

Green Safari
PHARMA

About Green Safari Pharma

At Green Safari Pharma, we aim to deliver the therapeutic benefits of Southern African Medical Cannabis to Australia. Our mission is to create a more natural, community focused, and equitable supply of Medical Cannabis products, from seed to patient.

We pride ourselves on our close relationships with our world class cultivation partners, licensed CUMCS GACP Medical Cannabis facilities in Southern Africa. The favourable climate, long sunny days and often high elevation is ideal for growing world-class Cannabis genetics.

We source the best Medical Cannabis from facilities built to WHO international standards, ensuring each flower is of medical quality, free of heavy metals and pesticides and can be trusted by both doctors and patients. Our partners are community focused, driving economic and environmental sustainability in local communities.

HELPS WITH:  STRESS  PAIN  ANXIETY  FATIGUE  DEPRESSION

SENSATIONS:  UPLIFTED  FOCUSED  CREATIVE  CALM

NEGATIVES:  DRY EYES  DRY MOUTH

Terpene Profile Breakdown:

Administration - How to use this product

- Method:** Use a medical vaporisation device (vaporiser/vape) to administer this product. Set the vaporiser temperature to 160°C, gradually increasing to 190°C, or as instructed by your doctor.
- Timing:** This product is typically used during the daytime or just before bed, with or without food.
- Dose:** The dosage may need to be adjusted to achieve the required clinical effect. Always "start low, go slow." The recommended starting dose is 1 inhalation. The goal is to find a total daily dose at which symptoms are improved, while limiting side effects. Always follow your doctor's instructions.
- Frequency:** Take 1 inhalation, wait 15 minutes, then increase by 1 inhalation every 15-30 minutes until the clinical effect is achieved [as tolerated].
- Absorption:** Cannabis products consumed via inhalation are absorbed more rapidly than those consumed orally. Onset of effect is usually rapid, with peak effects occurring 15-30 minutes after inhalation. The effects typically last between 2-4 hours.

Consult your doctor if:

- You have a history of liver, kidney, heart, or lung conditions.
- You've experienced panic attacks, epilepsy, seizures, or gastrointestinal issues.
- You have mental health conditions, especially psychosis, or a history of substance dependence.

If you're pregnant, planning to become pregnant, or breastfeeding, speak with your doctor, as THC may pass into breastmilk and affect your baby.

Do not take this product if:

- You are allergic to cannabis or cannabis-based medications.
- You are younger than 18 years of age.
- You have serious heart, liver, or kidney problems.

Interaction with other medicines:

Some medicines may interact with this product, potentially affecting how it works. Check with your doctor or pharmacist if you are unsure about the medicines, vitamins, or supplements you are taking and if these might affect the product.
