

Globalist Agenda and State Sovereignty

IF WE LOOK AT THE POLICIES SNEAKING INTO OUR STATE "BIDEN'S CLIMATE ACTION PLAN" "BIDEN'S SAFER COMMUNITY ACT" "ONE HEALTH" "NACS" "SCHOOL VOUCHERS" THEY ALL HAVE ONE THING IN COMMON. THEY ARE ALL A PART OF THE UN SUSTAINABLE DEVELOPMENT AGENDA WHICH IS THE GUIDE-BOOK FOR GLOBAL GOVERNANCE, FOR ONE WORLD GOVERNMENT, FOR "YOU WILL OWN NOTHING AND BE HAPPY"

ONE OF MY FAVORITE LEGISLATORS SAID, HOW CAN WE FIGHT THE EXECUTIVE BRANCH OF GOVERNMENT AS A LOT OF THESE PLANS ARE COMING IN THROUGH THE GOVERNOR AND HIS AGENCIES AND THEY ARE COMING INTO THE CITIES DIRECT. HOW DO WE PROTECT STATE AND INDIVIDUAL SOVEREIGNTY?

FIRST LET'S UNDERSTAND THESE GOALS SO WE CAN RECOGNIZE THEM IN POLICY

SUSTAINABLE DEVELOPMENT GOALS

17 GOALS TO TRANSFORM OUR WORLD

Heads of State and Government and High Representatives, met at the United Nations Headquarters in New York September 2015 as the Organization celebrated its seventieth anniversary, to discuss global Sustainable Development Goals.

The 17 Sustainable Development Goals claim to be about bettering the human condition.

<https://sdgs.un.org/goals>

We are committed to achieving sustainable development in its three dimensions – economic, social and environmental. We resolve, between now and 2030, to end poverty and hunger everywhere; to combat inequalities within and among countries; to build peaceful, just and inclusive societies; to protect human rights and promote gender equality and the empowerment of women and girls; and to ensure the lasting protection of the planet and its natural resources. We resolve also to create conditions for sustainable, inclusive and sustained economic growth, shared prosperity and decent work for all, taking into account different levels of national development and capacities.

As we embark on this great collective journey, we pledge that no one will be left behind. Recognizing that the dignity of the human person is fundamental, we wish to see the Goals and targets met for all nations and peoples and for all segments of society. And we will endeavor to reach the furthest behind first.

THE UN, UNICEF, UNESCO, FAO GAVI, WHO and other orgs share in the 17 SDGs with slightly different spins. GAVI is vaccine focused. UNICEF is child focused. UNESCO education and science and culture. FAO is food and agriculture. They are all focused on removing your rights and going towards global governance.

UNESCO and Sustainable Development Goals

At its heart are the 17 Sustainable Development Goals (SDGs), which are an urgent call for action by all countries - developed and developing - in a global ...

What is the governing ideology? UNESCO 1946 Julian Huxley

So much for what Unesco cannot or should not adopt in the way of philosophies or guiding principle. Now for the positive side. Its main concern is with peace and security and with human welfare, in so far as they can be subserved by the educational and scientific and cultural relations of the peoples of the world. Accordingly its outlook must, it seems, be based on some form of humanism. Further, that humanism must clearly be a world humanism, both in the sense of seeking to bring in all the peoples of the world, and of treating all peoples and all individuals within each people as equals in terms of human dignity, mutual respect, and educational opportunity. It must also be a scientific humanism, in the sense that

One Ideology:
Scientific Humanism

One Religion
One Government

Two obvious corollaries follow. First, that the more united man's tradition becomes, the more rapid will be the possibility of progress: several separate or competing or even mutually hostile pools of tradition cannot possibly be so efficient as a single pool common to all mankind. And secondly, that the best and only certain way of securing this will be through political unification. As history shows, unifying ideas *can* exert an effect across national boundaries. But, as history makes equally evident, that effect is a partial one and never wholly offsets the opportunities for conflict provided by the existence of separate sovereign political units.

deal towards promoting peace and security. Specifically, in its educational programme it can stress the ultimate need for world political unity and familiarise all peoples with the implications of the transfer of full sovereignty from separate nations to a world organi-

Unesco also can and should promote the growth of international contacts, international organisations, and actual international achievements, which will offer increasing resistance to the forces making for division and conflict. In particular, it can both on its own account and in close relation with other U.N. agencies such as the F.A.O. and the World Health Organisation, promote the international application of science to human welfare. As the benefits of such world-scale collaboration become plain (which will speedily be the case in relation to the food and health of mankind) it will become increasingly more difficult for any nation to destroy them by resorting to isolationism or to war.

Accomplished through these organizations

The WHO and The UN

“Where the WHO (World Health Organization), an unelected unaccountable non-governmental organization trying to steal authority top down through the Federal government the UN purports to steal authority bottom up through local government. The UN calls their plan “a global plan implemented locally.” Both plans are equally nefarious as they look to usurp decentralized authority and replace it with one world authority.”

Two Opposing Worldviews

Humanism	Biblical
A man-engineered utopian worldview. There is no real meaning to life. The end justifies the means.	A Christ-centered worldview Jesus Christ gives real meaning to life. The means determines the end.
Man is Supreme Needs More Information to Progress	God is Supreme Needs Obedience to His Way to Thrive
Population Control	Be fruitful and multiply
An unsound structure built on an unstable foundation (A false view that is satanically influenced. Eph. 2:2-3)	A solid structure built on a firm foundation (A true view based on God's inspired Word. II Tim. 3:16-17)

Let Unesco have a clear mind on this subject. Quantity is of importance—but as a means, a foundation for quality. It is true that one could not carry on a high modern civilisation in a population the size of a bushman tribe, any more than life could evolve the mental powers of a higher mammal in an organism the size of an amoeba. There is, however, an optimum range of size

that eugenics should be brought entirely within the borders of science, for, as already indicated, in the not very remote future the problem of improving the average quality of human beings is likely to become urgent ; and this can only be accomplished by applying the findings of a truly scientific eugenics.

application of medical science may increase the number of human beings in a given area but lower their quality or their opportunities for enjoyment of life : and if so, in the light of our basic criterion of evolutionary direction, it is wrong. We are brought by a new route to realise once more the need for a Unesco policy balanced between many fields—in this instance, Unesco policy would have to include, besides the application of medical science, studies on agricultural productivity (soil erosion, mechanisation, etc.) and on social welfare, and also the provision of birth-control facilities.

“Violence is not necessary to destroy a civilization.
Each civilization dies from indifference toward the
unique values which created it.”

— Nicolás Gómez Dávila

Our Government Built on God-given Rights

- Government to protect equal God-given rights not provide equal things
- UN acknowledges that not all men are equal in gifts and they look to address this biological inequality with science – Julian Huxley Transhumanism
- Absolute Power Corrupts Absolutely our Government was Decentralized so no men can rule as Kings
- Our government is built on individual rights what they are talking about is collectivism, giving up rights for the perceived betterment of society, however individuals without rights is a collective without rights and that isn't better

Biological inequality is, of course, the bedrock fact on which all of eugenics is predicated. But it is not usually realised that the two types of inequality have quite different and indeed contrary eugenic implications. The inequality of mere difference is desirable, and the preservation of human variety should be one of the two primary aims of eugenics. But the inequality of level or standard is undesirable, and the other primary aim of eugenics should be the raising of the mean level of all desirable qualities. While there may be dispute over certain qualities, there can be none over a number of the most important, such as a healthy constitution, a high innate general intelligence, or a special aptitude such as that for mathematics or music.

Sarah McCammon

UN AGENDA REAL GOALS

- This meme is a quick snap shot of what the goals say they are, versus what we know them to mean from UN policy history and UN documents
- There is more to elaborate on each of these SDG which we will attempt to do on the upcoming slides

8 steps to communism

- Many of the SDGs align with the 8 steps to transform a nation through socialism into communism.
- 1. Healthcare – control healthcare and you control the people.
- 2. Poverty – Increase the poverty level as high as possible, poor people are easier to control and will not fight back if you provide everything for them to live.
- 3. Debt – Increase the debt level to an unsustainable level. That way you are able to increase taxes and this will produce more poverty.
- 4. Gun control – Remove the ability to defend themselves from government. That way you are able to create a police state.
- 5. Welfare – Take control of every aspect (food, housing, income) of their lives because that will make them fully dependent on the government.
- 6. Education – Take control of what people read and listen to and take control or what children learn in school.
- 7. Religion – Remove belief in God from the government and schools because the people need to believe in only the government knowing what is best for the people. Government over God instead of God over government.
- 8. Class warfare – Divide the people into the wealthy and the poor. Or gender divisions or race divisions. Eliminate the middle class. Neo-Marxism.

