

THE UNITED STATES 2020 ELECTION BATTLE

Part I: The Battle for Democracy as Shiva exposes the ‘weighted race feature’ in the voting machines

By Faisal Ally

First Edition, published on December 16, 2020; Ver 1.1 published on December 17, 2020

Ver 1.2 published on December 20, 2020

Introduction

Section 1 - MIT Scientist exposed the ‘weighted race feature’ in the voting machines that can be used to manipulate votes

Section 2 - A look at the voting system and data irregularities in the September 1, 2020 primary election

Section 3 - An analysis of Massachusetts and Michigan’s data

Section 4 - President Donald Trump’s team hearings in different states on voting irregularities

- Legislature blocked certification for Pennsylvania after hearing the evidence and facts

Section 5 - The Arizona Hearing on November 30, 2020

- The dark web and hackers
- Dr. Shiva Ayyadurai discussed the ‘weighted race feature’ in the voting machine
- Dr. Ayyadurai’s Twitter account was suspended for 21 days during the election

Section 6 - CEO’s from Facebook, Twitter and Google confronted by US Senators on the interference in the 2020 election

Section 7 - At the Arizona hearing Dr. Shiva Ayyadurai elaborated on how Twitter suspended his account for 21 days and that the Secretary of State of Massachusetts and the National Association of State Election Directors NASED were involved in the scheme

Section 8 - Preparation for the Michigan hearing - Failure of the DOJ

- The Diebold Election Systems manual for voting machine and federal laws on voting

Section 9 - FBI investigation 2020 election fraud

References

Introduction

It's December 14, 2020 'on the steps of the Supreme Court' in the United States of America, many were chanting "Truth, Freedom, and Health" as Shiva's voice rose, "We have just unleashed a revolution, let's move it forward" (Ref D). A slogan with the words 'Stop The Steal' can be seen. It was early September 2020 immediately after the September 1 United States Primary election, Dr. Shiva Ayyadurai who is a U.S Senate candidate for Massachusetts began exposing that election fraud was taking place in the United States of America. At the time the world did not know that two months later that there would be ongoing investigations on the U.S 2020 election allegations of fraud, and that the FBI would commence a massive investigation.

Not only did the covid-19 pandemic sent the United States and the world into a shock wave, but also the world continues to hear about allegations of major election fraud in the 2020 United States election. We're at the crossroads of history, a turning point of no return as the covid pandemic plagues humanity with the oncoming forced and reoccurring vaccination for the masses across the entire world, and where the Pfizer vaccination is an mRNA vaccine. RNA has to do with our genetic code. Do we want a pharmaceutical corporation injecting something into our body that may even cause some kind of unforeseen harm or change in our genetics in the future, especially since there were no long-term tests done since the vaccine was created in under a year? I have always heard that a vaccine takes 10 to 15 years to research, test and roll out. While many do not want mandatory vaccination, many are pleading for it and will also be the cause as to why every one in this world have to be vaccinated. Are we about to lose complete control of our bloodstream? What about democracy? Is democracy's time up in the United States of America with the lockdown and many social programs onboard as is the same for most of the world? While many believe that Joe Biden and Kamala Harris will soon be running the United States starting in January 2021, many believe that President Donald Trump has won the election but was robbed of it due to major voting fraud. Many believe it was a fair election with none or very little interference, while many believe the election was rigged with substantial fraud.

The MIT Scientist, Dr. Shiva Ayyadurai, who is an expert in a field called 'Pattern Recognition Analysis' has been analyzing the voting data and providing explanations and graphs based on Pattern Recognition to show that a lot of fraud had taken place in the United States 2020 election. He then went on to expose the 'weighted race feature' in the electronic voting machines, which can be used to change the number of votes cast. Others have also been exposing the voting machine as being used to manipulate the votes around the world and now also in the United States.

