WatchGuard Firebox, our flagship family of high-performance firewalls, is a foundational component of WatchGuard's

Unified Security Platform® architecture.
Choose from tabletop models ideal for small businesses and home/branch offices or a range of rackmount models with features like modular port options and dual power supplies that more extensive, growing networks need. And at every level, have enterprise-grade security engineered to be the industry's fastest, smartest, and most effective network security defense.

Multi-Layered Protection Against Modern Threats

Firebox appliances are foundational to WatchGuard's Unified Security Platform architecture, which provides comprehensive security solutions to protect your organization from a wide range of threats. Combining Firebox products with our Wi-Fi, identity, and endpoint security solutions can further reduce your attack surface and protect your business.

WatchGuard's **Automation Core™** brings simplification and scale to every aspect of security consumption, delivery, and management.

"WatchGuard provides high-level information that allows me to ask the important questions, for business efficiency and also the security of the business. It protects each desktop and our network infrastructure and is very simple to use at the management level."

Neil Prince, Group IT Manager, Rybrook Holdings