Article 1 Section 8 US Constitution Binds Congress

- 18 enumerated powers things like the post office, interstate commerce meaning products not people, military, punish felonies on the high seas etc.
- If not listed in Article 1 Section 8 defers to 9th and 10th the people and states
- ABC agencies have wrongly stolen jurisdiction over health and education
- Misinterpret the Supremacy clause to mean all federal laws are supreme
- We should not be looking to a King to fix these issues, the executive branch of federal government because that means they can break it
- A goal should be to put the federal government back in their box
- The UN agenda is the opposite it usurps individual, state, national sovereignty in exchange for global governance

Article VI, Clause 2:

This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the Contrary notwithstanding.

Goal 1: End Poverty in All It's Forms

They say“ By 2030, ensure that all men and women, in particular the poor and the vulnerable, have equal rights to economic resources, as well as access to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including microfinance”

Conservatives realize that poverty is apart of the human condition. There is no way to eliminate it. Only lessen it. You can't force people to work and have a sharing economy without full elimination of freedom and private property rights.

The result is 2 in the steps to communism. Put everyone on welfare, food stamps to ration food, housing subsidies, make everyone dependent and easy to control. It is easier to lower standards than to raise them. When everyone lives at poverty level they are all “equal.” Creating a welfare state is step 5 of the 8 steps to communism.

When the UN says equal ownership and control over the land and forms of property historically that has meant wealth redistribution. North Korea did landowner campaigns claiming greedy landowners were the problem. It resulted in the murder of landowners and the distribution of their land. To this day in North Korea landowners and ancestors of them are punished while communists are revered.

In CA this meant reparations from people who were never slave owners to people who were never slaves.

This is a global plan not a national one so it doesn't seek just to redistribute wealth nationally but also globally. The UN calls it “global welfare” And they use climate change as the excuse for it. “Inclusive climate policies in the form of international aid, bioenergy taxes, or domestic revenue reallocation can avert the overall cost of addressing climate change in terms of global welfare (a 3.7% loss) and rather result in a 0.1% gain, at the expense of 0.5% decrease in GDP”

Biden's Climate Action Plan

A GUIDEBOOK TO THE INFLATION REDUCTION ACT'S INVESTMENTS IN CLEAN ENERGY AND CLIMATE ACTION

CLEANENERGY.GOV

JANUARY 2023, VERSION 2

Executive Summary

On August 16, 2022, President Biden signed the Inflation Reduction Act into law, marking the most significant action Congress has taken on clean energy and climate change in the nation's history. With the stroke of his pen, the President redefined American leadership in confronting the existential threat of the climate crisis and set forth a new era of American innovation and ingenuity to lower consumer costs and drive the global clean energy economy forward.

The Inflation Reduction Act is aimed squarely at building a better America and delivering on President Biden's vision to make sure the United States—powered by American workers—remains the global leader in clean energy technology, manufacturing, and innovation. The Inflation Reduction Act's \$370 billion in investments will lower energy costs for families and small businesses, accelerate private investment in clean energy solutions in every sector of the economy and every corner of the country, strengthen supply chains for everything from critical minerals to efficient electric appliances, and create good-paying jobs and new economic opportunities for workers.

In keeping with the Biden-Harris Administration's commitment to working families, equity, and environmental justice, the Inflation Reduction Act prioritizes creating shared prosperity, making the nation more resilient to growing threats to health and well-being, and driving critical economic investments to historically underserved communities, particularly those living with legacy pollution. For several of the clean energy tax incentives, for example, the law offers bonus credits for projects that are located in economically distressed communities or traditional energy communities and for projects that meet requirements to pay the prevailing wage and hire qualified registered apprentices. The law also will advance the President's Justice40 Initiative, which commits to delivering 40 percent of the overall benefits of climate, clean energy, and related federal investments to communities that are marginalized, overburdened by pollution, and underserved by infrastructure and other basic services. Further, through an all-of-government effort, the Administration will work to ensure that investments under the Inflation Reduction Act facilitate state and local contracting opportunities for underserved small businesses.

The Inflation Reduction Act builds on the foundational climate and clean energy actions taken by the Biden-Harris Administration and investments that President Biden secured in his Bipartisan Infrastructure Law (or Infrastructure Investment and Jobs Act), signed in November of 2021. Historic in its own right, the Bipartisan Infrastructure Law provided billions of dollars to modernize the electricity grid, build a nationwide network of electric vehicle chargers, strengthen the battery supply chain, expand public transit and passenger rail, invest in new clean energy and emissions reduction technologies, improve resilience in physical and natural systems, and clean up legacy pollution in communities across the country—all while creating new, high-quality jobs, including union jobs, with good benefits and supportive services that build pathways for all to the middle class.

The Biden-Harris Administration is showing that American spirit and enterprise can alter the course of history and make people's lives better in pursuit of ambitious goals. In his first days on the job, President Biden set forth a bold climate agenda and has since vigorously advanced

“Since this is an era when many people are concerned about 'fairness' and 'social justice,' what is your 'fair share' of what someone else has worked for?” — Thomas Sowell

Goal 2. End hunger, achieve food security and improved nutrition and promote sustainable agriculture

- What the UN Says “promote access to and fair and equitable sharing of benefits arising from the utilization of genetic resources and associated traditional knowledge, as internationally agreed
What is hunger? Is it two meals a day? 1? It is important to define.
- Again when saying shared they mean “redistribution and control” In the Soviet Union under collectivization the peasantry were forced to give up their individual farms and join large collective farms. This led to millions starving to death.
- Free-market and our form of capitalist society work through decentralized controls and answering consumer concern and demand. Collectivization obliterates competition, regulates to death, and centralizes controls, resulting in shortages.
- When they say technology, genetic resources and sustainable they mean genetically modified, printed, lab-made, human-engineered food instead of natural organic God-made food. Somehow they claim lab-made is more green than a pasture. And neglect the implications of removing cows from an eco-system, claiming their flatulence ruins the ozone despite it being part of the ecosystem.
- Genetically modified food, just like genetically modified anything, comes with negative implications. Not as nutritious. Pesticides used. MRNA vaccinated with no testing for mutagenic effects.

Florida Bans Printed Meat

FLORIDA

Florida banned 'fake meat.' This company is suing to serve it at an arts festival.

Florida Gov. Ron DeSantis signed the ban on lab-grown meat into law earlier this year.

Chef Mika Leon cooks cultivated chicken at a pop-up tasting for "lab-grown" meat produced by California-based UPSIDE Foods on June 27, 2024, in Miami. Florida's ban on "fake meat" went into effect days after this

SPRINGDALE, Ark. – Oct. 17, 2023 – Tyson Foods, Inc. (NYSE: TSN), one of the world's largest food companies, has reached an agreement for a two-fold investment with Protix, the leading global insect ingredients company. The strategic investment will support the growth of the emerging insect ingredient industry and expand the use of insect ingredient solutions to create more efficient sustainable proteins and lipids for use in the global food system. The agreement combines Tyson Foods' global scale, experience and network with Protix's technology and market leadership to meet current market demand and scale production of insect ingredients.