On November 3rd 2020, Election Day in the U.S, I turned on the television to watch the election. I rarely watched television, but once in a while I would turn it on for a few minutes or when a relative visits, but I haven't watched anything on it for months. I spend some time on the Internet getting the News and I began watching Dr. Shiva Ayyadurai lectures on boosting the immune system and not long after, I learned that he was a U.S Senate Candidate in Massachusetts. He certainly has what it takes to be a great American senator. Based on many of his lectures, along with the lectures of a few others,

in June 2020 I wrote an article called “THE BATTLE TO CONTROL HUMANITY’S BLOOD STREAM” echoing many quotes by this MIT Scientist. On November 3, 2020 around 7:20 pm I turned on the TV to CBC News on 15 CBCNN to catch some of the election and shortly after I began hearing a similar hook to my song Rain Go Away (Ref G & H). Starting in 2011, I have been hearing hooks or parts of what seems to be my original music and literature in the mainstream television and music, whereas I never did before. Why all of a sudden that something so strange began at that point in time and continues to the present? Then at around 9:52pm while watching 6 KREM, the highlight on screen was: 'BATTLE FOR CONTROL' and I believe I heard the person said 'BATTLE FOR CONTROL OF THE U.S SENATE' and soon there were many variations with similar words to ‘The Battle to Control Humanity’s Bloodstream.’ America was always at war. But now Americans are at war and divided, a battle that’s going to change everyone’s lives and the world forever. Many want the vaccine, many do not want the vaccine. Many are saying that there was major fraud in the U.S 2020 election and many are saying that the election was honest and fair. This is not the America we knew of before the covid-19 pandemic began. THE BATTLE IS ON FOR OUR BLOODSTREAM AND FOR THE TRUE NUMBER OF VOTES CAST!

President Trump’s team continues to make allegations of major electoral irregularities. His team has had hearings in different states and is being turned away, but they are persistent. Finally, in the Pennsylvania hearing, they were heard with their crushing and imperious facts and evidence, that legislature listened to them and blocked the certification for Pennsylvania. At the Arizona hearing Shiva Ayyadurai discussed the ‘weighted race feature’ in the voting machines, which can be used to change the outcome of the votes and thus the election. Why would equipment as such be allowed in an election? It makes no sense whatsoever! Shiva also stated that Twitter had suspended his account for 21 days, which is one of his main communication tools during the election, when he began tweeting about the ‘weighted race feature.’ The battle grew in America, and some of the United States Senators had inquiries where they confronted Twitter, Facebook and Google on interfering in the election. Many faithfully believe that all of these technologies and platforms are given to us only in our best interests, but there is not a doubt that these technologies are rapidly being created and rolled out for other reasons. Does spying on the citizens sound familiar?

This research paper has nothing to do with weather anybody or I like President Trump or hates him. I was never a fan of Donald Trump when he had his TV show nor as a president, but I’m a strong believer in human rights, freedom and democracy, and will stand up for it, as I do in my writings and to have a voice at least for myself. Like myself, many, even Democrats’ supporters want to know that a fair election had taken place in the 2020 United States election so that true democracy prevails. Many witnesses have come forward and signed affidavits claiming that they have witnessed election fraud. If there was fraud in this election and it’s not resolved and the rightful winner is not the President of the United States, then democracy has failed and America is changed forever.

It’s a battle for democracy as Shiva and the crowd ‘on the steps of the Supreme Court’ at Freedom Plaza in the United States of America chants “Truth, Freedom, and Health” and “One person, One vote.” Whether it’s about ‘The Battle to Control Humanity’s Bloodstream’ or about the ‘Battle for Control of the Senate’, Shiva’s voice

rose at Freedom Plaza, “We have just unleashed a revolution, let’s move it forward” (Ref D).

We all know about revolutions, but when Shiva’s voice echoed ‘REVOLUTION’ and I’m writing and reading about it after hearing him, even around that time, as I drove, I can see from a distance on the digital billboards in Edmonton, Alberta, Canada, where I live, the word REVOLUTION resonating to tens of thousands of people, as many around the world are also hearing his words for his Truth, Freedom and Health movement from his lectures videos and many other videos with him recorded by others.

As President Trump’s teams goes to the Supreme Court, voices echo, “One person, one vote,” (Ref B) after Shiva’s voice. Shiva is certainly is a voice for the people and has what it takes to be an American Senator. Like Shiva and his family, many people from around the world came to America and want to live in America because of freedom and democracy. If democracy fails, America will be changed forever and so will the world. If democracy prevails, then there’s hope.

Section 1 - MIT Scientist exposed the ‘weighted race feature’ in the voting machines that can be used to manipulate votes

Dr. Shiva Ayyadurai has been exposing the feature in the voting machines known as the ‘weighted race feature’ that can be used to manipulate votes. He is an MIT Phd, Scientist, Engineer, Mathematician, and United States Senate Candidate. He holds four degrees from MIT and two masters. His undergraduate is in Electrical Engineering Computer Science and his Phd is in Biology. He is also known as Dr. Shiva. In this research paper his names are used interchangeably.

