

cabdoor

"Where custom is standard"

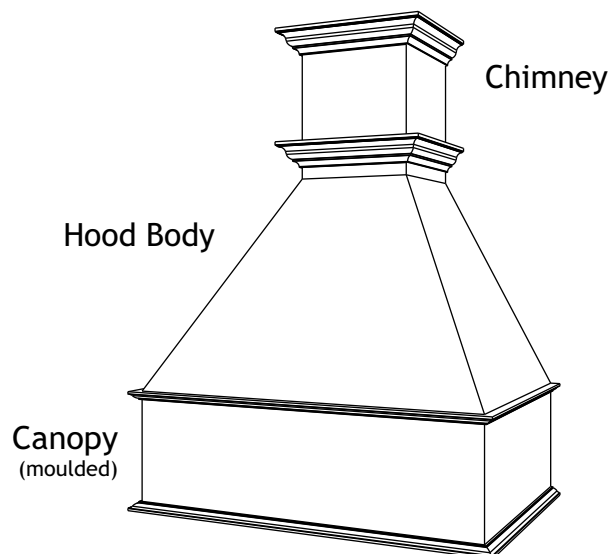

CabParts & MillWork

CabDoor's Hood Terminology

Every Hood Situation can be unique to the room, the design, customer intent, duct and liner limitations, etc.

For this reason, CabDoor has specifically left specifications vague and undefined, trying to bring you general guidelines.

Each hood we embark on will be built to your specific needs and design intentions. A price and 3D-model will be provided in PDF format for your approval before construction.

Typical Sizing Options

Range Width	Typ Hood Width	Ceiling Height	Typ Hood Height	Typ Chimney Height
30"	30", 36"	84"	24"	0"
36"	36", 42"	90"	30"	0"
48"	48", 54"	96"	36"	0"
		108"	42"	6"
		120"	42"	18"

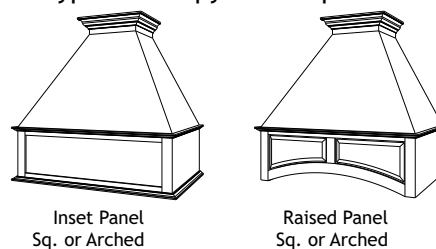

A Note on Hood Liners

You send us your liner selection, and we will design the hood around that selection.

Typical Construction Options

Option Area	Options Available
Hood Body	- Access Panel
Canopy Options	- Flat w/ Mouldings only - Sq. or Arched Inset Panel - Sq. or Arched Rsd Panel
Corbel Options	- If available, Corbel Style
Chimney Options	- specify height
Moulding Options	- Upper Crown, Specify Style - Canopy Trims, Specify Style

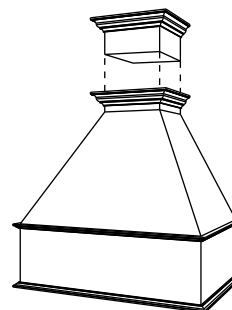

Typical Canopy Panel Options

Typical Chimney Options

Note: Hoods over 42" will receive Chimney to reach the ceiling.

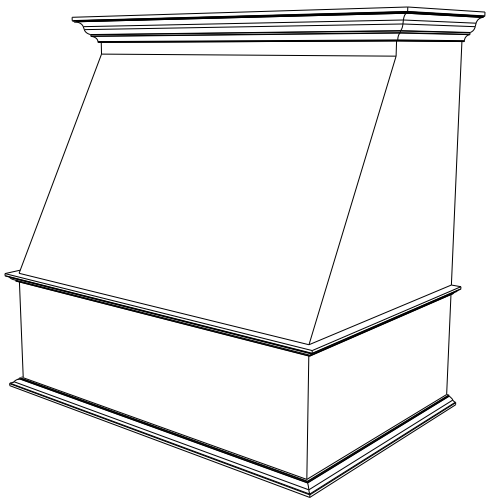

For moulding purposes, a chimney may be desired.

Frameless Kitchen Example
And Parts Available

- 1- Cabinet End Panels- Flat Edgebanded Panels or Solid Wood Inset or Raised End Panels. Choose your dimensions to fit your needs to box-in or recess the toe kick.
- 2- Island End Panels and Built-up End Panels- End Panels at 1-1/2" thick for Island End treatments or framing appliances.
- 3- Cabinet Wall Fillers- Filler Board plus Filler Return to attach to the Euro Box. Designed to hold the Filler Board at 7/8" to flush with the doors and drawer fronts.
- 4- Wood Hoods- Multiple designs, custom-built to your dimensions and hood mechanics.
- 5- Mouldings and Other Millwork- Crowns, Scribes, and other millwork required to add the finishing touches and finished to match the rest of the Project.

