- **Patient Engagement Toolkit** The Patient Engagement Toolkit offers materials to support researchers who want to engage with patients in conducting research. Our research team created these materials as part of the finished PORTAL project.

PORTAL was funded by the Patient Centered Outcomes Research Institute (PCORI) to develop capacity for patient-reported outcomes research, and the PORTAL Patient Engagement Council (PEC) advised the project. The PEC was composed of 10 patients and representatives from patient advocacy groups from four Kaiser Permanente (KP) regions as well as from the Denver Health and Health Partners health systems.