His field of expertise is Pattern Recognition Analysis, which he has been doing for over 40 years. Back in 1978, at age 14, he invented the first complete email system with the inbox, outbox and other features while working as a fellow in a medical school where he had written about 50,000 lines of codes and also came up with the term ‘email’ because the language he was using at that time only allowed him to use five characters, and today the whole world uses the email ‘email’ and email software. He has a movement known as the ‘Truth, Freedom and Health’ movement. There are some confusions as to who invented the first complete email system with the inbox, outbox etc... which was the 14 year old Shiva Ayyadurai in 1978 in New Jersey, and who was the first to send an electronic message to more than one computer using an @ symbol which was Ray Tomlinson before 1978; these are two different technologies and this is explained in the ‘Conclusion’ section of this report.

Immediately after his own senate race in the Massachusetts Primary election on September 1, 2020, based on the election voting data, which he had requested and received, he knew that something was terribly wrong with the data. The numbers did not add up, which clearly revealed that there were more votes cast than voters that came in to vote. There were excess ballots. How was that even possible in a fair and honest election?

With strong support and a hard working campaign, Shiva was guaranteed a win in the U.S September 1, 2020 primary election. Months before the election, many like

myself were listening to lectures by Dr. Ayyadurai on boosting the immune system, problems with wearing a mask and the lack of oxygen, social distancing and the problems the lockdown was causing to families and society. I learned about his campaign when he began talking about the primary election. He had lots of support with his 'Truth, Freedom and Health' movement and many of us learned about health and boosting our immune system. He had reminded his supporters that it was very important for him to win the September 1, 2020 primary election, meaning that they were about to put in a lot of work to make it happen. Many from around the world were tuning in to his lectures and people from different states were asking him to run in their state because they saw hope in him. They witnessed a genuine person that was preaching 'Truth, Freedom and Health' and that's what people are looking for. People are tired of the deceptions and fraud that are taking place right in front of their eyes and faces. Shiva is not only talking about 'Truth, Freedom and Health,' but his words are all action. Actions speak louder than words! He is also an excellent speaker. He has everything it takes to win the election. Many supported his campaign and people from different states were showing up to assist him because they wanted change and not lies and deceptions. They wanted "Truth, Freedom, and Health." He stood by his words as can be seen in many of his video lectures and some of the books, which he had written. He always talks about how his grandmother back in India healed people and how truth and honesty prevails, and so far he has been setting an example as seen in his lectures and with many around the world listening to him.

After analyzing the data from his Massachusetts September 1, 2020 primary election, he concluded that fraud had taken place in the election. Fraud in America? Many would think that this could only happen in places with Saddam Hussein, Fidel Castro, Chavez and in any other 'Banana Republic', but not in America. He used the term 'Banana Republic' referring to Massachusetts. Has Massachusetts become another 'Banana Republic?' Is America now a 'Banana Republic?' Many are waking up to the facts.

With the amount of work Shiva and his team put in, a win was guaranteed. Dr. Ayyadurai and his campaign have no doubt that he has won in the September 1, 2020 U.S. senate primary election for Massachusetts. They were always out there promoting, and cars would beep at them and some out shout, "Go Shiva!" While campaigning they said that they had never once seen their opponent out there campaigning, not even one lawn sign of him. They had made thousands of phone calls and did everything it takes to guarantee a win. According to this video (Ref 1), they put out 20,000 bumper stickers and distributed 1.5 million write in cards, made thousands of phone calls, and a lot more. In this day and age in America, you don't need a name like Kirkpatrick, McDonald, Smith, Johnson, Kennedy, Williams etc... to get ahead in the world and or to hold a high position in politics. Dr. Shiva Ayyadurai has everything it takes and much more to be a United States Senator, and with all of the work they were putting in. What happened? Was he and his supporters robbed out of their hard work? Were there others plotting and conspiring against them so they would lose and never win? The facts are presented later in this research paper. Something is wrong because with hard work and fair elections, people with Muslim names such as the mayor of Calgary in Canada, and the mayor of London in England had won their elections even with their Muslim names and dark complexion. Shiva stated that he should have won the September 1, 2020 primary by a

‘landslide.’ Based on the analysis of the September 1, 2020 Massachusetts voting data, he became very concerned about what would take place in the November 3, 2020 election and began a ‘write in campaign.’

While the word ‘fraud’ echoed about the September primary election as people tuned into Shiva’s videos, most in America and around the world at that time had no clue what would take place two months later in the November 3, 2020 federal United States Election.

