

ETHICORK™ SELECTED AS FINALIST AT THE EUROPEAN CLEANING & HYGIENE AWARDS 2026 | TECHNOLOGICAL INNOVATION

FRAGRANCE COLLECTION.

FSC® CERTIFIED CORK INFUSED WITH HIGH QUALITY, REFINED FRAGRANCES.

EFFECTIVE FRAGRANCE PRESENCE.
NOTES THAT MOVE WITH THE TIMES.

WITH PATENT-PENDING ZONED DISPERSAL™ TECHNOLOGY.

The mark of
responsible forestry

FRAGRANCE DESIGNED TO GO FURTHER.

Patent-pending Zoned Dispersal Pathway™ technology uses an engineered internal cork structure that guides fragrance through distinct regions of the refill throughout its lifespan.

ADAPTIVE SCENT PERCEPTION.

As people become accustomed to a fragrance, they naturally notice it less over time.

Ethicork™ is designed to help counter this effect by allowing fragrance character to evolve subtly as the refill ages.

ZONAL FRAGRANCE INTENSITY BOOST.

As fragrance migrates between internal regions of the refill, intensity can naturally reassert itself.

Subtle intensity renewals help maintain fragrance presence throughout the product lifespan and contribute to a more consistent user experience.

UP TO 60 DAYS PERFORMANCE.

Powered entirely by ambient air movement.

A fragrance experience designed to remain noticeable for longer, perform more consistently and deliver a more balanced scent profile throughout the life of the refill.

Up to 60 days fragrance performance. **No aerosols.** No harmful propellants.

FRAGRANCE DESIGNED FOR REAL SPACES.

Ethicork™ fragrances have been selected for commercial environments where scent must feel welcoming, noticeable and appropriate throughout the day.

Battery & Fan Free.

No batteries or electrical components.

Natural substrate infused with fragrance.

Fragrance contained within a solid cork structure.

VOC-exempt fragrances.

Fragrance formulations are VOC-exempt.

Passive, leak-resistant design.

Reduced risk of leaks compared with liquid systems.

Why Ethicork™ Fragrances Are Different.
