

Commonly Asked Questions About Silhouette InstaLift®

About Silhouette InstaLift®

Silhouette InstaLift® is a novel dual-action cosmetic rejuvenation device that's minimally invasive. Using innovative micro-suspension technology, MST, a practitioner is instantly able to lift aging skin in the mid-face area and gradually renew the body's natural collagen for a visibly more youthful appearance. The procedure takes approximately 45-60 minutes and requires minimal downtime for results that last up to 2 full years.

1. What is Silhouette InstaLift® ?

Silhouette InstaLift® is a 45-minute dual-action cosmetic rejuvenation device that restores your younger appearance by:

- Immediately lifting sagging, aging skin in the mid-face area
- Gradually restoring volume and repositioning skin by stimulating new collagen production

2. What are the results of Silhouette InstaLift® ?

Changes in the shape and appearance of the face happen gradually over time. These changes occur as skin strength and elasticity decrease with age, as well as due to the gradual loss of fat, bone, and cartilage. Silhouette InstaLift® is a minimally invasive cosmetic rejuvenation device that provides an instant lift to aging skin in the mid-face area and restores lost facial volume by stimulating collagen production for a more youthful appearance that continues to improve over time and lasts up to 2 years.

3. How does Silhouette InstaLift® work?

Silhouette InstaLift® uses the latest micro-suspension technology (MST), to lift the mid-face area while simultaneously activating the creation of natural collagen to boost volume.

4. What are Silhouette InstaLift® sutures made of?

Silhouette InstaLift® is made from a well-known polymer that is frequently used in medical devices and is well tolerated by the body.

5. Who might be interested in Silhouette InstaLift® ?

Those looking for a quick, minimally invasive option to restore their mid-face's youthful lift and volume without fillers may be interested in Silhouette InstaLift®.

6. How is the Silhouette InstaLift® procedure performed? How long does the procedure take?

Before the treatment begins, your practitioner explains where the micro-suspension technology (MST) i.e. "threads" will be placed and temporarily marks your face with a pen. Then a local anesthetic is provided. The entire procedure takes approximately 45-60 minutes.

7. Is the procedure painful?

Silhouette InstaLift® is a quick, minimally invasive way to restore your youthful appearance with minimal discomfort. A local anesthetic is provided.

8. How much downtime is needed following the procedure?

Following treatment with Silhouette InstaLift®, patients may experience minor pain, swelling, and bruising. Recovery time is minimal, with most patients returning to normal activities within 2-4 days.

9. How is Silhouette InstaLift® different from Thread Lifts?

Silhouette InstaLift® uses a unique micro-suspension technology (MST) to lift the mid-face while simultaneously activating the creation of natural collagen to boost volume.

10. Is general anesthesia required?

No. A local anesthetic is all that is required.

RESULTS

11. What results can I expect with Silhouette InstaLift® ?

Silhouette InstaLift® delivers an immediate lift and gradually restores lost facial volume in the mid-face area by triggering your own natural collagen production for a more youthful appearance that continues to improve over time and lasts up to 2 years.

12. How long do the results last?

Silhouette InstaLift® instantly lifts aging skin and improves facial volume for a youthful appearance in the mid-face area that continues to improve over time and lasts up to 2 years.

SAFETY

13. Is the procedure safe?

Silhouette InstaLift® threads are the only dissolvable, dual-action devices cleared by Health Canada and the U.S. Food and Drug Administration for threadlifting.

14. What are the side effects associated with Silhouette InstaLift® ?

After the procedure there may be some minor pain, swelling, and bruising. Silhouette InstaLift® is technique- sensitive, so you should speak with the practitioner to see if you are the type of person best suited to receive the treatment based on skin type, age, facial structure and medical history.

PRICING

15. How much does Silhouette InstaLift® cost?

The number of threads recommended for your lift will depend on the areas that you want to cover and the degree of lifting you require. The cost per thread is \$600, and typically patients require 2-3 threads per side.

16. Does insurance cover the procedure?

Silhouette InstaLift® is a cosmetic treatment so insurance does not cover the procedure. Clients may be interested in financial support through MediCard Canada. Mediacard provides patient financing for elective medical procedures (1 888-689-9876

The Silhouette InstaLift® device is indicated for use in mid-face suspension surgery to temporarily fixate the cheek sub dermis in an elevated position.

Important Safety Consideration

Patients should not receive the Silhouette InstaLift® procedure if they have a known allergy or foreign body sensitivities to plastic biomaterial or if an infection is present.

Following treatment with Silhouette InstaLift®, patients may experience minor pain, swelling and bruising. Other side effects may include sensory nerve injury, asymmetry, or banding. Individual results may vary.
