

AI can process. Only humans can govern.

Humans amplified by AI. [Human authority remains absolute.](#)

PRINCIPLE 01

Enablement

We equip people to exercise judgment, not just to use tools.

Know what AI can and cannot do. Never defer to output just because it arrived quickly.

PRINCIPLE 02

Collaboration

AI processes. Humans direct. Every workflow keeps its human decision point.

Bring the judgment, context, and cultural awareness AI cannot supply.

PRINCIPLE 03

Governance

Every consequential decision has a named human owner.

If you approve it, you have read it, and you put your name on it.

"The AI produced it" is no defence. Never use AI to deceive, impersonate, or manipulate.

THE COMMON STANDARD

Structured intelligence precedes execution.

Human authority governs every decision.

AI extends capability without replacing judgment.
