

STIDX

Early detection and treatment: Early detection allows for prompt treatment, which can help prevent further health complications and reduce the risk of transmitting the infection to others.

Protection of sexual partners: If you test positive for an STI, you can take steps to protect your sexual partners by informing them of your status and practicing of safe sex.

Prevention of long-term health consequences: Some STIs can cause long-term health consequences if left untreated, such as infertility, cancer, and chronic pain. Knowing your STI status and getting treatment as needed can help prevent these health problems.

Peace of mind: Knowing your STI status can provide peace of mind, especially if you have been sexually active with multiple partners or have engaged in risky sexual behavior. Testing negative for STIs can provide reassurance and help alleviate anxiety.

Non-invasive: Easy to collect sample type minimizing the impact to patients.

ADVANTAGES

- Protect your sexual partners
- Reduce the spread of STIs
- Prevent long-term health issues
- Better health outcomes
- Give yourself peace of mind

Screen for the following STI targets:

- | | |
|---|-----------------------------------|
| 1. Chlamydia Trachomatis | 10. Neisseria Gonorrhoeae-1 |
| 2. Gardnerella Vaginalis* | 11. Neisseria Gonorrhoeae-2 |
| 3. Human Herpesvirus 4 (Epstein Barr Virus) | 12. Trichomonas Vaginalis |
| 4. Human Herpesvirus 6 | 13. Treponema Pallidum (Syphilis) |
| 5. Human Papillomavirus Type 16 | |
| 6. Human Papillomavirus Type 18 | |
| 7. Human Papillomavirus Type 31 | |
| 8. Human Papillomavirus Type 33/52/67 | |
| 9. Human Papillomavirus Type 45 | |

Add-on tests:

- 1. BK Virus*
- 2. JC Virus*

*BK and JC virus are detectable in up to 50-90% of the population. Gardnerella Vaginalis is associated (in concert with other organisms) with bacterial vaginosis. These are not STIs and may or may not be indicative of an active infection.