Cabinetry Parts

Finished to Match

Why Cabinetry Parts?

At CabDoor, we believe that Euro-Styled cabinetry is in the best position to take advantage of our Pre-Finishing services we call ColorTrend™. Mainly, this is because no faceframe is required to be built and finished by the Cabinetmaker.

But, in order to be effective in providing Pre-Finishing Services, we have to be able to pre-finish all of the parts required for a Euro-Styled Kitchen. This leaves the Cabinetmaker with the Design, Box Building and Final Assembly and Installation.

To that end, our intention is to provide all the parts that need a finish, to build and finish them to match the doors and drawer fronts.

So, we have set out to put some “guide rails” to the possibilities. We can’t begin to understand all the needs you might have, so we are available to customize most needs to the situation that you are facing as the Cabinetmaker.

Just give us a specification, and our Custom Team should be able to provide you with it.

~ The CabDoor Team

- 6- The Osborne Wood program- Select Decorative Elements from the Osborne website to be finished to match your Project needs.
- 7- Furniture Toe Boards, Standard Toe Boards and Valances- Multiple shapes and custom sizing that can fulfill most custom situations when combined with the Osborne program. With drawings, most anything can be created.
- 8- Wood Tops- Tops made from wood veneers with multiple options for Edge Treatments. All finished to match the Project.
- 9- Corbels and Bar Brackets- Multiple designs and styles, in any species for finishing or painting.
- 10- Customized Casework with Finished Interiors- CabDoor can provide you with a “knock-down” version of your casework that needs to be Finished-To-Match (FTM). You supply the dimensions and assemble with Conformat Screws.

Euro Cabinet Fillers

Designed for Euro Cabinetry with Filler and Filler Return designed to flush with faces of fronts at 7/8".

Fillers come 3" wide and can be scribed to fit walls, etc. Wider fillers can be ordered, if necessary.

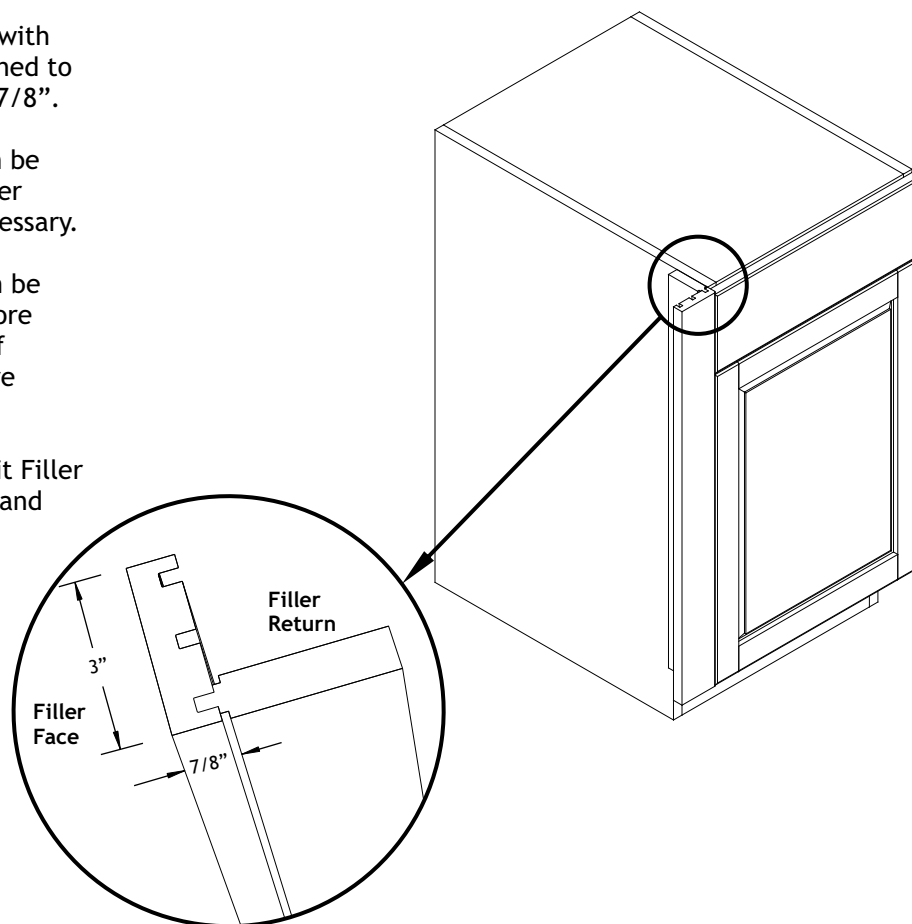

Fluted Fillers or Pilasters can be incorporated to achieve a more custom cabinetry approach if needed. See page 18 for more details.

