

POS NOTIFY FEATURING QR PAY

POS NOTIFY WITH QR PAY

- ✦ What is QR Pay? Allows customers to pay their bill by scanning a unique code with their smartphone and completing the transaction through their phone.
- ✦ POS Notify has taken this technology a step further to allow customer to not only pay via their phone but to also notify the restaurant that they have arrived for their order AND that it has been paid.
- ✦ Offers an easy and affordable way to offer contactless payments for your customers.
- ✦ It is simple to send them a text to notify them that their order is ready for pickup and to allow them to easily pay before they arrive to pickup their order.
- ✦ You can go to <https://posnotify.com/qr-pay> to see a demo of the product!

Employee Messaging

Your Server is SOS
Scan to send a message

Your Table: B1

This is printed out of the receipt printer
and can be placed at the table so the
customer can scan the QR Code and
send a message to the employee

Employee Messaging

- ✦ Gives the customer the availability to text your employee or manager that they need assistance at their table
- ✦ As a customer have you ever been to a restaurant where you just wanted your check or drink refill?
- ✦ Allows you to flip tables faster by getting the customers needs met.
- ✦ Keep customers coming back knowing the service is top notch!
