

SAFe® Product Owner / Product Manager

Summary

Develop the skillsets needed to guide the delivery of value in a Lean enterprise—and learn about the activities, tools, and mechanics used to manage backlogs and programs—by becoming a SAFe® 4 Product Owner/Product Manager (POPM). During this two-day course, attendees will gain an in-depth understanding of the Agile Release Train (ART), how it delivers value, and what they can do to effectively perform their role.

They will also learn how to apply Lean thinking to write Epics, break them down into Features and Stories, plan and execute Iterations, and plan Program Increments. Finally, attendees learn about the Continuous Delivery Pipeline and DevOps culture, how to effectively integrate as Product Owners and Product Managers, and what it takes to relentlessly improve the ART.

Learning Goals

To perform the role of a SAFe® Product Owner/Product Manager, attendees should be able to:

- Apply SAFe in the Lean enterprise
- Connect SAFe Lean-Agile principles and values to the PO/PM roles
- Collaborate with Lean Portfolio Management
- Explore continuous value with Program Increment Planning
- Execute the Program Increment and deliver continuous value
- Articulate the Product Owner and Product Manager roles
- Create a role action plan

Topics Covered

- Applying SAFe in the Lean enterprise
- Relating a Lean-Agile Mindset to the Product Owner and Product Manager roles
- Collaborating with Lean Portfolio Management
- Continuously explore customer needs
- Executing the Program Increment
- Defining the Product Owner/Product Manager roles and responsibilities
- Creating a Product Owner/Product Manager action plan

What Attendees Get

The class registration includes:

- Attendee workbook
- Preparation and eligibility to take the SAFe® 4 Product Owner/Product Manager (POPM) exam
- One-year membership to the SAFe Community Platform
- Course certificate of completion

Attendees must attend both days of the course in order to qualify for the exam.