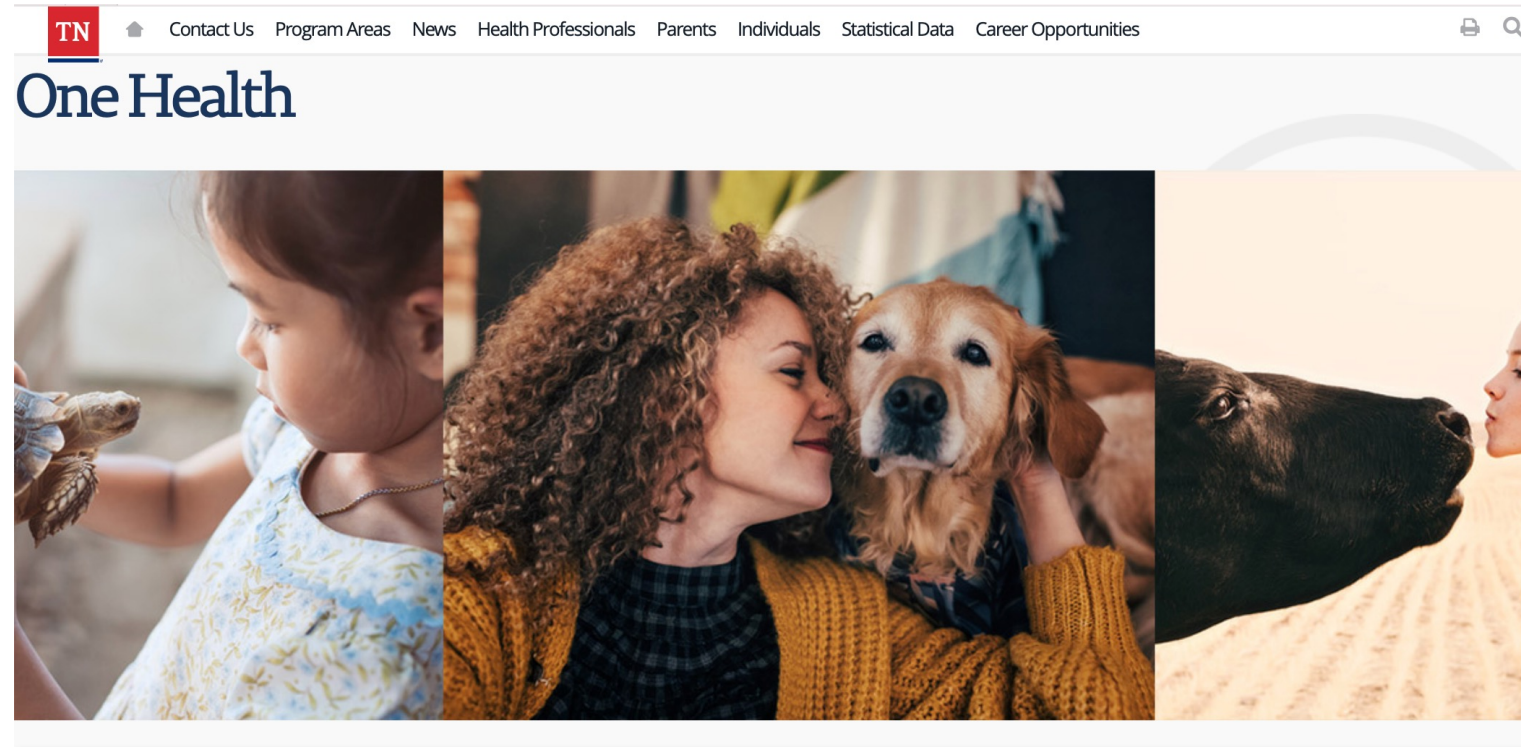

Through a direct equity investment, Tyson Foods will acquire a minority stake in Protix to help fund its global expansion. In addition, Tyson Foods and Protix have entered a joint venture for the operation and construction of an insect ingredient facility in the continental United States. Upon completion, it will be the

Goal 3. Ensure healthy lives and promote well-being for all at all ages

- What the UN Says “global response to global health risks, prevent deaths from air pollution, vaccines and medicine access for everyone, universal healthcare, reduce car accidents, prevention and treatment, mental health
- During COVID UN and WHO rather than discussing addressing metabolic disorders like obesity which led to worse health outcomes, the answer to health was lockdowns, don't see your loved ones, wear a mask to the table then take it off to eat, mandated vaccines and masks, compliance or job loss, punishing Doctors who disagreed with the narrative, punished Doctors for early treatment, resulting in increases of drug use, suicide and depression
- It meant infringements on rights to move about freely, to your ability to work to provide for your family, it eroded God-given rights as government branches worked outside of their delegated authority
- When they say universal healthcare it is socialism and control. Their One Health initiative equates humans to the same value of plants and animals. Disposable. It is a humanist worldview rather than a Biblical one where man is made in God's image.
- What they mean by vaccine and medicine access is Pharma's access to you via mandates and forced compliance. What they mean by prevention is vaccination. Push 100+ on children and heavily medicate them. What they mean by mental health is profiling and control. What they mean by global response is ignoring state and individual sovereignty What they mean by prevent deaths from air pollution is net zero agenda and carbon credits
- Ultimately people have the right to govern themselves, if they want to eat bacon they can eat bacon, when an NGO is saying they will make you healthy, you no longer have freedom

One Health in Tennessee

One Health is the collaborative effort of multiple disciplines to attain optimal health for people, animals, and the environment. The One Health concept arose from the realization that human, animal, and environmental health are inextricably linked and that a holistic approach is needed to understand, protect, and promote the health of all species.

One Health seeks to improve communication and encourage collaboration between veterinarians, physicians, environmental scientists, public health professionals, and others to find multidisciplinary solutions to shared challenges such as emerging infectious diseases, antibiotic resistance, and emergency preparedness.

For more information about One Health and One Health initiatives in Tennessee, please contact One.Health@tn.gov.

Goal 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

- What the UN Says “ By 2030, ensure that all learners acquire the knowledge and skills needed to promote sustainable development, including, among others, through education for sustainable development and sustainable lifestyles, human rights, gender equality, promotion of a culture of peace and non-violence, global citizenship and appreciation of cultural diversity and of culture’s contribution to sustainable development”
- What they mean is quality indoctrination into their Marxist/humanist ideology where man is the problem and the solution is fewer of us which is the opposite to a biblical worldview that says “be fruitful and multiply.” They say there are many genders. Biblical worldview says there are men and women. They say people are the plague. God says we are made in His image. God says we are to have dominion over the Earth. They say we are the problem on Earth. When they say “sustainable lifestyles” they mean family planning, abortion, sterilizations, promoting trans gender surgeries that render children sterile, and promoting non-traditional lifestyles that won’t be having children. What they mean by global citizenship is rejecting state sovereignty and decentralized government in favor of centralized global power.
- They look to teach a false history and dumb down the education system to provide “workers not thinkers” like Rockefeller wanted
- School vouchers is an equity program and helps accomplish this goal as now there will be no choices outside of government regulated, and we know that they plan on adding testing to retain vouchers which means teaching to tests, it is how they get their foot in the door. And even Republicans have said this is an equity initiative I use the post office as an example. It is those who are over the post office saying everyone deserves equitable education and so they publicly fund Fed ex and now they have the same regulatory burden and culture

UNESCO and School Choice

Chapter 4

UNESCO's Vision for School Choice

How They Plan to Use Backpack Funding Bills & Government Regulations to Ensure "Equity" in Private Choice Options

Lisa Logan
Jul 21, 2022

Proponents of legislation that make public education funds available for use in the private education sector have incredible marketing slogans. "Fund students not systems" they say. The accompanying mantra that parents should be able to "take the money that belongs to them" and "choose what education is best for their child" offers hope to droves of desperate parents looking for an easy exit to an incompetent system that seems hell-bent on indoctrinating their kids. Unfortunately, those same proponents who are very vocal when it comes to the supposed benefits of ESAs and vouchers are eerily silent when it comes to being honest about the strings attached to public money and how it could be used to bring regulation into private and homeschools.

One entity who is very transparent about the strings attached to government money is UNESCO, the United Nations Educational Scientific and Cultural Organization, who's been charged with seeing the U.N.'s Sustainable Development Goal (SDG) 4 (Quality and Inclusive Education for All) through to completion by 2030.¹² This subject was addressed in a background paper¹³ commissioned for their Global Education Monitoring (GEM) Report that was highlighted in the article The Strings of School Choice.¹⁴ In it, the authors lay out how public money funding private schools through school choice (and the public regulation that comes with it) can be utilized "as the main policy option to tackle education inequalities resulting from private actors' involvement in the provision of education." The paper states that the regulation of evaluation

¹² <https://www.unesco.org/sdg4education2030/en/sdg4>

¹³ https://www.researchgate.net/publication/356915329_Regulating_Public-Private_Partnerships_governing_non-state_schools_An_equality_perspective

¹⁴ <https://lialogan.substack.com/p/the-strings-of-school-choice?sd=pf>

(assessments) and accountability frameworks "play a strategic role in promoting that all publicly-funded schools, independently of their ownership, are correctly aligned with quality standards and also with the equity goals and objectives set by the government." It then describes just some of the "equity"¹⁵-oriented regulatory strategies that can be enforced in the private education sector:

