

# SYNATRA™

## About EmeritusDX

EmeritusDX is a leading provider of advanced cancer diagnostics and information services. We specialize in comprehensive diagnostic testing, including Flow Cytometry, Molecular Diagnostics, Cytogenetics, Pathology Services, and more. Our mission is to support healthcare providers with actionable, precise data to enhance patient care, improve treatment outcomes, and drive clinical excellence.

## The SYNATRA™ report offers a Comprehensive Synoptic Summation of Hematopathology Services

Integrating multiple diagnostic test results into a single, full-color, easy-to-read page. It combines:

- Morphology
- Flow Cytometry
- Fluorescence In Situ Hybridization (FISH)
- Cytogenetics
- Molecular Testing
- Next-Generation Sequencing (NGS)

## SYNATRA™ provides oncologists with a unified view of critical diagnostic data...

Empowering them to make more informed decisions with greater confidence. By consolidating these complex results into one cohesive report, oncologists gain:

- Clear, concise insights into hematologic malignancies and tumor profiling
- Actionable data for precise treatment planning and personalized therapy strategies
- Enhanced diagnostic clarity to guide clinical decision-making in complex cases
- Time efficiency, allowing oncologists to quickly assess results from multiple testing methods in one document
- Streamlined patient care, improving communication with multidisciplinary teams and facilitating faster, more accurate clinical decisions

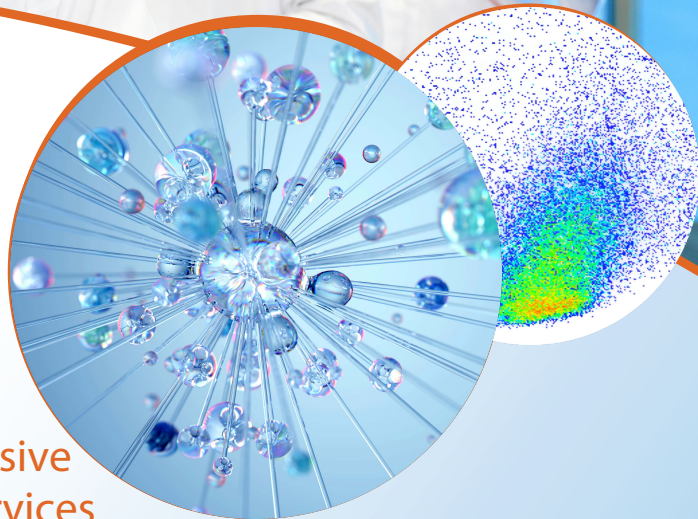

This comprehensive, yet concise, diagnostic tool simplifies complex hematopathology data, ensuring oncologists have the information they need at their fingertips to optimize patient outcomes.
