

LATIGO LEATHER

Latigos are a great all purpose leather, strong and durable. While it may take a bit of time for the latigos to break in you end up with a lead to cherish.

Suitable for all dogs

METALLIC LEATHER

Metallic leathers are the lightest weight of all leathers. They can be used together for a fully braided lead for a toy dog or mixed with the other leathers.

Not recommended for dogs that pull
All metallic leathers are 3-3.5oz

Actual colors may vary due to printing and dye lots

BULLHIDE LEATHER

Bullhide starts out wonderfully soft, with a more stretchy, springy feel but are still very strong. This leather is not suitable for all applications, such as where holes would be placed in a collar.

Bullhide leathers are 7-8oz, except Avocado is 6-7oz

MELLOWTAN LEATHER

Mellowtan leathers are lightweight leathers and are not applicable to all products. These are best with thinner width leads, paired with Bullhides, not with each other.

Not recommended for dogs that pull
All Mellowtan leathers are 4-5oz

Actual colors may vary due to printing and dye lots

ABOUT THE LEATHER

A variety of different types of leather are used on our products. Leathers are gauged in "weights" or "thicknesses." "Ounces" is the calibration used.

Custom orders are welcome!