Table 6. Equity-oriented PPP regulatory strategies

Dimension of regulation	Policy options
Authorization of providers	<ul style="list-style-type: none">- Incorporation of <i>education planning criteria</i> in the authorization of new private providers (considerations relative to their effect on public schools; enrollment patterns or the volume or diversity of existing school supply).- Use of <i>bidding processes</i> to select among private providers seeking to access public funding.- Establishment of more <i>discriminating screening processes</i> or eligibility criteria.
Funding	<ul style="list-style-type: none">- <i>Prohibition of tuition fees</i> and other parental contributions (paralleled by an increase in public funding) or adoption of <i>tuition caps</i>.- Use of <i>sliding scales</i> (public funding inversely proportional to school fees).- Use of <i>need-based funding criteria</i> accounting for student characteristics and the schools' social composition.
School choice and admissions	<ul style="list-style-type: none">- <i>Centralization and control of the school choice and admissions procedures</i> (common priority criteria for public and private subsidized schools, calendars and procedures).
	<ul style="list-style-type: none">- <i>Prohibition of selective admissions</i>.- <i>Provision of priority access for disadvantaged students</i> (quotas or specific priority criteria).
Autonomy, evaluation and accountability	<ul style="list-style-type: none">- <i>Integration of private subsidized schools into the monitoring and evaluation framework in place for the public sector</i>.- <i>Development of additional and more demanding accountability schemes</i> for private subsidized providers.- <i>Creation of accountability systems specific to private subsidized providers</i> and establishment of dedicated monitoring agencies.
Workforce	<ul style="list-style-type: none">- <i>Harmonization of teachers' qualification requirements</i> and licensing procedures across the public and the private sector.- <i>Equalization of teachers' salary scales and working conditions</i> for public and private subsidized schools.

¹⁵ <https://www.discovery.org/education/2021/07/28/equity-in-education-equal-opportunity-or-equal-outcome/>

“Education is thus a most power ally of humanism, and every public school is a school of humanism. What can the theistic Sunday school, meeting for an hour once a week, and teaching only a fraction of the children, do to stem the tide of a five-day program of humanistic teachings?”

Charles Francis Potter

Julian Huxley, John Dewey, Albert Einstein, Thomas Mann and Charles Francis Potter were on the First Humanist Society of New York. Together with Dewey, Potter was one of the original 34 signers of the first Humanist Manifesto. And they were also the authors of our modern education system. When they took the Bible out of schools in the 1960s we let the humanists have their way of government over God instead of God over government. How can we have a country built on God-given rights when God is being educated out of it?

Goal 5. Achieve gender equality and empower all women and girls

- The feminist movement was a way to destabilize the traditional family. Telling women that empowerment meant working out of the home meant they weren't raising their families with traditional values. They were allowing government schools to indoctrinate them. The women of the workplace movement also told women empowerment meant having multiple sexual partners which results in an increase in sexually transmitted diseases which can also lead to infertility. Or putting off marriage and potentially children.
- Now Gender Equality also means trans equality. And that also leads to sterility when young people choose to chop off their body parts and take chemical castration medications. It is profitable to Pharma as they are now dependent on hormones. It is profitable to Big Health as they now get top and bottom surgeries. And it contributes to population decreases to achieve “sustainable population goals”
- In here they also address redistribution based off of gender. It is Marxism and class redistribution was classically used. But now we have gender, race and sexuality being called the oppressed/oppressor. Where governments used the “oppressed” to overthrow the “oppressor” walking in non-repressive order, which is communism, everyone equally oppressed
- They mean to criminalize Christianity, marginalizing heterosexuality claiming it is discriminatory
- Feminize energy and demonize males as toxic so they won't fight back

UNICEF

- <https://all.org/guest-commentary/the-truth-about-unicefarticle>
- “UNICEF, which originally stood for United Nations International Children’s Emergency Fund, was established by the United Nations in 1947 during the aftermath of World War II. Funded by voluntary contributions from governments and the public, its original purpose was to provide emergency food, water, shelter and medical care to children throughout the world.”
- What started out to be about emergency food, water and shelter, over time became about population control.
- “In 1967 UNICEF categorically rejected any connection with contraceptives. In 1987, it joined its collaborators in endorsing a Resolution for Action that included not only contraceptive research, development, distribution and practice, but pressed for abortion – regardless of the legal status – as well as increased collaboration with agencies whose agendas included contraceptives, sterilizations and abortion – often under political coercion.”
- In 1965 Pakistan started an “all out family planning program” which included IUDs that rendered many women sterile.
- “1985: UNICEF received \$700,000 from the World Bank for a population project in Kenya that included sterilization facilities in district hospitals and family planning clinics.”
- In 1995, “The Catholic Women’s League of the Philippines won a restraining order against a two-year-old WHO and UNICEF anti-tetanus program. Two labs had found “B-hCG” sterilizing agent in the vaccine. The Filipino program had already “vaccinated” 3.4 million people – all women, mainly between the ages of twelve and 45. The hormone-laced vaccine was also discovered in Mexico, Nicaragua, Tanzania, India and Nigeria. The anti-hCG hormone cause not only sterilizations but also incurable autoimmune disorders, miscarriages and birth defects.”
- By 2002, UNICEF was introducing books that many parents in Tennessee are now fighting to get out of their school and public libraries. Explicit, LGBTQ promoting, sexualizing of children, books. It seems UNICEF set the precedent and was 20 years ahead of the curve. They started the trend.
- “July 2002: Another UNICEF-funded sex education book distributed to Latin American countries was circulated at the UN Child Summit in New York. The book encouraged children to engage in sexual activities with other minors, with homosexuals and with animals. The Spanish language book, entitled “Theoretic Elements for Working with Mothers and Pregnant Teens” included a workshop book, also produced by UNICEF, which suggested that lesbian sex was an acceptable alternative for girls.”
- So to summarize we have an abortion endorsing, sterilization endorsing, LGBTQ endorsing, sexualization of children endorsing organization that is in Tennessee claiming to want to empower the voices of OUR children while they data harvest on them without our consent.

Goal 7. Ensure access to affordable, reliable, sustainable and modern energy for all

- When they say “modern energy”, “renewable energy”, “clean energy”, “sustainable energy” “green energy.” They mean getting rid of gas and oil. Which is not realistic considering fossil fuels is what produces electricity, produces solar, and wind. They claim electric is cleaner than gas but the battery mining sites come at the expense of land and child labor
- Electric is however more conducive to one of their goals, control. As it can be remotely turned off and on. Whereas gas cannot. Liberal states in their attempt to “go green and electric” have infringed on property rights and rights to move about freely as they say you can’t have a gas lawnmower or gas stove and then when the grid is taxed you can’t charge your car. This comes with rolling blackouts and electricity rationing. A common theme with communist policies.
- Tennessee invested in a Ford electric car megasite taking millions of tax dollars promising green jobs. What was delivered was lay-offs because there is not demand for the product. You can’t force a market unless you mandate it
- “Inclusive climate policies in the form of international aid, bioenergy taxes, or domestic revenue reallocation can avert the overall cost of addressing climate change in terms of global welfare (a 3.7% loss) and rather result in a 0.1% gain, at the expense of 0.5% decrease in GDP of high-income countries used to cover the financial expenses of providing international aid” found on page 33.
- What they mean is the US gets to fund climate efforts in other countries. They think that is sustainable. “Global welfare” “bio energy taxes” More stealing in the name of the “greater good.” “Achieving universal electricity access across sub-Saharan Africa by 2030 would require an annual investment of USD 27 billion under existing climate policies, but would require an additional USD 6 billion without climate policies “
- They are looking to the US to fund electricity in Africa.

Energy in Tennessee

The plan mentions Biden's carbon goals, "President Biden has set ambitious goals of reaching 100 percent carbon pollution-free electricity by 2035; a 50-52 percent reduction from 2005 levels in economy-wide net greenhouse gas pollution in 2030; and net zero emissions economy-wide by no later than 2050."

In an effort to encourage "electric vehicle adoption" Tennessee via TDEC and the Tennessee Valley Authority announced a \$20 million Fast Charge TN Network to add about 40 new fast charging stations to fill charging station gaps on Tennessee interstates and

Greg Young said. "TDEC is partnering with TVA and BrightRidge on the development of this station to continue Tennessee's environmental and economic momentum while further entrenching our state as the epicenter of the electric vehicle transition."

In 2021, the Tennessee General Assembly approved an \$884 million dollar investment in Ford's electric car megasite promising jobs.