Dr. Ayyadura became highly involved in mathematical analysis with the voting data presented to him and he began to expose a feature in electronic voting machines known as the ‘weighted race feature’, where votes are stored as a fraction or a decimal, and where votes can be multiplied by a fraction or a decimal changing the results and outcome of the election. He was very surprised that such a feature existed in the voting machine.

If fraud had taken place in the U.S 2020 primary election, then logically speaking, there is a strong possibility that fraud had taken place in the federal election between President Trump and Joe Biden. On December 14, 2020, as the words echoed from the ‘steps of the Supreme court, “One person, one vote” many people from all across America and the world - even many Democrats supporters - are concerned that fraud had taken place in the United States 2020 federal election and that democracy is failing.

Section 2 - A look at the voting system and data irregularities in the September 1, 2020 primary election

In explaining the data to his viewers on You Tube and other platforms, Dr. Ayyadurai provided a simple diagram with the voting data he had requested. He drew a diagram to explain how the voting system should work with the input labeled as Voters (P) which is the participating voters with an arrow going to a box labeled as ‘Voting System in your town.’ On the other side of the box is the output with an arrow labeled Votes (M), which is the number of votes cast.

To simply put it, the total of votes cast must equal the number of people that came and voted, but that’s not the case with the data Ayyadurai was presenting. He provided a table with the title ‘Massachusetts US Primary Senate Races September 1, 2020 with four columns: City/Town, Number of Participating Voters, Number of Votes Cast and Number of Excess Ballots. The numbers are not lying because the state provided the numbers.

He said, “...we issued public records request...we found out the seven of the cases where they actually gave us back the data - the others are violating laws by not giving it to us - what you notice here is the Participating voters in the second column. For example for Boston, according to their own records had 142,911 Participating Voters, but the Number of Ballots cast were 147, 025. The Excess Number of Ballots is 4,114. More votes than voters. “This is why we know fraud took place.” (Ref 2)

For Rockland the numbers are: 1,644; 3,931; 2,287. This shows more than twice votes were cast than the voters that came out to vote. Anybody can clearly see that there’s something seriously wrong with the numbers, and the records clearly shows that

irregularities had taken place in the Massachusetts Primary Election on September 1, 2020.

After looking into what had taken place in the Massachusetts September 1, 2020 primary senate election, Shiva says America needs to go back to hand counting votes. It's clearly seen from his Primary election data that the numbers are not adding up. If this happened in one area, what are the chances that it will happen in other areas? Ayyadurai says "... I have not ever conceded my Republican primary race... I have a lawsuit to stop the certification of the entire Massachusetts US senate race..." (Ref 2)

Section 3 - An analysis of Massachusetts and Michigan's data

Dr. Ayyadurai said, "...what we found consistently in the seven cities they gave us data there were more votes than voters....Phil Evans got involved and Phil looked at the data of our votes in Franklin county for example where we won, the only county where 70 to 80% of the votes were hand counted..." Shiva presented a graph with his votes (the red) and his opponent votes (the blue) and showed how the curves flattened. "and this is how the votes should look over number of votes, they flatten," he said. "...When I saw what happened in our election system here, Phil and Bennie and I had built a very close working relationship..."

Shiva worked with Phil and Bennie analyzing the data and plotting graphs. Bennie already knew about the weighted feature in the electronic voting machine. Therefore, they were able to move fast and commenced their presentations as their graphs evolved. They will later come up with a different graph to present in the Arizona hearing. Their analysis were all being done within hours or days - or you can say in real time - providing explanations and theories. As the days went by, they came up with different graphs and presented them to the viewers. That certainly was one way to get feedback and have their work critique, and thus there were many critiques as they had most likely anticipated, while they race against time, since they did not have months and years to go away into a lab to analyze countless data and come up with graphs and theories and then deciding on the best graph to present to their viewers. "...In all the other counties where the votes were machined counted the votes do not converge, they have this parabolic effect. And this parabolic effect, Phil, is one of the big indicator of something going on, voter issues or election fraud," Shiva said. (Ref 3). He is looking at Pattern Analysis Recognition, a field he has been involved in for over 40 years of his life to point out voting fraud.