Filler Return is designed to fit Filler grooves for easy installation and scribing purposes.

Finishing Notes:

Finishing SF column denotes charge qty for 1-sided finishing.

2-sided finishing is available upon your request.

Built-up Cabinet End Panels (frameless application)

Built-up Cabinet End Panels for end-of-run application with heavier facing than standard 3/4" panels.

Can be ordered Flat or Paneled, and you configure frame sizes and panel options.

Panel features 3" build-up strips inside with edge-banded edges to create the heavy look, and can be used in Base, Upper, Upper-Island, or Tall applications.

Finishing will normally be two sided.

Pricing Note:

Built-up End Panels normally utilize a 3" built-up frame all-around on the Cabinet Side.

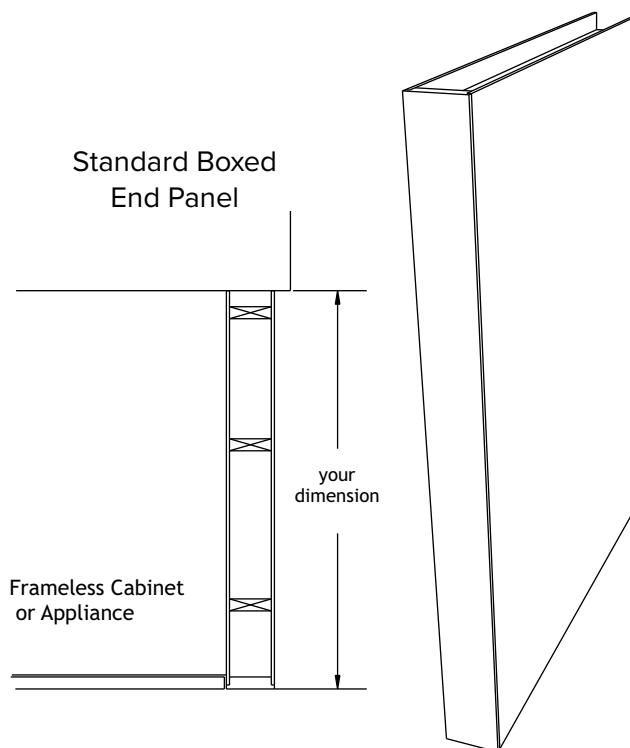

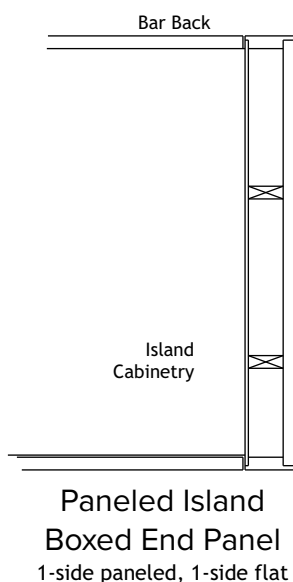

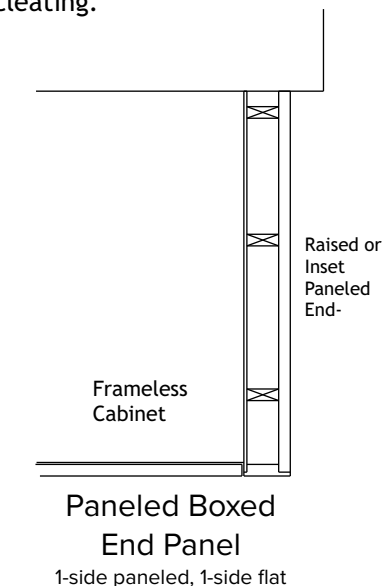

Other configurations can be ordered- add notes to the order form.

Add \$85 to Standard Door Costing.

Boxed End Panels

Boxed End Panels are built-up panels that are thicker End Panels used to box in appliances (refer, dishwasher, range, etc), cabinetry or islands.

Each assembly has a 1" recess at back, bottom and top to allow for mounting cleating.

Edged Shelves

Sometimes we need interior cabinetry shelves to receive a 1-1/2" Edge to create a heavier, more sturdy look.

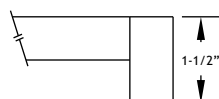

These can be finished to match casework that has a Finished-To-Match interior.

