About the Workshop:

THE 6 STEPS TO A HIGHLY SUCCESSFUL ELEVATOR MODERNIZATION is a free workshop for AOA boards or their appointed committees who are at the inception stage of their modernization project. This is not a generic workshop intended for a large group, but an on-request, privately conducted workshop offered to individual boards, as each workshop is tailored to each board's specific project.

The 6 Steps to Mod workshop provides the board with an assessment of their elevator system and includes a discussion about the needed upgrades, estimated cost, projected timeline, and much more. Upon completion of the workshop, board members come away equipped to make intelligent decisions about their elevators.

Workshop Dates and Locations: Workshops are scheduled upon request and conducted at a time and place that is convenient for board members to attend. Workshops run just under two hours in duration and are typically held in the same location as the board's regular monthly meetings.

The 6 Steps to Mod workshop is the best first step to modernizing your elevators. Contact us today to schedule a workshop for your board or appointed committee.

Sharon Oka, board president at the Alexander Arms, gives the 6 Steps to Mod workshop "5 Stars" and recommends that "All board members and property managers should attend".
