CASE
STUDY

INTRODUCTION

DigDATAble Ltd

A private medical imaging provider faced **ongoing administrative inefficiencies** due to **fragmented invoicing practices**. With a focus on modernising their internal operations and increasing visibility into financial data, we collaborated to deliver a tailored digital transformation solution.

CASE STUDY

CHALLENGE

DigDATAble Ltd

The client managed their invoicing through an ad hoc mix of Word documents, PDFs, and image files. Key issues included:

Fragmented Document Formats

- Invoices existed in Word, PDF, and image files with no consistency or standardisation, making tracking difficult.

Lack of Centralisation

- No unified repository meant files were scattered, and there was no structured system for organising or retrieving past invoices.

No Financial Visibility

- The client couldn't track amounts due, paid, or outstanding, nor analyse billing history or client payment behaviours.

Manual, Error-Prone Processes

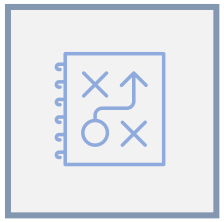
- Each invoice was manually created from scratch, increasing workload and the risk of errors, with limited scalability.

These inefficiencies hindered financial oversight, delayed follow-ups on payments, and reduced the client's ability to make informed business decisions.

CASE STUDY

SOLUTION

DigDATAble Ltd



We developed a **Smart Invoice Tracker**, a **custom Excel-based tool** designed to **bring structure and insight** into the invoicing process.

Key features included:

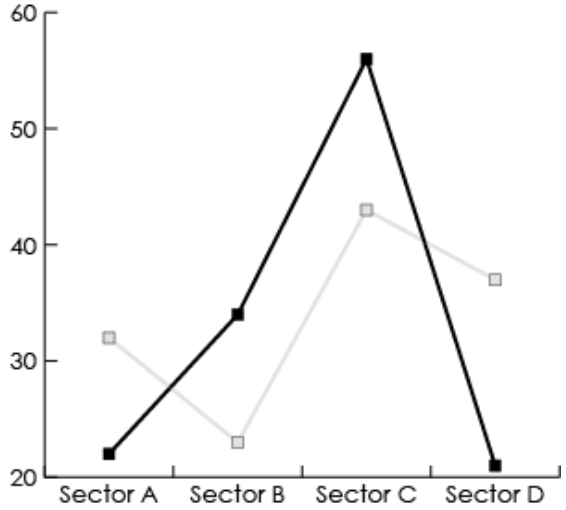
- **Structured input** of new invoice data.
- **Dynamic views** of invoice history.
- **Real-time overview** of due, paid, and outstanding amounts.
- Built-in calculations and summaries to **reduce manual work**.
- Ready-to-use dashboard for **quick financial insights**.

This solution leveraged the client's existing tools and skills, requiring **no new software investment** while immediately streamlining their financial processes.

CASE STUDY

RESULTS

DigDATAble Ltd



The implementation of our **Smart Invoice Tracker** led to:

- **80% reduction in time** spent managing and issuing invoices
- **Full visibility** overdue, paid, and outstanding amounts
- **Real-time financial tracking**, enabling proactive decision-making
- **Fewer manual errors**, improving accuracy and consistency

Our tailored solution streamlined the client's financial operations, reduced administrative burden, and provided clarity across all billing activities.

TESTIMONIALS

DigDATAble Ltd

"The difference is night and day.
I now have visibility on all our
invoice activity in one place,
and it saves hours every month."

CONCLUSION

DigDATAble Ltd

This case highlights how a **simple, cost-effective solution** can have a transformational impact when aligned with the client's day-to-day workflows. By **digitising and centralising a critical process**, we've enabled **operational efficiency and data-driven insight** without the need for complex tools or heavy training.