Michigan bet billions on EV jobs and is now facing lay-offs and delays and scaling back their Ford mega-site as buyer momentum fades.

Forbes ran an article on May 9th which read **"EV Stocks Slide as Demand Slows for Tesla, Rivian and Nio."**

The article points to;

"Tesla stock is down 30% through May 8, 2024 due to lower shipments, high vehicle prices, lack of new products, and fresh legal problems related to its self-driving software.

Rivian stock is down 51% after reporting a huge negative gross margin as the company tries to scale enough to lower its per unit

A GUIDEBOOK TO THE INFLATION
REDUCTION ACT'S INVESTMENTS
IN CLEAN ENERGY AND
CLIMATE ACTION

CLEANENERGY.GOV

JANUARY 2023, VERSION 2

Goal 11. Make cities and human settlements inclusive, safe, resilient and sustainable

- Human settlements? What this means is getting everyone hooked to the same grid to increase surveillance and control. What it means in WEF Smart Cities like Chattanooga is prison cities, 15 minute cities. Where due to fiberoptic information travels very quickly and everything is controlled. There are already smart buildings being introduced where you have everything you need in the building. When everything including the light bulbs are smart, everything can be controlled and used for surveillance. It can all contribute to the social credit system that China has. A lot of cities are already putting smart cameras in like ours in Johnson City. Localities don't see the implications. China to see how 600 million closed circuit cameras one for every one and a half person, able to monitor them by facial recognition and able to limit them to do anything.
- If you say something wrong on social media much like we saw with the Canadian truckers, your bank account could be shut down, your power could be turned off
- Recently a video showed the potential implications of an AI driven, technology driven devoid of human oversight criminal justice system could look like. Easy to infringe on our rights without proper channels to exoneration
- Additionally, UNICEF Child Friendly Cities falls under SDG 11. Johnson City was chosen as a UNICEF CFC. We recently just pushed for rejection of this program. UNICEF has the same sustainable goals as the UN. And they say they are looking to "empower the voices of children" which we know to mean demoting the voices of children. UNICEF has a nefarious timeline discussed here <https://all.org/guest-commentary/the-truth-about-unicef> which includes vaccines with sterilization drugs, promoting gay lifestyles, abortions and family planning. Population control.
- Ban guns so people can't push back
- Criminalize living outside the dense areas and instituting NACs, land off limits to humans

Chattanooga, Tenn., Picked for Smart Cities Tech Test

Chattanooga has been selected as one of two U.S. cities in a global initiative to use broadband and data to plan and utilize energy, transportation, health care and communications in more sustainable and equitable ways.

What Is a Smart Building?

A smart building converges various building-wide systems—such as HVAC, lighting, alarms, and security—into a single IT managed network infrastructure. It often uses foundational technology such as **Power over Ethernet (PoE)** to accomplish this convergence.

Johnson City Smart Poles

This pilot project will evaluate the combination of smart lighting and sensor technologies to support business case development for smart poles that enhance energy savings, public safety, park management, community experience and satisfaction and maintenance reduction.

Download the project snapshot

Culdesac Tempe: A Car-Free Neighborhood

Tempe, AZ

The post-car real estate development company known as Culdesac approached Opticos Design to apply their expertise in walkable communities and Missing Middle Housing to the first car-free neighborhood designed for shared mobility and built from scratch in the United States.

Goal 13. Take urgent action to combat climate change and its impacts*

- What they say “13.1 Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters in all countries 13.2 Integrate climate change measures into national policies, strategies and planning 13.3 Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning”
- “Strengthen resilience and adaptive capacity” means one world government similar to what was pushed for with the pandemic response
- “Climate change mitigation” means geoengineering efforts like the White House Solar Radiation Modification Mandate <https://www.whitehouse.gov/wp-content/uploads/2023/06/Congressionally-Mandated-Report-on-Solar-Radiation-Modification.pdf>
- Where they are interfering in complex dynamic systems by blocking out the sun to help cool the earth, inconsiderate of the potential consequences blocking out the sun would create
- The Net Zero Carbon agenda falls under Climate Action. This is said to be a neo-feudal system where those who own land will have more carbon allotments. I.e. Elite’s can fly their jets. You can’t drive your car.
- Similar to how they experimented on viruses, said there would be a pandemic released a virus, blamed you for being a germ breather, and infringed on your rights. Now they are experimenting on weather, telling you there will be severe weather, as they blame you for being a carbon-emitter and infringe on your rights again.
- NAC (natural asset companies) claiming land off use to humans and as a NYSE investment falls under this
- Saying you can’t have a gas stove, gas car, infringing on your private property rights in the name of climate change
- This is a call for Global Welfare. Take money from the US to fund climate action world-wide

Pennsylvania was one of 3 USA states to ban weather modification cloud seeding in 1967.

It was also in Pennsylvania that one of the first laws was passed with the intent of curbing possible harm to nature by changing the weather. In discussing the bill which became the 1967 Pennsylvania law, one of its sponsors in the House of Representatives stated: "Cloud seeding involves silver iodide, and silver iodide, Mr. Speaker, is highly poisonous. AgI used in seeding falls everywhere, on trees, on vegetation, roofs, people, and in its synergistic action joins with motor exhaust to become lead iodide. Uncontrolled automatic cloud seeding then takes place, and the area for hundreds of miles suffers inversions and drastically modified weather conditions, not to mention total pollution and toxic effects upon all fauna and flora. Pine trees, for example, are especially susceptible; they store these poisons in cold weather and release them into the atmosphere in warm weather. Dry ice, CO₂, also used in seeding, is equally dangerous, disrupting the entire ecology of the planet."

The other USA states to ban weather modification cloud seeding were Maryland and West Virginia.

LYNDON B. JOHNSON

36th President of the United States: 1963 - 1969

Statement by the President on the Agreement With the Soviet Union for the Exchange of Weather Information.

October 25, 1964

I AM HAPPY to be able to announce that we have reached an agreement with the Soviet Union for the exchange of weather information between Washington and Moscow.

This is a good step forward in building the World Weather System to which I pledged American cooperation last June at Holy Cross College.

This cooperative effort has grown out of the beginning made by President Kennedy in his speech to the United Nations on September 25, 1961. He said then that our country "... would propose cooperative efforts between all nations in weather predictions and eventually in weather control "

In 1961 and 1962, the United Nations called upon the World Meteorological Organization to develop a program of cooperation that would strengthen weather service and research. The Organization responded with a concept of a world weather system and has designated Moscow and Washington as two world weather centers.

The United States and the Soviet Union have been working out an agreement to exchange weather information over a direct communications link between the two capitals. The agreement we have now reached provides for the exchange on a reciprocal basis of weather information gathered by satellites. For a short initial period conventional data will be exchanged. We hope that other member nations of the World Meteorological Organization may eventually participate in the exchange of data over this weather link.

We expect that the formal terms of this new agreement will be

"He who controls the weather will control the world."

-former president
Lyndon B. Johnson
in 1962

- <https://www.presidency.ucsb.edu/documents/statement-the-president-the-agreement-with-the-soviet-union-for-the-exchange-weather>

Goal 15. Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss

- benefits arising from the utilization of genetic resources and promote appropriate access to such resources, as internationally agreed
- That means making lab made meat and getting rid of CO2 emitting cows, ignoring the ecosystem implications removing cows and replacing pastures with labs would create
- This also overlaps with the NAC (Natural Asset Companies) and banning human use of land, getting us into consolidated, high density city areas that are east to control
- Biden's 30 30 plan
- Conservation easements turning private land public or government owned
- Criminalize private land ownership including ranches and agriculture tracks
- Control all agriculture through centralized government regulation
- Take control of water resources

Biden's Conservation Plan

Remember when Lee all of a sudden started talking about Conservation?

Biden's Historic Action on 30x30

The president's executive order puts America on the path of protecting 30 percent of its land and 30 percent of its ocean areas by 2030.