Choose your edging and edge-treatment such as square, round-over or other profile within our Patterns Guide that works.

CaseWork (Finished-to-Match)

We know that kitchen design occasionally calls for casework with finished-to-match interiors.

At CabDoor, as much as we don't want to be in the box business, we are finding that providing box parts for finished-to-match interiors may be essential for a pre-finished parts program to work.

How it works:

1- Send us drawings

Send us your construction drawings and desires for the casework. DXF files allow us to will build the CAD based on our understanding of your needs.

2- Price Quote

Pricing for your casework will be quoted to you based on time & materials, with finish charges included.

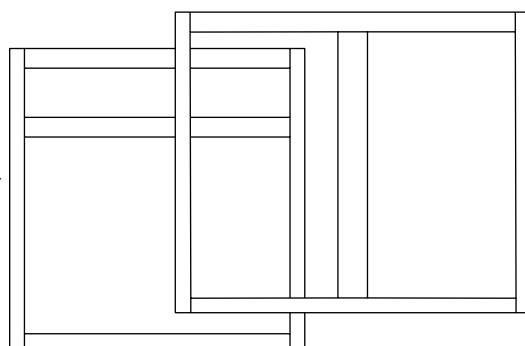

3- Fabrication

We will cut the parts, process boring needs and edgebanding with the intention for assembly to be with Conformat Screws.

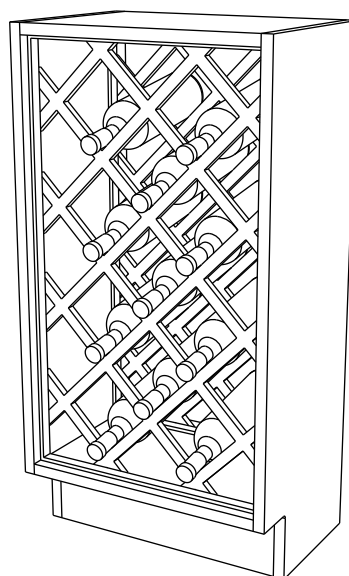

4- Pre-Finishing, Packaging & Delivery

We will then pre-finish the parts to your projects requirements, package and ship knocked-down for your final assembly and installation, including all required components, trims and details you specified.

Face Frames are also available. Send us your drawings for quote.

Cabinetry Parts and Accessories

Refacing Supplies

Veneers and Strips

DuraBack Veneers provide a superior high quality veneer surface, free from cracks, tears, rippling and excessive curling. Additionally the product is inherently moisture resistant which mitigates the effect of humidity variances and reduces the potential issue of wood movement. DuraBack veneers are available in most standard material groups.

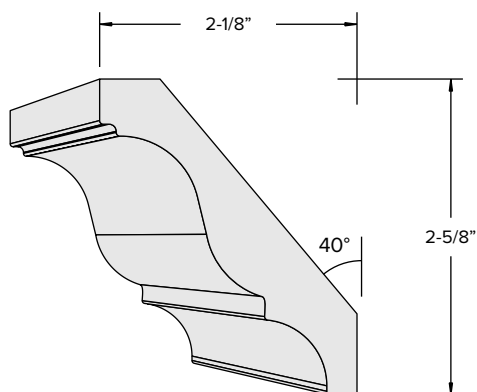

Plywood veneers are available in 5.2 mm thickness and can be ordered in cut-to-size dimensions.

All veneers can be pre-finished and ordered as a full refacing package, including the doors, drawer fronts and drawer boxes.

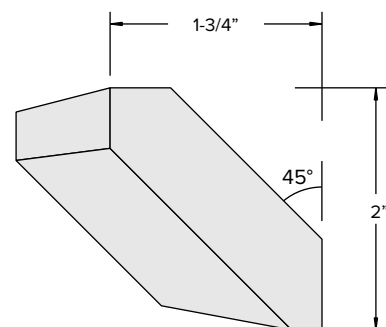

Refacing Strips, cut from solid wood, sanded to 1/4" thick are available in all species. Specify widths and quantities. Lengths are typically 8' and 10' long.

Veneer Pricing

S4S Lineals

- CabDoor offers S4S lineals with matching edge details and species, for use as light valances or various trim applications.
- All lineal lengths are sold in 8' - 10' lengths.
- All pieces finish at 3/4" thick, and are finish sanded.
- Optional Edge Details available on one or both sides:
(See Chart below)

Build Something
Beautiful
with us!

