

THE FACIAL ROOM SOCIETY

The Facial Room Society is rebranding for 2025—focusing on the expansion of their campus to accommodate a very fast-growing student enrollment! With their inspiring mission to empower individuals to enhance clients' confidence and wellbeing by providing an exceptional education in aesthetics, The Facial Room Society is truly blazing a trail in their industry. Through integrating holistic services such as nutrition and wellness consultations for their clients, as well as increasing their academic and financial scholarship programs for prospective students, they plan to make a wide-reaching impact throughout the area.

“The goal is to seek new networking opportunities to showcase our comprehensive services and collaborate to bring esthetic care to our community,” shares Kimberly Mason, CEO

and Owner. “Being an Esthetician allows one to connect with clients on a deeply personal level. We often have a profound effect on their mental and physical well-being. Through sharing our knowledge of skin health from the inside out, we help our clients make more educated decisions and build better habits. We have prioritized the voices of our students, clients, and staff to aid in the growth of our curriculum and school, organically and exponentially. We have set ourselves apart by providing an innovative and relevant education to ensure the professional success of our graduates. Our business is a premier private beauty school, focused on offering quality esthetic services as well as health education and learning opportunities. We are invested in, and rooting for, every student. Our success is not only measured by the number of students

enrolled and/or graduating from our school - but by the long-term impact we make on their careers while positively influencing our community!”
