The Partnership Will Leverage the National Laboratory Network of EmeritusDX to Offer URO17 to Urologists Across the Country

IRVINE, Calif., and SAN JOSE, Calif., Nov. 7, 2022 /PRNewswire-PRWeb/ -- EmeritusDX and KDx Diagnostics announced today the partnership to provide the URO17 test for the detection of bladder cancer. URO17 is a non-invasive urine test with high sensitivity and negative predicted value (NPV) that can be used to determine the status of active bladder cancer and to improve patient diagnosis. This is also likely to improve the treatment path as URO17 is also now available as a Laboratory Developed Test (LDT) in the United States. EmeritusDX will offer URO17 testing to Urology practices across the country.

With over 85,000 new cases of bladder cancer in the United States every year the most common symptom of bladder cancer is hematuria, or blood in the urine, and patients with hematuria need to be subjected to invasive cystoscopic procedures even though a large

"We are very excited to partner with EmeritusDX, a premier cancer diagnostics and information company in the US, to make our URO17 test and information available to their network of urologists. Through EmeritusDX, urologists will have direct access to ordering URO17 Laboratory Developed Test for patients at risk of bladder cancer," says Sholeh Jahanfard, President of KDx Diagnostics Inc.

"EmeritusDX is thrilled to present this additional test offering to the clients we serve. The URO17 LDT test adds efficiency and precision to the care of patients with bladder cancer. EmeritusDX is dedicated to expanding our services to ensure patient care is served and clinical outcomes are improved," says Robert Embree, Chief Executive Officer of EmeritusDX.

URO17 LDT is currently validated and available for ordering through EmeritusDX
