- Ask about combination rejuvenation packages*
- Consultation Fee** \$50/half hour  
\* Consultation fees are deducted from the price of the first treatment
- Cancellation Fee**  
No show / less than 24 hrs notice \$50

<sup>ap</sup>Prices subject to change without notice

**Platelet Rich Plasma (PRP)**

PRP therapy has been used for various medical procedures for well over 20 years. There have been many studies done on this therapy for wound healing and sports injuries. Its use in medical esthetics and dermatology is now expanding. More studies specifically for PRP in esthetics are forthcoming. Evidence at this time is mostly based on clinical outcomes and expert opinion. Nonetheless, PRP treatment has already been shown to work as a catalyst, enhancing production of both stem cells and fibroblasts.

**PRP Applications in Esthetics**

PRP is especially used for conditions like facial and neck rejuvenation, fine lines and wrinkles, abdominal striae and facial scarring, and alopecia (hair loss) / hair thinning.

**PRP Applications - Medical**

PRP treatment is done to stimulate healing which involves injection of one's own growth factors into injured areas.

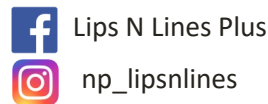

Uses for PRP in musculoskeletal medicine include treatment of tendonopathy, tendonosis, acute and chronic muscle strain, ligament sprains and intra-articular injuries and joint pain such as osteoarthritis and knee meniscus damage.

Medicaid provides quick and easy financing options for elective medical procedures. No down payment. 1-888-689-9876

Retailer

**Gift Cards Available**

## Cosmetic injections

### Botulinum Toxin A / Neuromodulators

How much do you know about “botox” treatments? Have you ever wondered what else “botox” may be able to do for you?

- ⇒ Frown lines and forehead lines
- ⇒ Crows feet & Bunny lines
- ⇒ Gummy smile correction
- ⇒ Marionette lines (often in conjunction with filler)
- ⇒ Vertical lip lines / Smoker’s lines
- ⇒ Down-turned smile
- ⇒ Dimpled chin
- ⇒ Neck bands / Décolleté

### Medical Esthetic Applications

- ⇒ Migraines
- ⇒ Bruxism (teeth grinding)
- ⇒ Hyperhidrosis (Excessive sweating)

### Dermal Fillers (Hyaluronic Acid & Calcium Hydroxylapatite)

Dermal fillers help to diminish facial lines and restore volume and fullness in the face.

As we age, our faces naturally lose subcutaneous fat. The facial muscles are then working closer to the skin surface, so smile lines and crow’s feet become more apparent.

The facial skin also stretches a bit, adding to this loss of facial volume. Other factors that affect the facial skin include sun exposure, heredity and lifestyle.

### What dermal fillers can do?

- Plump thin lips
- Enhance shallow contours
- Soften facial creases and wrinkles
- Improve the appearance of recessed scars
- Reconstruct contour deformities in the face
- Decrease or remove the shadow of the lower lids

## Morpheus8

### What is Morpheus8?

It is a fractional skin treatment that stimulates collagen production of the underlying layers of the dermis (skin). By targeting the deeper layers of the skin, the building blocks will reorganize themselves in a natural anti-aging process.

### What areas can be treated?

Morpheus8 can be used on any areas that can benefit from sub-dermal renewal. The most commonly treated areas include the lower face and neck. Areas of the face and body that exhibit wrinkles, discoloration or acne scarring are suitable for treatment.

### How many treatments will I need?

Depending on your Morpheus8 treatment regime, you can expect to have between 1-3 sessions.

### How quickly will I see results?

Visible results can be seen within a few days and continue to improve over the next few weeks.

### Can anyone use Morpheus8?

Morpheus8 has colour blind technology, making it safe for all skin types.

*Contact us for further information on the scientific benefits of Fractional RF energy with Morpheus8 treatments.*

## SkinPen® Microneedling

Microneedling is also referred to as collagen induction therapy. As we age, we experience a loss in collagen and elastin resulting in wrinkles, thinning skin, and increased risk from sun damage.

The SkinPen® sets the gold standard as a medical grade microneedling device used to treat melasma, acne scars and surgical scars. It is also used to improve fine lines and wrinkles, stretch marks, hyperpigmentation, age spots, and hair loss.

The treatment can be combined with SkinPen Treatment kit and other treatments such as PRP and hyaluronic acid fillers for enhanced results.

## Microdermabrasion

Microdermabrasion is the “polishing” of the skin, specifically the stratum corneum and granulosum. The process involves abrading the skin with a diamond encrusted tip, that is attached to a wand, which acts like a vacuum, removing all the dead skin, congestion from pores, and stimulates elastin and collagen back into the skin, helping to tighten the skin and reduce the appearance of fine lines and wrinkles.

### Benefits from regular treatments include:

- Reduction in the appearance of fine lines & wrinkles
- Reduction of acne scars
- Evens colour & complexion of the skin
- Skin will look rejuvenated—more smooth & firm
- Pores will be less noticeable
- More even skin tone

## Facial / Chemical Peels

A chemical facial peel is one strategy to help improve the appearance of the skin. A medical-grade chemical solution is applied to the skin that causes it to exfoliate and eventually peel off resulting in renewal of the skin that is smoother and less wrinkled.

### Benefits from regular treatments include:

- Reduction in the appearance of fine lines under the eyes and around the mouth
- Treat wrinkles as a result of sun damage and aging
- Improves the appearance of mild scars and certain types of acne
- Reduce age spots, freckles, and dark patches (melasma) due to pregnancy or taking birth control pills
- Enhances the stimulation of collagen production which promotes plumper, younger looking skin.
- Skin will look and feel rejuvenated—more smooth & firm
