ETHICORK™ | INVENTING AIR CARE, ETHICALLY.

NATURE'S OWN MATERIAL. NOW IN CONTROL.

**A NATURAL SYSTEM THAT RELEASES FRAGRANCE
THROUGH AN ENGINEERED INTERNAL STRUCTURE.**

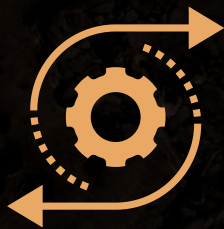

A BREAKTHROUGH. A REVELATION IN AIR CARE.

For the first time, cork becomes the foundation of commercial air treatment. Ennovamark introduces patent-pending **Zoned Dispersal Pathway™** technology through their **Ethicork™** air care system - a **natural system**, using cork, that releases fragrance through an engineered internal structure.

THE FUTURE GROWS ON TREES.

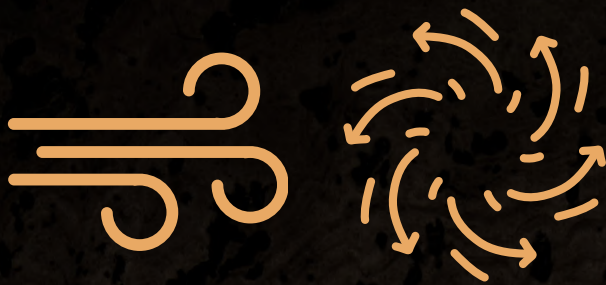

Cork is a regenerative material. Harvested without cutting down trees, it renews itself naturally, with cork oak landscapes recognised as significant carbon sinks, strengthening ecosystems in the process. Cork is widely considered VOC-free, naturally hypoallergenic, biodegradable and naturally resistant to mould and fungal growth, with natural odour-management properties, too.

DESIGNED TO SERVE. A REFILL THAT REMEMBERS.

Built-in, natural colour changing visual cues signal when replacement is needed, making service effortless. Each unit delivers weeks of continuous effectiveness, powered only by natural airflow, for up to 60 days. Easy to install and replace, fitting into a variety of popular passive dispensers.

AIR, WITHOUT EFFORT.

No batteries. No fans. No electricity.
Just effortless, natural air movement.

REFINED FRAGRANCE. INTELLIGENT BY DESIGN.

Our **Zoned Dispersal Pathway™** creates a natural evolution of scent over time. Cork's unique structure guides fragrance release in distinct, precise stages, offering a longer, more consistent experience whilst also offering natural odour management capabilities and tackling fragrance fatigue. It's designed to have potential for circular use and reduced waste. Fragrances are VOC-exempt formulations.

SECURE. BALANCED. PROTECTED.

Fragrance is held within a stable cork structure, reducing risk of leaks, spills or residue compared to liquid-based air care formats.

NATURE'S BLUEPRINT.

THE HIDDEN POWER OF CORK.

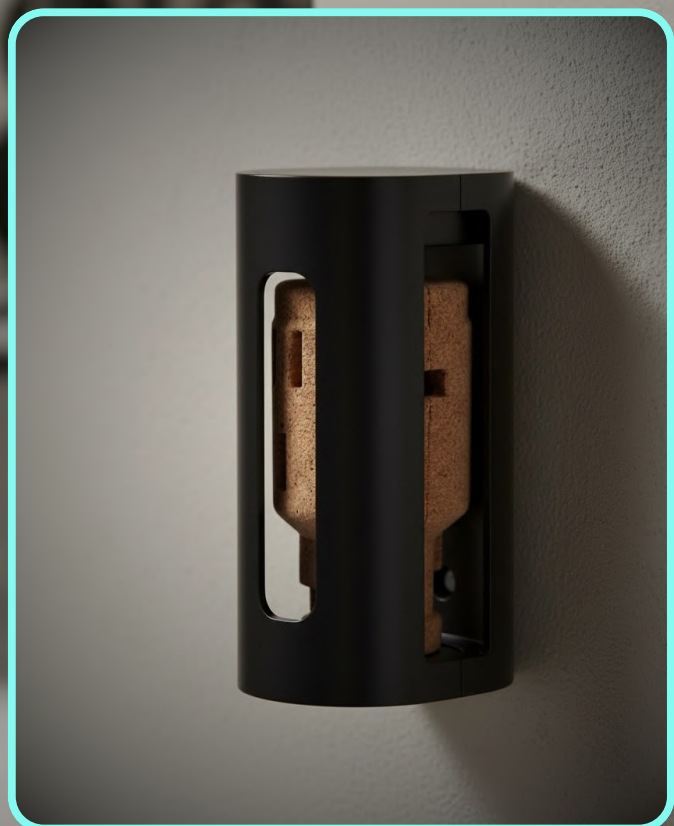

CORK'S NATURAL BENEFITS.

- 100% NATURAL CORK. REGENERATIVE AND BIODEGRADABLE.
- SOURCED FROM CORK OAK LANDSCAPES RECOGNISED FOR SIGNIFICANT CO₂ ABSORPTION OVER TIME.
- NATURALLY HYPOALLERGENIC WITH LOW-EMISSION MATERIAL PROPERTIES.
- NATURALLY RESISTANT TO MOULD AND FUNGAL GROWTH AND NATURAL ODOUR-MANAGEMENT PROPERTIES - IDEAL FOR GYMS, SPAS AND WASHROOMS.

RADICAL. REMARKABLE.

AIR CARE THAT FITS.
PART OF THE SPACE.

**POWERED ENTIRELY BY AMBIENT AIR.
JUST NATURE AT WORK.**

**NO BATTERIES, FANS OR EXTERNAL
ENERGY REQUIRED. EVER.**

DESIGNED FOR WHERE LIFE HAPPENS.

AIR CARE THAT BELONGS EVERYWHERE.
