

Case Painting will beautify your home's exterior with professional Vinyl Siding Painting.

Refinishing your Vinyl Siding Can Save You Thousands Compared to The Cost of Replacing it!

Vinyl Siding is a great product, but it begins to fade in color after about twenty years, and the siding loses its appeal. The appearance of your siding plays an important role in your home's overall look and value. Refinishing your vinyl siding with new paint and possibly a new color will beautify and add value to your home. We specialize in Vinyl Siding re-finishing, and our skilled painters can make your home look new again!

Our Refinishing Process

We take pride in our comprehensive cleaning before re-painting which includes pressure washing to remove built up dirt and chalk. After the house is dry, it will be re-painted with two coats of premium Sherwin Williams Vinyl safe paint. Using Vinyl safe paint is very important because using non-Vinyl safe paint may possibly cause the vinyl to warp from the heat of the Sun. This premium acrylic paint is professionally sprayed to provide a smooth durable finish and will beautify and protect your home for years to come.
