

APPENDIX 1. NOTIFICATION TEMPLATE

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información muy importante sobre su agua potable.
Tradúzcalo o hable con alguien que lo entienda bien.

Monitoring Requirements for Lead and Copper not met for Grizzly Lake CSD Crocker-Welch Domestic Water System

Our water system recently violated a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. We did not complete the required testing for lead and copper in our distribution system by the deadline of September 30, 2025.

What Should You Do?

There is nothing you need to do at this time.

What Happened? What Was Done?

Once every 3 years we are required to collect a set of 5 lead and copper samples from various homes in the Crocker-Welch drinking water system. The last set was collected in 2022, and they met the drinking water standards. During the summer of 2025, we failed to ensure the next round of 5 samples were collected. Because we did not collect the required samples, we do not know if the water being served to our customers still meets the standards for lead and copper. We will collect 5 samples during the summer of 2026 to verify the water being served still meets the standards.

For more information, please contact Bob Howell, GLCSD General Manager, at (530) 832-5225.
