

At TGV Solar we focus on solar and energy procurement solutions designed to reduce your energy costs and reduce your carbon footprint. We want to help you meet and exceed your budgetary goals, along with your sustainability and social responsibility goals.

## Why Buy Dirty Power When You Can Buy Green Power For Less?

It's a win-win allowing you to save money and protect the environment at the same time.

### SOLAR

TGV Solar is all about helping you find the right solar system for your business or home. We will guide you through the entire process. Our simplified approach will leave you comfortable and satisfied with your purchase. Rest assured, TGV Solar will be with you every step of the way.

### ENERGY PROCUREMENT

In addition to lowering your energy costs through the installation of solar, we provide strategic energy consulting services for electricity and natural gas procurement in all deregulated states. Our objective is simple and straight forward: lower your cost per kWh and MMBtu for the supply portion of your electricity and natural gas bills.

### Solar Benefits

- Reduce Your Energy Spend
- Reduce Your Carbon Footprint
- Protect Against Rising Electricity Costs
- Savings Start Right Away, Zero Money Down
- Double Digit ROI With A Low Payback Period
- Increase Your Property Value
- Transferable To The New Owner
- Achieve Sustainability Goals and Display Environmental Leadership
- Improved Brand Image
- Reduce Our Nation's Dependence On Fossil Fuels

### Procurement

While we're analyzing your solar options, we will be looking at your energy consumption and load profile. With that info, and your latest invoice, we can reach out to our vetted suppliers and request pricing (RFP).

What differentiates us from most other energy consultants is our ability to execute the RFP process through two different options. One is the traditional voice brokering method where we use a combination of voice and email to communicate with participating suppliers.

The second is through an **Electronic Reverse Auction**. This process invites suppliers to formally compete in an online platform for your business. The process continues until the lowest price is discovered and no new prices are entered. The auction is run online ensuring a fair and transparent competition. There is no obligation to transact in either process. If you don't like the price, you can walk away. The decision is 100% yours.

### Solar Financing

We will help simplify the three primary financing options available: Cash Purchase, Cash Purchase with Loan, and PPA (Power Purchase Agreement). Zero money down options are available with savings starting on day 1 for qualified candidates.

### Incentives

We will ensure you take advantage all federal and state incentives available.
