POS Notify
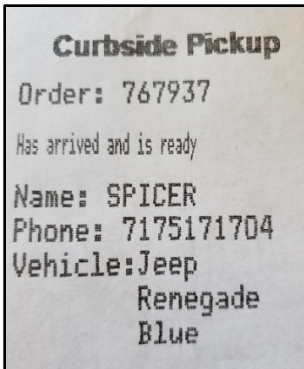

POS Notify is a software that is integrated with FuturePOS point of sale. It is used for notification of curbside and pickup orders at a location.

- BY USING POS Notify, *it alerts you that your curbside or counter pickup patrons are waiting for their food.*
- INCREASES YOUR REVENUE *by freeing up phone lines. Customer no longer has to call in to let you know they have arrived thus allowing you to take additional phone orders.*
- REDUCES LABOR COST *by freeing up your employees. They no longer need to figure out where your customer is located.*
- CURBSIDE & COUNTER PICKUP *allows for social distancing.*

## Curbside

- Wouldn't it be great to be able to know when your customer is out in the parking lot waiting for their food?
- Do you have parents who don't want to get out of the vehicle with their kids just to pickup food?
- Look at what we can do for you! See that picture to the left? We can print that in your location.

Order Notify

- How would you like to allow for social distancing during the COVID-19 crisis?
- How would you like to prevent customers from crowding around your counter waiting for their pickup order?
- Do you hate having to shout out a customer name or order number repeatedly to have them pickup their order?

Table Notify

- Allows you to enter a customer phone number and alert them when their table is ready to be seated via a text message.
- Do away with expensive pagers that get lost
- Avoid overcrowding in your waiting area
