Get a glimpse on what's new and exciting in the
Data Center Association of the Philippines and the industry!

DCAP JOINS POWER PANEL AT THE SIEMENS TECH FORUM 2025

The Data Center Association of the Philippines (DCAP) proudly supported the Siemens Tech Forum 2025, a landmark gathering of industry leaders, innovators, and policymakers under the theme “The Next Level for the Philippine Data Center Industry.”

In the first panel discussion, “Rethinking the Next-Gen Data Center,” DCAP Co-founder and Chairman Steven Davis shared his insights as one of the distinguished panelists. The session was moderated by Siemens and joined by senior leaders from VITRO, Inc., Meralco, ENDEC Group, and STT GDC, creating a powerful dialogue that spanned the full spectrum of the data center ecosystem. Together, the panelists examined how the Philippines can prepare its data center industry for the future by addressing pressing priorities such as ensuring AI readiness, embedding renewable energy integration, advancing energy efficiency measures, strengthening regulatory frameworks, and attracting strategic foreign investments.

The discussion highlighted that the success of the industry rests on multi-sector collaboration and the ability to anticipate global trends while adapting to local realities. By bringing together diverse voices from operators, utilities, regulators, and global players, the Siemens Tech Forum 2025 reaffirmed the critical role of dialogue and partnership in shaping a resilient and globally competitive digital infrastructure landscape for the country.

DCAP Chairman Steven J. Davis to Speak at Data Centre World Asia 2025

The Data Center Association of the Philippines (DCAP) proudly announces that its Chairman, Steven J. Davis, is set to speak at Data Centre World Asia 2025 in Singapore. Recognized as the world's largest and fastest-growing data centre trade exhibition and conference in Asia, the event continues to attract global leaders, innovators, and decision-makers from across the ecosystem. Data Centre World, Singapore has built its reputation on delivering unmatched value to exhibitors and visitors alike—driving growth, collaboration, and innovation year after year. Chairman Davis' participation underscores the Philippines' growing role in shaping the region's digital infrastructure landscape.

UPTIME INSTITUTE RELEASES 2025 DATA CENTER DENSITY & PUBLIC CLOUD SURVEY RESULTS

The latest Uptime Institute survey reveals key shifts in data center operations: 20% of owner/operators now deploy rack densities of 30kW or higher, a 7-point increase from 2023. Half of respondents report building or upgrading data halls for high-density IT in the past year.

On cloud adoption, 49% host mission-critical workloads in the public cloud, while 51% do not—citing data security (69%) and regulatory concerns (49%) as top barriers.

The Global Data Center Survey 2025 gathered insights from 1,677 respondents, with this report based on 835 owner/operator responses collected between April 3 and May 22, 2025.

UPTIME INSTITUTE RELEASES VENDOR PERSPECTIVES ON 2025 DATA CENTER TRENDS

The latest Uptime Institute report highlights vendor insights across spending, growth, cooling, and security. 52% of vendors report rising customer spending on data center products and services, while 80% expect capacity growth to accelerate over the next five years.

Sustainability and security remain top priorities: 87% rank energy efficiency as the key factor in cooling system sustainability, and 63% say managing corporate risk is the most important benefit of facility cybersecurity. Still, 54% cite staffing challenges as a major barrier to effective cybersecurity. Findings are based on vendor, engineering, and consultant responses to Uptime's Global Data Center Survey, Cooling Systems Survey, and Security Survey conducted in 2025.
