

## GI Pathology Services

We Strive to Provide Exceptional

### Gastrointestinal (GI) Pathology Services

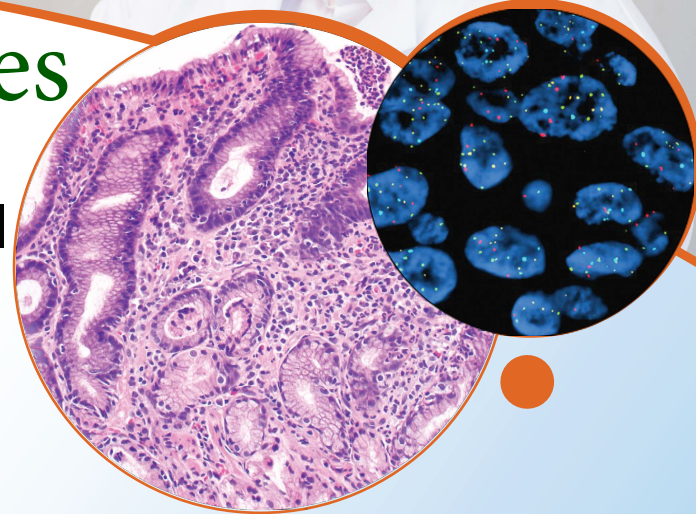

Services are performed by superior board-certified physicians and qualified medical laboratory staff. High quality specimen processing and staining provides accurate diagnoses.

### FISH Testing goes Beyond the Routine

**Barrett's Esophagus FISH Test:** At-risk esophageal adenocarcinoma patients may be detected earlier with FISH testing as genetic changes precede morphological changes. Quicker diagnoses enables better patient treatment.

### Specific & Sensitive FISH Testing

**Detect Pathology Sooner** with Our Fluorescence In Situ Hybridization (FISH) technology. It provides critical information about patients' chromosomal abnormalities. Our state-of-the-art FISH probes are able to clearly fluoresce chromosomes, providing crucial diagnostic data to physicians.

### Unsurpassed GI Diagnostics

- Exclusive FISH testing for GI pathologies
- Express GI Biopsy Processing
- Accessible results online

## Together, We Save Lives

### At EmeritusDX,

we believe patient care comes first. Just as each individual case is unique, so are the solutions we provide. Our qualified laboratory staff work hard to process every case, from the routine to the most complicated. We look forward to partnering with you to make patient care a priority and save lives.