The Biden administration recognizes the widespread support for 30x30 and the new report proposes an America the Beautiful Campaign—a “ten-year, locally led campaign to conserve and restore the lands and waters upon which we all depend, and that bind us together as Americans.” It moves the administration’s 30x30 goal forward by proposing:

- Eight principles to guide the effort:
 - Pursue a Collaborative and Inclusive Approach to Conservation
 - Conserve America’s Lands and Waters for the Benefit of All People
 - Support Locally Led and Locally Designed Conservation Efforts
 - Honor Tribal Sovereignty and Support the Priorities of Tribal Nations
 - Pursue Conservation and Restoration Approaches that Create Jobs and Support Healthy Communities
 - Honor Private Property Rights and Support the Voluntary Stewardship Efforts of Private Landowners and Fishers
 - Use Science as a Guide
 - Build on Existing Tools and Strategies with an Emphasis on Flexibility and Adaptive Approaches
- The building of an “American Conservation and Stewardship Atlas:” an accessible and evolving mapping or other database tool that provides a baseline of information on lands and waters that have already been conserved or restored—and against which we can

Sustains Act, Implementation ACT, Gates Act

118TH CONGRESS
1ST SESSION

H. R. 4800

To amend the Food Security Act of 1985 to establish an exception to certain payment limitations in the case of person or legal entity that derives income from agriculture, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

JULY 20, 2023

Mr. PANETTA (for himself, Mr. DUARTE, Ms. CARAVEO, Mr. ROUZER, Mr. COSTA, Mr. EDWARDS, and Mrs. CHAVEZ-DeREMÉR) introduced the following bill; which was referred to the Committee on Agriculture

A BILL

To amend the Food Security Act of 1985 to establish an exception to certain payment limitations in the case of person or legal entity that derives income from agriculture, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Growing Access To Environmental Sustainability Act” or the “GATES Act”.

SEC. 2. EXCEPTION FOR INCOME DERIVED FROM AGRICULTURE.

Section 1001D(b) of the Food Security Act of 1985 (7 U.S.C. 1308–3a(b)) is amended—

Public Notice

The Sullivan County Regional Planning Commission will hold a public meeting to review a draft plan of the **Sullivan County Outdoor Recreation and Sustainable Development Land Use Plan** on **Tuesday, August 20, 2024 at 6:00PM**. This meeting is the regularly scheduled meeting and the public is invited to attend. No action will be taken on the plan as it will be for review only. The final plan shall be considered for adoption during their **September 17, 2024** regular monthly meeting at 6:00PM.

The meetings shall be held within the Commission Hall, 2nd Floor of the Sullivan County Historic Courthouse, located at 3411 Hwy 125, Blountville, TN. For questions please contact the Planning Director at 423.279.2603 or by email at planning@sullivancountyttn.gov. Copies of the plan shall be provided via a link on the county website after the review by the Planning Commission. This plan is a study of the existing land uses, transportation and utility infrastructure, population shifts and an inventory of outdoor recreational facilities as well as an assessment of the natural resources within the South Holston River Watershed Community. The plan document will not be recommending any zoning code or zoning map amendments.

Sponsoring USDA Sustainability Targets in Agriculture to Incentivize Natural Solutions Act of 2021 or the SUSTAINS Act

This bill authorizes the Natural Resources Conservation Service to accept contributions of nonfederal funds to support a broader range of conservation programs.

Current law authorizes the service to accept nonfederal contributions of funds to support certain programs, such as the Environmental Quality Incentives Program and the Conservation Stewardship Program. This bill expands the authority to include other conservation programs, including those that address climate change, carbon sequestration, wildlife habitat improvement, and protection of drinking water sources.

The bill also makes other changes to the administration of contributed funds, such as by allowing the service to match contributions and permitting contributors to designate funds for use in a specific program or geographic area.

USDA is using all available tools to support climate-smart practices and working lands conservation. The SUSTAINS Act, also signed into law as part of the Consolidated Appropriations Act of 2023, grants USDA the authority to accept contributions of private funds to conservation programs. USDA has taken steps to begin implementing the law. Over the next several months, USDA will seek feedback by engaging stakeholders on the best way to leverage the SUSTAINS Act through new conservation-oriented public-private partnerships.

Tennessee General Assembly Recognizes Liberty Threats

- The Tennessee General Assembly Recognized the UN Agenda was a threat to liberty and our form of government
- From one of the UN documents, "Governance and institutional settings. Complex governance arrangements and institutional structural rigidity can impede synergistic action and integration due to factors like overlapping authority, lack of mandate..."
- The "rigidity" of our constitution is a hindrance to their ability to accomplish mandates and wield the authority to accomplish these goals.
- The Tennessee General Assembly realized that in order to institute the UNs collectivist goals, where the end goal is a sharing economy, we couldn't have a Constitutional Republic, it would have to be socialist or communist, without individual liberty or private property rights
- Seeing as they are tasked with upholding the Constitution and these foundational principles like individual liberty and private property they put in protections against the implementation of these goals in our state in the form of law. The Constitution was to bind the national government to what was delegated in Article 1 section 8. Everything else goes to the states and the people via the 9th and 10th amendments. A global plan looks to usurp not only national sovereignty but state sovereignty.
- The UN has said that this is a global plan being enacted locally, and we have seen these SDGs sneak into city plans under the guise of the UN key words "sustainable" "equitable" "sharing economy" "green" "electric"

Tennessee Outlaws the UN Agenda

- **PUBLIC CHAPTER NO. 479 SENATE BILL NO. 1147**
- This state and its political subdivisions shall not adopt or implement policy recommendations that deliberately or inadvertently infringe or restrict private property rights without due process, as may be required by policy recommendations originating in, or traceable to, the United Nations or a subsidiary entity of the United Nations, including, but not limited to:
 - (1) "Agenda 21," adopted by the United Nations in 1992 at its Conference on Environment and Development;
 - (2) The 2030 Agenda for Sustainable Development, introduced at a United Nations Summit in 2015;
 - (3) The United Nations' proposal to reach net zero emissions by 2050; or
 - (4) Another international law or ancillary plan of action that contravenes the constitution of the United States or the constitution of this state.
- (c) Since the United Nations has accredited and enlisted numerous non-governmental and intergovernmental organizations to assist in the implementation of its policies relative to Agenda 21, The 2030 Agenda for Sustainable Development, net zero goals for 2050, and its related plans and initiatives, this state and its political subdivisions shall not enter into an agreement, expend any sum of money, or provide financial aid to those non-governmental and intergovernmental organizations as described in or promoted by such plans and initiatives.

Tennessee Bans Solar Radiation Modification

**CONGRESSIONALLY
MANDATED RESEARCH
PLAN AND AN INITIAL
RESEARCH GOVERNANCE
FRAMEWORK RELATED
TO SOLAR RADIATION
MODIFICATION**

JUNE 2023

- Tennesseans sees the weather modification experimentation on Tennesseans as Federal Overreach and Passes Law
- State attempts claiming jurisdiction and no consent
- TDEC Air Pollution Division Says its FAA jurisdiction
- Zero recourse for air pollution or air experimentation
- State is not sovereign neither are people if we can't stop experiments in our skies

Weather modification precedent

202

LAWS OF MARYLAND

[CH. 192

by a ye and nay vote supported by three-fifths of the members elected to each of the two houses of the General Assembly, the same shall take effect from the date of its passage.

Approved March 30, 1965.

CHAPTER 192

(Senate Bill 348)

AN ACT to add new Section 110A to Article 66C of the Annotated Code of Maryland (1957 Edition), title "Natural Resources", sub-title "Agriculture", to follow immediately after Section 110 thereof and to be under the new sub-heading "Cloud Seeding", to prohibit persons in the State from engaging in weather modification by means of cloud seeding or otherwise, to prohibit the use of ground generators for weather modification, both for a limited period of time and to provide for the automatic expiration of this Act.

WHEREAS, for a number of recent years farmers in parts of the State have suffered through drouth conditions, which have been most severe during the last three growing seasons; and

WHEREAS, drouth conditions have caused serious and irreparable financial losses to the farming community of the State; and

WHEREAS, it is the considered opinion of many persons that man-created modification of the weather is a contributing factor to recent drouth conditions; and

WHEREAS, the orchardist supports weather modification by means of cloud seeding (the dropping of silver iodide particles into a cloud) and the use of ground generators in order to prevent the fall of hail, while the farmer opposes change in natural weather conditions by the above means, and the conflict between the two interests cannot be reconciled; and

WHEREAS, there is a public need for dispassionate review of cloud seeding problems so that there will be no repetition of the unfortunate incidents of violence which have occurred recently; and

WHEREAS, since responsible people have taken opposite views on this question, some action must be taken to prove or disprove one or the other of the opposing sides of cloud seeding; and

WHEREAS, a number of studies of weather control are being undertaken by the United States Congress, by other public groups and by private groups, and it is desirable to prevent further conflict until solutions can be found; now therefore,

SECTION 1. *Be it enacted by the General Assembly of Maryland,* That new Section 110A be and it is hereby added to Article 66C of the Annotated Code of Maryland (1957 Edition), title "Natural Resources", sub-title "Agriculture", to follow immediately after Section 110 thereof, to be under the new sub-heading "Cloud Seeding", and to read as follows:

A Fleet Built for Success

Weather Modification, Inc., has been modifying and operating aircraft for cloud seeding and atmospheric research operations since 1961. We maintain and operate a fleet of more than 35 twin-engine aircraft in various configurations that meet the needs of every client.

