Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You must **show all your working**.
- Diagrams are **NOT** accurately drawn, unless otherwise indicated.
- **Calculators may not be used.**

Information

- The total mark for this paper is 80
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

14 Gavin, Harry and Isabel each earn the same monthly salary.

Each month,

Gavin saves 28% of his salary and spends the rest of his salary

Harry spends $\frac{3}{4}$ of his salary and saves the rest of his salary

the amount of salary Isabel saves: the amount of salary she spends = 3:7

Work out who saves the most of their salary each month.

You must show how you get your answer.

Q. We need to convert how much saved to percentages

Gavin \rightarrow 28% this is already done

Harry \rightarrow $\frac{3}{4}$ we know this is 75% saves 25%

Isabel \rightarrow 3:7 now we need to split 100% into the
 $\times 10$ $\downarrow \times 10$ ratio 3:7 = 10 $100\% / 10 = 10\%$
 30:70 saves 30%

30% > 28% > 25%

\therefore Isabel
saves the most
