

SYNATRA™

A Synoptic Hematopathology summary report

About EmeritusDX

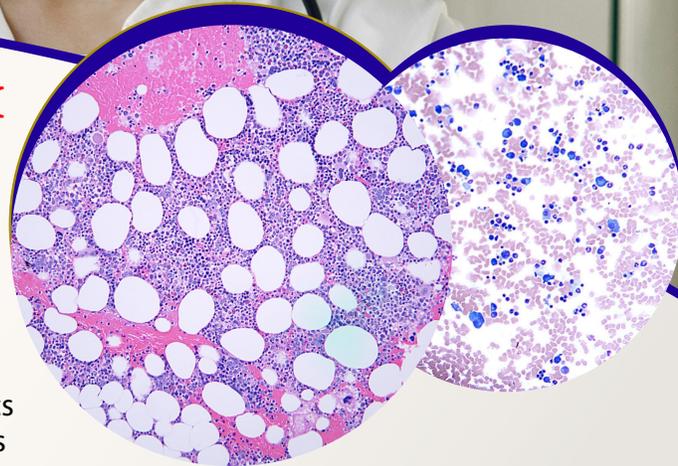

EmeritusDX is a leading provider of advanced cancer diagnostics and information services, offering comprehensive testing across Flow Cytometry, Molecular Diagnostics, Cytogenetics, Pathology Services, and more. Our mission is to equip healthcare providers with precise, actionable data that enhances patient care, improves treatment outcomes, and advances clinical excellence.

What is SYNATRA™

- Consolidates complex hematopathology results into one clear report
- Integrates Morphology, Flow Cytometry, FISH, Cytogenetics, Molecular, and Next Generation Sequencing (NGS)
- Designed for fast clinical interpretation
- Eliminates the need to review multiple reports

Why it matters

- Unified view of critical diagnostic data
- Faster, more confident treatment decisions
- Clear insights into malignancies and tumor profiling
- Supports personalized therapy strategies
- Saves time for oncology and pathology teams

MYWAY™ A complete review and comparison of previous patient findings.

Clinical Utility

SYNATRA™ provides oncologists with a unified view of critical diagnostic data - empowering them to make more informed decisions with greater confidence.