Weather Modification, Inc., uses several models of aircraft in our own operations, although we can adapt our equipment to virtually any type of aircraft for specific customer needs. Weather Modification, Inc., has the following aircraft types in service and available at this time:

 **Beechcraft King A**

 **Hawker**

 **Bombardier**

 **Piper**

 **Cessna**

Aircraft Modification

If you operate your own aviation fleet, we can provide custom-modified aircraft to match your specific mission requirements - or we can modify your existing aircraft to perform the operations required.

Our talented team of experienced technicians facilitates the entire process - from design to modification to US Federal Aviation Administration (FAA) standards certification. Weather Modification, Inc., can also perform any necessary maintenance required or upgrades requested by the client during the modification process.

Some of the modifications that we currently perform are:

- VIP Transport
- Photographic Equipment
- Remote Sensing
- Environmental Monitoring
- Telemetry
- Atmospheric Chemistry
- Cloud Physics Measurements
- Air Ambulance
- Cloud Seeding

Weather Modification, Inc. has acquired US FAA Supplemental Type Certificate (STC) for select seeding equipment on the following aircraft:

No enforcement
and Redefining
Terms
Won't flex tenth
amendment
following
unconstitutional
law

- We still have smart cities going in
- We still have Biden's Climate Action Plan being implemented as the Tennessee Volunteer Emissions Reduction Strategy, the TCAP and the CCAP and in the "[Building A Clean Energy Economy; A Guidebook to the Inflation Reduction Act's Investments in Clean Energy and Climate Action](#)" the White House details where the Inflation Act funding will be distributed it says "net zero" it says "sharing economy" yet TDEC is saying our plan is voluntary and the goal is not to get to net zero so they claim it isn't unlawful
- We still have Congressional Mandate for SRM despite a law against geoengineering because TDEC is saying they can't do anything it is the FAA despite having an air pollution division. How can they stop air pollution if they can't stop planes from dumping it.
- We still have equity initiatives in education in vouchers discussed and more

What can we do? Rollover and hand down communism? Or fight for States Rights?

- Nullification State Sovereignty ACT
- Add enforcement to Niceley/Powers UN net zero law.
- **Reject funding Biden's Climate Action Plan PCAP CCAP TN State Climate Action Plan (PCAP-Priority Climate Action Plan and CCAP-Comprehensive Climate Action Plan)** TDEC (TN Dept. of Environment and Conservation) applied for the grant and it was awarded to us via the **unconstitutional** EPA. TN was given \$4 million to create the PCAP and then in 2025 the CCAP. TN has also submitted 2 grant proposals for \$488 million to IMPLEMENT the CCAP. PCAP is the preliminary plan and CCAP will be the comprehensive plan building on PCAP. **withdraw the application for the \$488 million to implement these wasteful plans**
- Support Pody's WHO law
- Add enforcement to SRM ban, there is precedent for successful weather modification ban. Amend legislation to look more like entered PA law.
- Block federal funding coming in to support these efforts
- Make it so the funding has to come through the legislature
- No winners and losers, state can't invest in private, no public funding private
- Precious metals depository and support gold/silver legal tender to stand against CBDC
- Counter each of the 8 steps to communism and all 17 sustainable development goals
- Get tenth amendment and state sovereignty added back into the Republican Platform
- Take back education to the principles in which the nation was founded, get the humanists out
- Educate our spheres of influence on this agenda and how it is being instituted

Thank You!

The logo for East TN Freedom features the words "EAST TN" in blue and "FREEDOM" in red. The letter "O" in "FREEDOM" is replaced by a circular emblem containing three white stars on a blue background.

**EAST TN
FREEDOM**

Danielle Goodrich
easttnfreedom.com

The background of the slide features a stylized American flag with stars and stripes. On the right side, there is a silhouette of the Statue of Liberty. At the bottom, there are faint, overlapping images of historical documents, including one with the word "Unite" visible.

Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

- What they say “16.3 Promote the rule of law at the national and international levels and ensure equal access to justice for all”
- What they mean, override decentralized, limited government in favor of centralized controls
- What they say “16.4 By 2030, significantly reduce illicit financial and arms flows”
- What they mean, disarm the public so they can’t reject centralized controls and removal of the Constitution
- What they say “16.9 By 2030, provide legal identity for all, including birth registration”
- What they mean make everyone trackable
- What they say “16.a Strengthen relevant national institutions, including through international cooperation, for building capacity at all levels, in particular in developing countries, to prevent violence and combat terrorism and crime”
- What they mean make any one who doesn’t obey the enemy and it punishable
- What they say 16.b Promote and enforce non-discriminatory laws and policies for sustainable development
- What they mean any traditional values and belief in God is discriminatory, you can’t promote God so you can’t have God-given rights
- Grant immunity to illegal aliens and “protected minority groups”
- Use ABC agencies to selectively target anyone who is not protected, those who uphold traditional values.”
- Public trust of vaccines and the organizations pushing them was lost during COVID as vaccines were rushed to market, many learned they were free from liability and they were coerced with bribes and holding jobs hostage in exchange for compliance. There is too much of an incestuous relationship between government and Pharma as well as NGOs who see humans as the problem and say there are too many of us. Why would we take life-saving solutions from NGOs who say there are too many lives and have often led to sterility and infertility.

Goal 17. Strengthen the means of implementation and revitalize the global partnership for sustainable development

- What they say “17.4 Assist developing countries in attaining long-term debt sustainability through coordinated policies aimed at fostering debt financing, debt relief and debt restructuring, as appropriate, and address the external debt of highly indebted poor countries to reduce debt distress”
- What they mean global welfare, wealth redistribution between countries, everyone equally poor
- 17.5 Adopt and implement investment promotion regimes for least developed countries
- What they mean Blackrock and Vanguard are already investment regimes that enforce Marxist ESG and DEI to drive achievement of these global goals
- Enact global trade mandates that override national law, bypass nation lawmakers, nullify national and state laws and sovereignty and demand global obedience
- Global cooperation means erasing state and nation boundaries to ensure world wide compliance and leveraging all these partnerships as enforcement mechanisms for full control

GAVI and UNICEF

- GAVI focused their SDGs around vaccines. We exposed the UNICEF child friendly city for what it really was. An abortion endorsing, sterilization endorsing organization that was found guilty of the following;
- In 1967 UNICEF categorically rejected any connection with contraceptives. In 1987, it joined its collaborators in endorsing a Resolution for Action that included not only contraceptive research, development, distribution and practice, but pressed for abortion – regardless of the legal status – as well as increased collaboration with agencies whose agendas included contraceptives, sterilizations and abortion – often under political coercion.
- 1995: The Catholic Women's League of the Philippines won a restraining order against a two-year-old WHO and UNICEF anti-tetanus program. Two labs had found "B-hCG" sterilizing agent in the vaccine. The Filipino program had already "vaccinated" 3.4 million people – all women, mainly between the ages of twelve and 45. The hormone-laced vaccine was also discovered in Mexico, Nicaragua, Tanzania, India and Nigeria. The anti-hCG hormone cause not only sterilizations but also incurable autoimmune disorders, miscarriages and birth defects.
- July 2002: Another UNICEF-funded sex education book distributed to Latin American countries was circulated at the UN Child Summit in New York. The book encouraged children to engage in sexual activities with other minors, with homosexuals and with animals. The Spanish language book, entitled "Theoretic Elements for Working with Mothers and Pregnant Teens" included a workshop book, also produced by UNICEF, which suggested that lesbian sex was an acceptable alternative for girls.
- UNICEF turned a blind eye to the research of BANDIM Peter Aaby and Dr. Christine Stabell Ben research showing the Dtap vaccine was associated with a 10x higher mortality rate than children not receiving it.
- Dr. Theresa Deisher wrote an open letter to legislators urging them to stop using aborted fetal cells as growth medium as the fragment DNA was found to merge with and alter DNA. It was ignored.
- COVID vaccines are having horrific side-effects yet are still being recommended to children
- When vaccines are being used by NGOs that push for population control and result in sterilizations and issues are pointed to yet never addressed, consumer concern is vilified yet never answered, people are right to be concerned about the recommendations of these organizations
- Vaccines are just one part of this picture. There are other mandates that are concerning surrounding the climate agenda.
- They experimented on viruses, told us there's going to be a pandemic, blamed us for being germ breathers, infringed on our rights to move about freely and our sovereignty. Now they are experimenting with weather, saying there's going to be severe weather, and are blaming us for being carbon emitters where they'll look to infringe on our rights again. As we see in this federal experiment which does not have informed consent <https://www.whitehouse.gov/wp-content/uploads/2023/06/Congressionally-Mandated-Report-on-Solar-Radiation-Modification.pdf>

