To Whom It May Concern:

Joe Opal and his team helped us immensely with our CO2 Alarm System installs at three different AMC Theater Locations in Arizona.

These projects had been very long and frustrating, and we found ourselves running into miles of road blocks and making little to no progress in closing out the permits for each of them, until we brought Joe and Team on board. They were able to quickly and efficiently procure and install the necessary equipment, were very familiar with the Fire Marshal's requirements, and drafted all the necessary paperwork associated with the projects.

Without out the help of Global Systems United, it is unlikely that we would have completed the projects without spending a lot more money, a lot more time, and a lot more going back and forth with our client, the City, and the Fire Marshal. Global Systems United is a familiar and trusted company by the local authorities, which proved to be an invaluable asset to our non-local company.

I recommend his company and their services, especially to anyone who is currently going around and around with a particular CO2 Alarm install and just needs it to get done efficiently and correctly.

Respectfully,

Van Fox
Owner
Fox Theater Maintenance Co.
