The God of Living Water

It is another miracle. We have successfully dug a Bore well in the property we purchased for our church. People have dug borewells in the next property but there is no water. It is a stony soil. We as a congregation prayed and the Lord gave us an overflow of water. We have applied for the building permission and got it from the local municipality. We can start the construction as and when we have the funds.

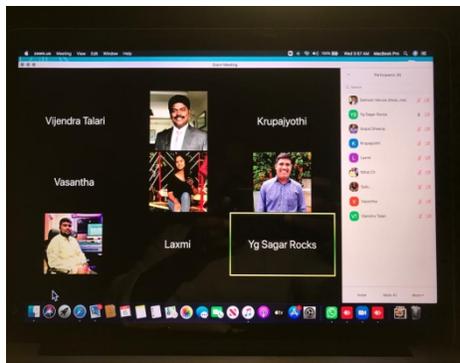

We have conducted an OSL Training program in a village called Dubbaka. 30 pastors along with their wives attended the training. We taught them the healing miracles Jesus performed in the gospels. The temperature was high and we gathered under a tent. Yet, every single one paid full attention. Many testified that they are blessed by this training. They have never gone through such a training where their faith is made a hundred-fold stronger.