Goal 9. Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

- 9.c Significantly increase access to information and communications technology and strive to provide universal and affordable access to the Internet in least developed countries by 2020
- 9.4 By 2030, upgrade infrastructure and retrofit industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean and environmentally sound technologies
- They say the green market is sustainable yet they regulate lighter cars which means less dense metal which means it is less sustainable
- They say they want to make planes and homes carbon free which means expensive retrofitting
- Put nations into debt with the World Bank
- What GAVI says “HEALTHY VACCINE MARKET = INNOVATION “
- Again was that the case during COVID? The profitable industry forced their products on people with a mandate halting innovation and driving people out. Also see Truth about UNICEF article to see the harms vaccine programs have done to third world countries. Besides in that article polio is now mostly vaccine induced polio. Keeping disease around that natural immunity would have done away with.

Goal 12. Ensure sustainable consumption and production patterns

- 12.b Develop and implement tools to monitor sustainable development impacts for sustainable tourism that creates jobs and promotes local culture and products
- 12.c Rationalize inefficient fossil-fuel subsidies that encourage wasteful consumption by removing market distortions, in accordance with national circumstances, including by restructuring taxation and phasing out those harmful subsidies, where they exist, to reflect their environmental impacts, taking fully into account the specific needs and conditions of developing countries and minimizing the possible adverse impacts on their development in a manner that protects the poor and the affected communities”
- What this means is a planned economy can be defined as a type of economic system where financial decisions are made according to government plans. All decisions related to investments, production and other economic parameters are structured as per the decisions of a central authority.
- This means levying punitive taxes on fossil fuels and forcing people to live under worsening conditions and standards of living
- This agenda finds consumerism unsustainable. They prefer you “own nothing and be happy”
- Define providing for yourself, farming, fishing, as “ecocide” and then criminalize it as WEF discussed under the guise of it is bad for the planet. See Stalin and collectivizing farms
- “responsible consumption” mean those who want fossil fuels will be shamed and labeled irresponsible and punished using a social credit system using brown shirts like happened in history and in COVID neighbors turning on neighbors
- Where control is taken away from the people and surveillance measures monitor our compliance to their goals

Goal 14. Conserve and sustainably use the oceans, seas and marine resources for sustainable development

- This is to control water life resources. Limit ability to fish to provide for yourself. Create dependencies.
- Ban private fishing in trade for centralized government controlled
- Ban fossil fuels in the oceans, boats, and transport of goods that use “not clean and sustainable” forms of energy
- Ban human use of the oceans “for the greater good”

Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

- They claimed growth in green markets yet delivered lay offs
- When they say “inclusive” inclusive means “inclusive” of anyone on the LGBTQ flag, it means Marxism, using class, gender, race, sexuality divisions. It excludes the white male and anyone who upholds traditional values that don’t align with their humanist values.
- What they look to eradicate is American values of equal opportunity in place with Communist values of equity. Everyone equally oppressed. If you work hard you achieve is the American dream. You have the opportunity due to the free market to offer a better service, product and win business. And they replace it with “math is racist,” don’t achieve, be dependent
- They did as Rockefeller wanted creating “workers not thinkers” by removing God as the highest authority which leads to higher purpose and making serving the state the highest purpose
- They look to regulate small business out of business so they can control people through monopolies like they did with mandates
- Destroy free market and push for centrally planned economy
- What GAVI says “HEALTHY POPULATION = MORE PRODUCTIVE WORKFORCE
- There are studies that have come out showing unvaccinated children are healthier and have fewer immune diseases suggesting trading self limiting illness for chronic illness was a bad trade for health but a profitable trade for those who get a 20:1 ROI on vaccines. The workforce was severely inhibited when the Federal government issued mandates and orders through large corporations forcing people out of their jobs and to choose between employment or compliance to a rushed to market liability free product.

Goal 6. Ensure availability and sustainable management of water and sanitation for all

- What this means is control of resources. Allow corporations to control natural resources like water charging monopoly prices and driving an expensive and rationed new system
- Nestle was under-fire for taking water resources. That is a problem when you have monopolies all under the same owners Blackrock and Vanguard claiming natural resources
- What we have seen from governments is the Hegelian dialect of cause problem offer solution. Weaponize virus, release virus, mandate vaccines. In 2023 we had a number of hazardous chemicals released close to water sources. However, on a planet 70% water, water is hardly a scarce resource, desalination processes could be used, rain water collection should not be banned.
- A concern is that vaccines claim achievements that are really due to clean water and sanitation infrastructure, with vaccine hesitancy growing after COVID exposed safety concerns, harming clean water and sanitation could give rise to more communicable diseases which Pharma could take advantage of
- What GAVI says “**WASH + VACCINES = LESS DISEASE**” “Vaccines, along with clean water, sanitation and hygiene (WASH), are proven interventions to prevent diarrhoeal diseases, a leading cause of child mortality in developing countries. Investments in oral cholera and rotavirus vaccines, WASH and health systems form an integrated approach to help eliminate diarrhoeal disease.” Again vaccines are given the kudos deserved to water and sanitation.” In 1999 the government removed a rotavirus vaccine due to safety risks to children. 5 live viruses were found in Rotateq leading to a study of infants with gastroenteritis. They found the vaccines were shedding and spreading what they purported to stop and came with other immune issues. Are a liability free product that provokes the immune system provoking immune disease leading to lasting profit streams? Are these vaccines trading self-limiting illness for chronic lasting illness that are profitable to the pharmaceutical industry? Looks that way.

Goal 10. Reduce inequality within and among countries

10.2 By 2030, empower and promote the social, economic and political inclusion of all, irrespective of age, sex, disability, race, ethnicity, origin, religion or economic or other status

- What they mean no borders between countries, allowing anyone in
- Political inclusion is Marxism. It is advocating for non-repressive order which means everyone equally oppressed
- Again there is talk of global welfare here, transferring money between countries, wealth redistribution between countries
- Punish the rich, entrepreneurs confiscating all gains while screaming equality and delivering equal poverty
- What GAVI says BETTER HEALTH = INCREASED EQUALITY “Immunisation protects the health of communities, reduces the number of people forced into poverty, and gives children an equal chance of a healthier and more productive future. By focusing on the under-served communities and unimmunised (“zero dose”) children in the poorest and most marginalised populations, especially the urban poor and those living in remote rural settings and conflict areas, Gavi brings immunisation and primary health care services to those furthest behind.”
- That is a pretty big stretch, vaccines limit poverty? Yeah CEO poverty. Like we saw with COVID they took our tax dollars funded their product, cashed out when stocks were high then turned around to mandate it. Why haven't vaccines gotten kids out of American ghettos. Vaccines create long-term customers with their host of side effects, are free from liability and yield a high ROI. Dr. Peter Aaby former head of the third world vaccination program started a program called the Bandim Health Project to look at post vaccine health incomes of African children. What he found was alarming. He found that the Dtap vaccine was associated with a 10x higher mortality rate than children not receiving it. That it was preventing symptoms of these infections but made them more susceptible to other diseases and ultimately death. Dr. Christine Stabell Ben found similar results. Her study found that it was associated with a 5x higher mortality. That it was killing more children than it was saving. She considered this good news because the data was actionable and they could use it to modify the schedule to save 3000 children per day. 1.1 million per year. But they haven't.
- ICAN an organization fighting for informed consent took these studies and wrote to UNICEF advising them to discontinue this vaccine right away and listed several other studies all concluding the same thing. The Dtap is killing children. UNICEF replied with an older study called the SAGE study claiming there were no other side effects found from the vaccine but never responded to the new data proving otherwise.
