WHO ARE WE?

Established in 2016, Flow State Event DJ's is a sound, lighting, and sound technician rental business-focused predominantly on weddings, corporate events, and private parties. Based in Cape Town and the Overstrand, life long best friends and fellow DJ'S Marc and Wes have one goal: To make your big day an unforgettable experience and one that your guests will be raving about for years to come.

PACKAGES

Our wedding packages have been carefully curated to provide an exceptional DJ/Sound Engineer service and experience. With tailored packages starting from R8000, we have something to suit every couples wedding budget. With an array of world class equipment and an endless selection of songs, we've got your every need covered.

WHY CHOOSE US?

If there's one thing we've learnt over the past few years is that weddings can be expensive. Everything adds up. What we find interesting is that the DJ along with the sound, lighting, ambience and music selection are often an afterthought. The party/reception is a crucial and central component of your celebration and one that you and your guests are likely to enjoy the most. With that said why not hire a group of professionals to ensure that every angle is covered, every note is hit, everyone's favourite hits are played and your guests leave your wedding with the biggest smiles. The DJ is of course the one that will bring down the curtain on your big day. Wesley and Marc will ensure that it's one to remember.