Partners in Potential

CabDoor has partnered with Osborne Wood Products to bring you the full package of components required for any kitchen or bath project.

Whether your project is Contemporary or more Traditional, Osborne has decorative elements that you might need. And as your Pre-Finishing partner, CabDoor can bring you those parts finished-to-match and ready for installation.

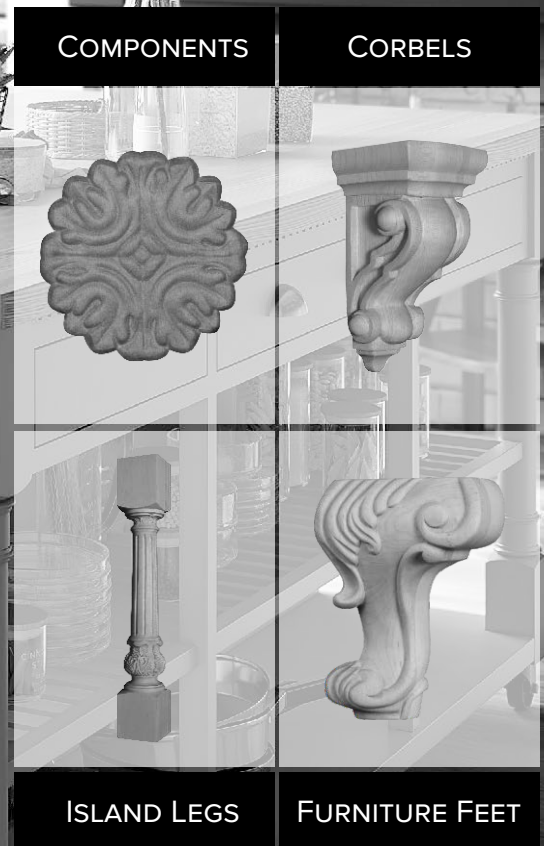

Browse the Osborne Catalog at:
<https://www.osbornewood.com>

See what might add additional Sales
Potential to your Project!

CabParts & MillWork

MillWork

Osborne Wood Products

How it works

As a Trade-Partner with Osborne Wood Products, CabDoor can bring you a small savings over buying direct.

Products can be ordered through CabDoor, and shipped directly to our Finishing Room for final finishing to match your project on order with us.

We will then ship directly to you along with the rest of the project.

When Ordering, provide us with the following information:

- Osborne Part Number from their website.
- Quantity of the parts needed.
- The finish desired on those parts.
- Any other additional work required that you want CabDoor to perform before finishing those parts.

You will then receive a quote for the parts and additional services required.

The following pages are provided to aid in the ordering of typical architectural components required for that custom installation. Wall paneling, special end panels, and arched panels are among the components available.

By completing the template(s) for your particular situation, costs for that particular part can be calculated and become more predictable, making you more profitable.

Illustrated, are the key components to these templates which, when utilized, will provide the best value and aid in placing your order.

Assembly Diagram

This is a typical diagram, and as you may require "un-equal" sizes of parts within the assembly, the drawing will be sufficient, provided all Dimension Boxes are filled in.

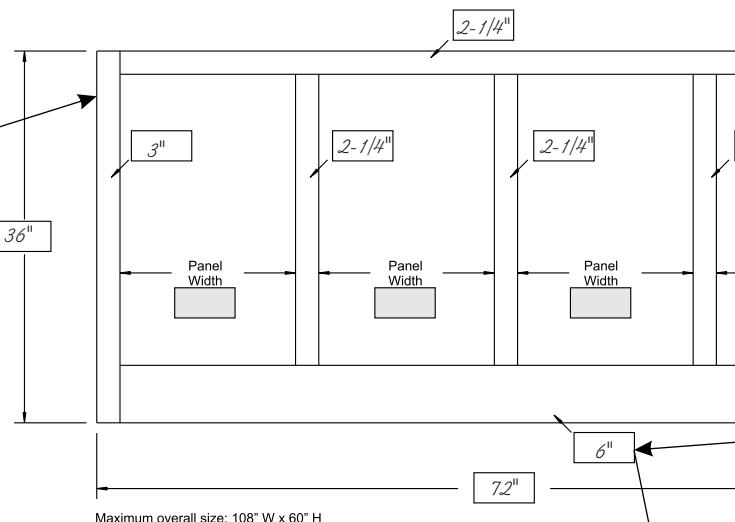

Dimension Boxes

Please fill in all boxes with your custom information for your desired assembly.

Order Info Box

Please fill information concerning the style and patterns required for the assembly...

SF calculations will be required if you want to calculate the assembly cost.
