Barbara Caballero VanMatre **Recommendation** ***
Retired Kindergarten Teacher • Corpus Christi, Texas • February 17, 2025

This project encompasses many skills: writing, numbers, sequencing, geography, directionality, observation, recording and comparing data. I could go on and on. If I were still teaching this would be on the top of my list to do with my students. This project is news worthy if the media gets a hold of it.

HOW TO MAKE SUGAR WATER NECTAR & CLEAN THE FEEDER

PUT THE FEEDER WHERE YOU CAN SEE THE HUMMINGBIRDS

- Hang your feeder in the shade
- Make sure it is easy to reach
- Don't place near a window

THE BEST SUGAR WATER RECIPE FOR FEEDERS!

ADD TO A BOWL:

- 1 cup refined white table sugar
- 4 cups water
- Stir

Warm nectar in microwave for 1-2 minutes until sugar is dissolved

Rinse feeder with hot water & scrub the inside with a new toothbrush

Pour sugar water nectar into feeder

Refrigerate extra nectar.
It can last up to 2 weeks.

- Change the nectar every 3 to 4 days
- Don't use nectar mixes with red dye
- Only use refined white table sugar

*Barbara VanMatre
Photography*

1 CUP SUGAR

2 CUPS WATER

Sparkles MISSION:

Introduce Children to the Amazing World of Hummingbirds. Create Safe Backyard Habitats.
EDUCATION, LITERACY & CONSERVATION.

CLEAN THE FEEDER WHEN YOU CHANGE THE NECTAR

- You have to keep your feeder clean to keep your Hummingbirds safe
- Clean it before you add nectar
- Pour out any remaining nectar
- Rinse it with hot water
- Scrub the inside to remove mold & residue. Use a new toothbrush
- Rinse with cold water
- Fill with fresh nectar

YOU CAN GET A FEEDER AT WALMART OR PET STORES for \$5

2 CUPS WATER
