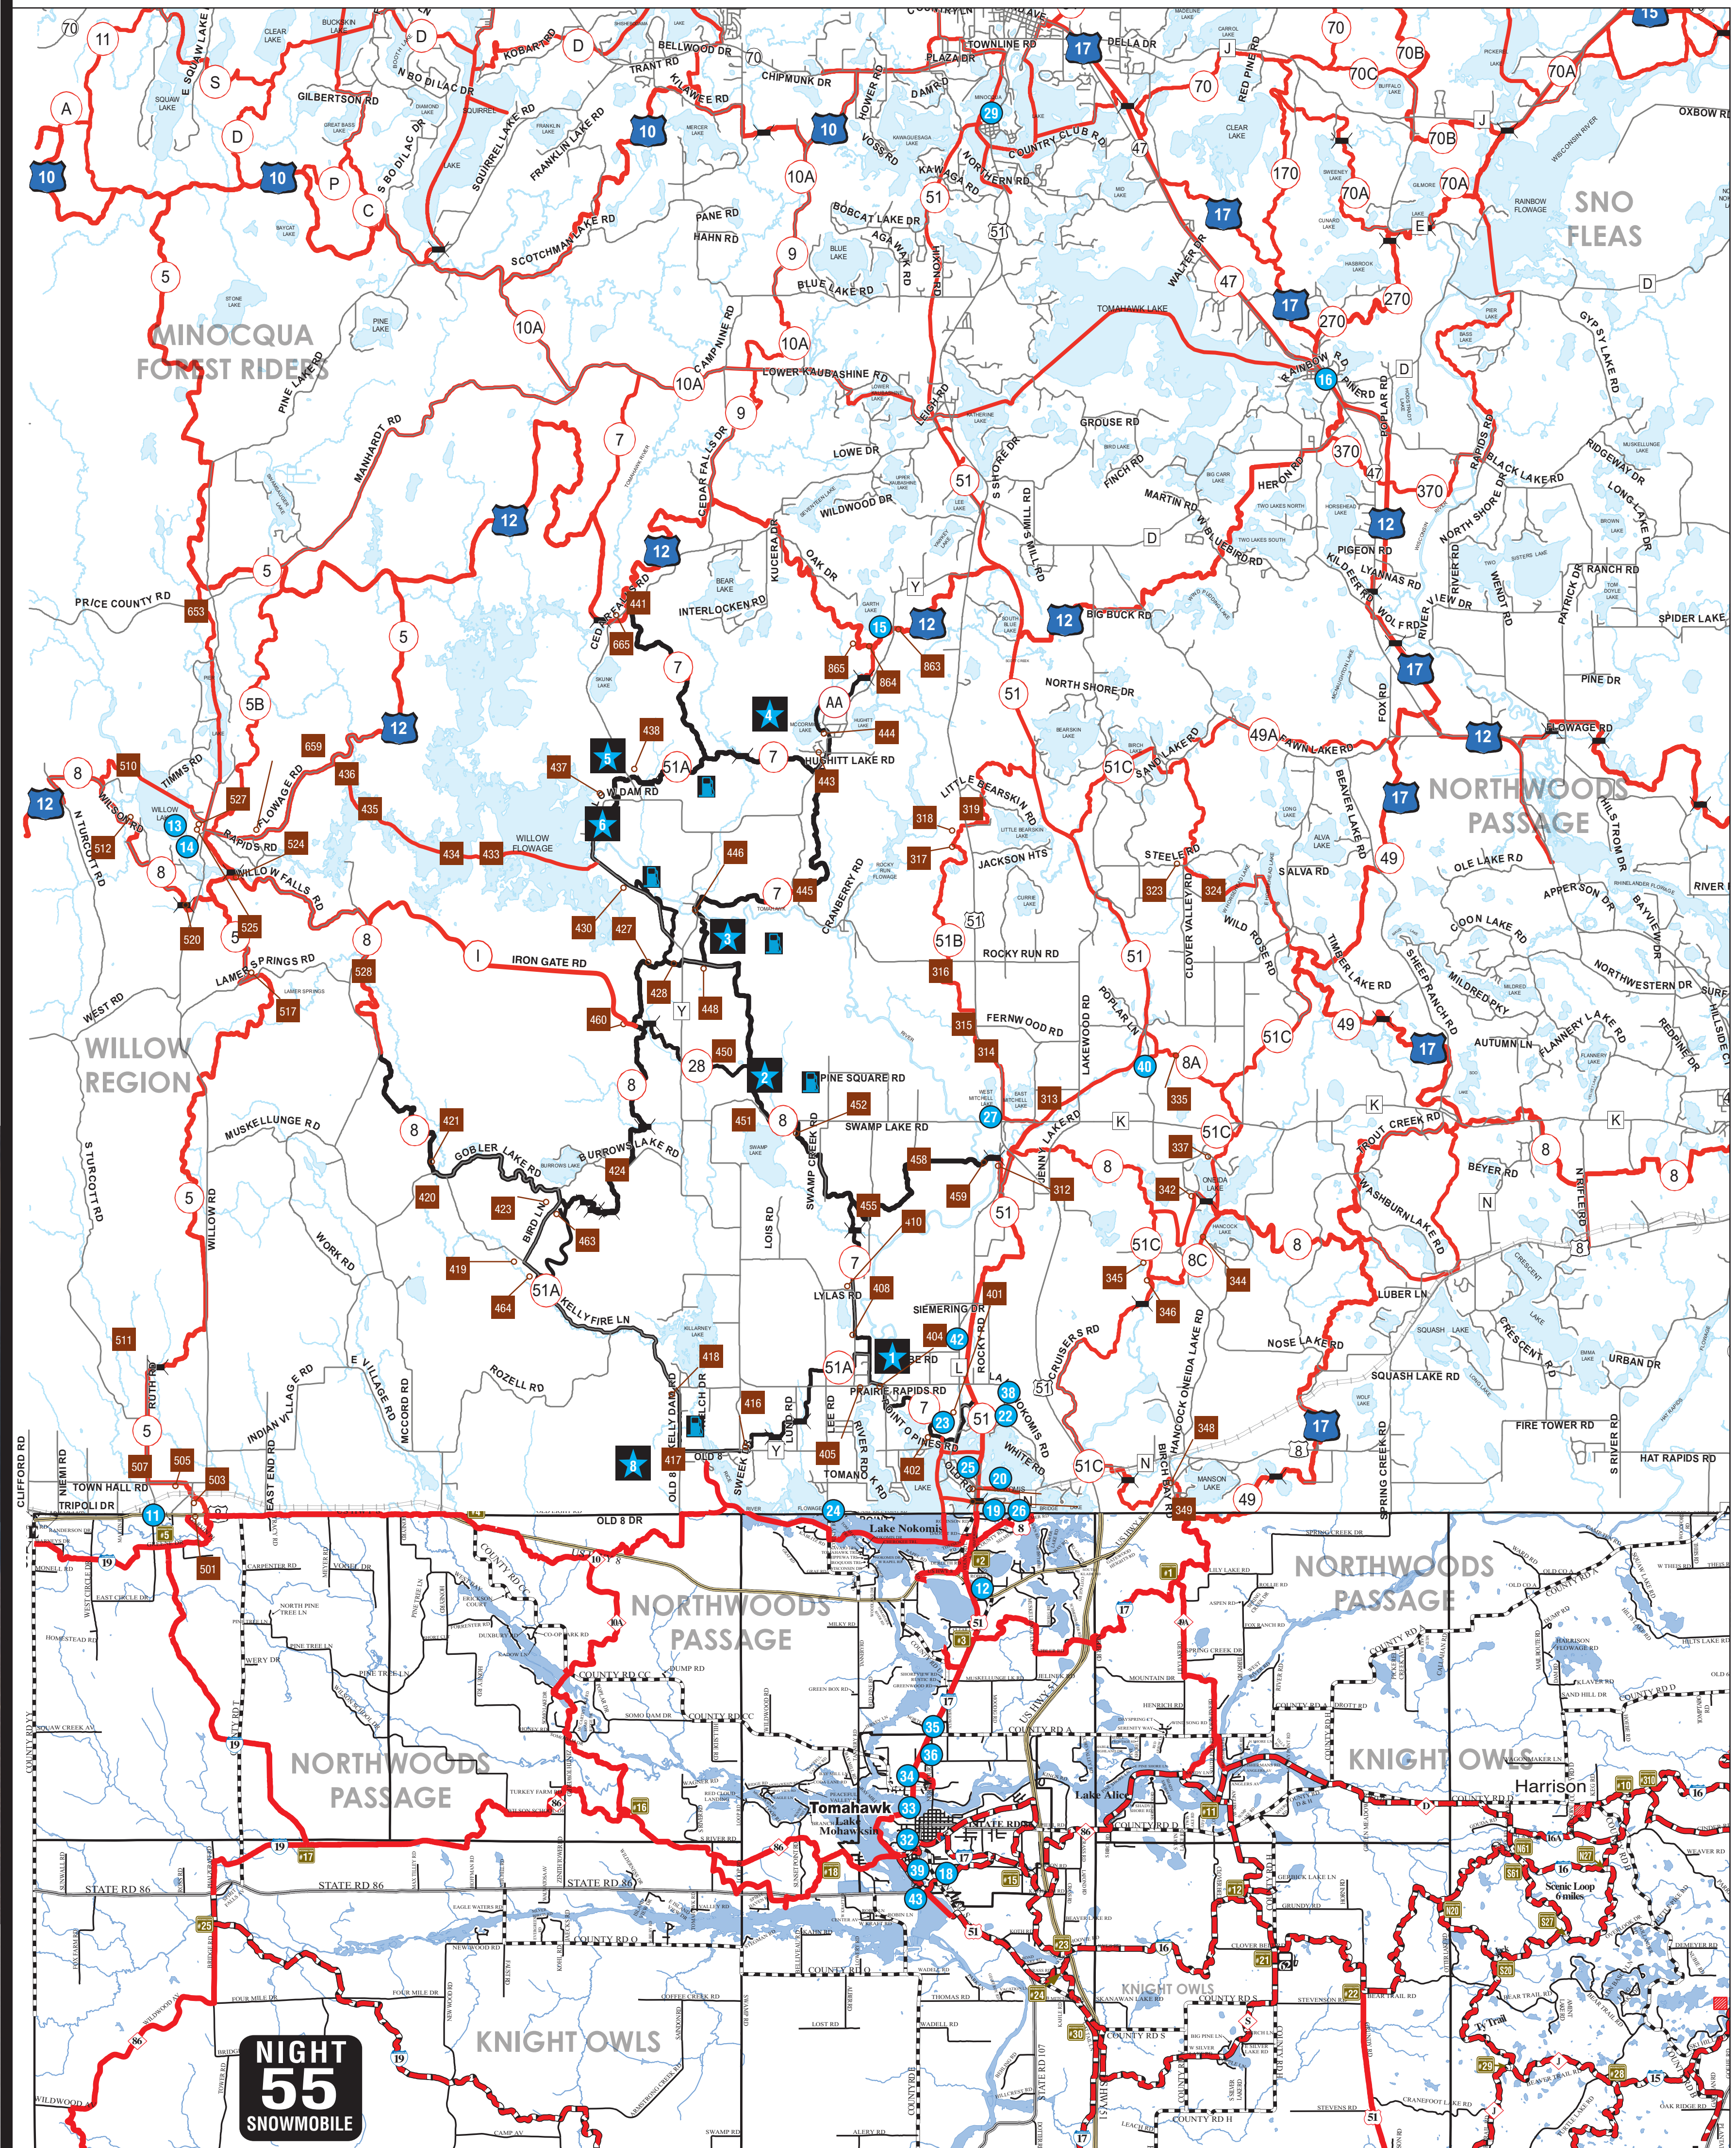

- ★ Check the victim's Airway, Breathing, and Circulation.
- ★ **DO NOT REMOVE the victim's helmet.**
(Unless the victim(s) is not breathing.)
- ★ Control Bleeding.
- ★ Have someone call 911 immediately and give accurate directions
(Note Road Crossings).
- ★ Keep the victim(s) warm.
- ★ **DO NOT MOVE the victim(s) unless immediate danger is present.**
- ★ **DO NOT ATTEMPT to rescue a victim(s) that has gone through the ice.**

This information is brought to you from Nakomis Fire Department & Emergency Medical First Responders

Please have a safe season!

The Oneida County Snowmobile Council would like to pass along the following safety tips that may help avoid conflicts between snowmobilers and trail groomers. Remember, you are the groomer. Usually, you cannot back up, so as soon as you see a groomer coming toward you, pick a spot to get off the trail well in advance of coming up to the groomer, so the groomer can pass the groomer. If the groomer stops, the expectation is you to pass the groomer. Do it slowly, as there is usually a narrow room.

When overtaking a groomer from the rear, wait for the groomer to stop, then slowly pass the groomer. If a groomer is stuck in a rut, you can help them out by pulling them out. You are most likely waiting for a spot where the trail is wide enough for you to safely pass. Under no circumstances should you pass a moving groomer. The groom behind the groomer can slide sideways unexpectedly any time the groomer is in motion, particularly if you are following closely. If you are following a groomer if you were alongside it at the time. A typical drag weight 3200 - 4000 lbs.
