

A SCIENTIFIC BREAKTHROUGH

INEXPENSIVE MASS GREEN HYDROGEN PRODUCTION FROM WATER
WITH ADVANCED ENGINE TECHNOLOGY

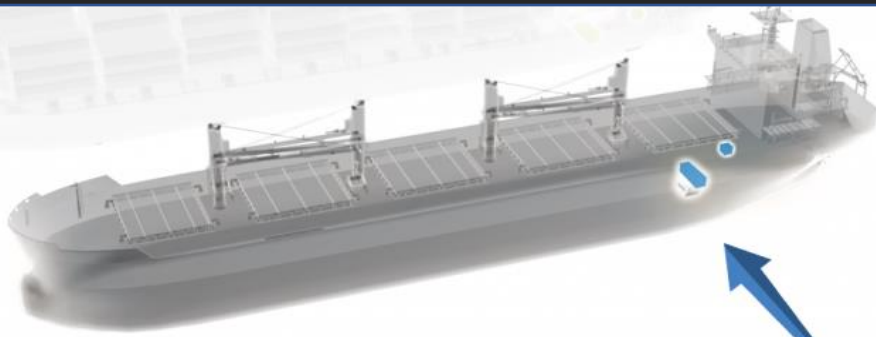

NO FOSSIL FUELS

WWW.BLUEHARTVENTEGY.COM - INFO@BLUEHARTVENTEGY.COM

GREEN ENERGY – HYDROGEN POWERED

NO FOSSIL FUELS = NO EMISSIONS & NO FUEL COSTS

- **Mass Hydrogen Production On-Demand**
- **Nearly Unlimited Range & Endurance**
- **Scalable to over 100 MW**
- **Small footprint and low staffing requirements**

Proprietary technology utilizing thermoplasma, neodymium magnets and radio frequencies to generate high volumes of Hydrogen on demand.

Paired with advanced engine technology and desalination, this system creates the ultimate 'green' power package for any marine vessel – essentially turning the vessels fuel tank into the water its floating in.