Ayyadurai presented a table: 'Audit of Massachusetts Primary Election 2020 Reveals More Votes Than Voters - Election Fraud' and provides an update. Starting at four minutes and fifty seconds into the video (Ref 3), he said, "Bennie was one of the person that discovered our votes are stored as decimal fraction...Phil looked at the data of our votes in Franklin county for example where we won, the only county where 70 to 80% of the votes were hand counted..." He said in all the other counties the votes were machined counted..." That raises a red flag. The only county that was mainly hand counted they won, which reflect all of the work they had put it. And they lost all the other ones that used a voting machine, which seems very suspicious.

At time 4:31 in the video, Shiva stated, “the election has not been certified in Massachusetts, I’m still a US senate candidate in Massachusetts. He then continues with Michigan’s data. (Ref 3)

Ayyadurai discussed the mathematical analysis of four major counties votes in Michigan for the Trump-Biden election. The counties presented in this video are Oakland County, Macomb County, Kent County and Wayne County. The analysis raises important questions on election integrity. He drew diagrams and provided explanations. Input should equal output, but that’s also not the case. He discussed the Dominion voting machine, which has the ‘weighted race feature’, which can change the votes by a decimal or fraction.

In the chart with the title ‘Executive Summary’ a few points are ‘In short, 69,000 votes from Trump were transferred to Biden in these three counties.’ The last point state states, “transfer” was done by a computer algorithm that linearly transferred more votes from Trump to Biden as the precinct increased in its “Republicanism.” (Ref 3)

He explained that in Massachusetts there is one type of vote, where as in Michigan there are two types of voting which are 1) the ‘Individual Candidate voting’ and 2) the ‘Straight Party voting’. He says that votes being transferred are seen more in the Republican precincts and less in the non-republican precincts. (Ref 3)

Section 4 - President Donald Trump’s team hearings in different states on voting irregularities

President Donald Trump’s team lead by former mayor of New York, Rudy Giuliani, went to the different states presenting their case as witnesses in those states came forward and made allegations of voting irregularities. Most or all of the witnesses have signed affidavits and many have high status in society such as being in the military, owning their own firms etc... The witnesses are putting everything they have on the line, therefore they are not going to risk everything they have by telling lies and making up stories. They are presenting what they had observed and experienced, and even with facts and evidence to show that fraud had taken place in the United States 2020 election. The team had gone to Georgia, Pennsylvania, Michigan, Arizona and other places.

Legislature blocked certification for Pennsylvania after hearing the evidence and facts

A public hearing by the Pennsylvania Senate Majority Policy Committee was held to review the irregularities of the United States 2020 election. After hearing the testimonies, the legislature blocked certification for Pennsylvania. In the video (Ref E) at time 47:48, a retired army colonel who was an Operations Officer named Phil W provided information. His last name sounded like Walder, but I couldn’t clearly make out his name due to the clarity of the video. In the army he was involved in information warfare and had ‘conducted computer network operations.’ Over the last two years, his team along with another team has been working on the ‘voting machine manipulation.’ He stated that

the voting machines have “been used in elections around the world - in stolen elections around the world - in Venezuela, Italy, Argentina, Singapore, Bolivia...Philadelphia uses ESS, Pittsburg uses Dominion...” Around 51 minutes into the video, Phil said, “The voting systems in the US and in Pennsylvania were built to be manipulated.” He said that the systems “are connected to the internet and servers outside of the U.S...there is no transparency as our previous witness mentioned as to how the voter information is processed, how and where its stored.” In his words, “The voting record is able to be modified and or deleted by operators, administrators and outside...operators can assign votes for write in ballots, blank ballots or ... ballots in large numbers so that they can be directed towards one candidate or another at the operator or the supervisor discretion.” (Ref E)

This all sounds familiar. Dr. Ayyadurai and his team members have made similar claims, so it’s not only one person making a certain kind of allegation on the voting irregularities. Countless allegations are being made. Phil W said that the machines are easily hacked to manipulate votes. One of their hackers discovered ‘a malware on the server that caches every login and every password.’ He said, “on 30th of September, an election storage facility was robbed in your state - 30 USB devices were stolen and a laptop...it’s been described by another person in another state we’re working with, just like the lotto. Who ever organizes the lotto is always going to win, it’s controlling the numbers...” He continues, “Our experts believe that ‘up to 1.2 million Pennsylvania votes could have been altered or fraudulent...’ Different cases were presented. This is what you would find in a ‘Banana Republic.’ (All single quotes and double quotes in the two paragraphs above are from Reference E)

Section 5 - The Arizona Hearing on November 30, 2020

Aside from the kind of irregularities mentioned earlier, in the Arizona hearing on November 30, 2020, discussions surrounded accusations made in an email by someone that did not provide an affidavit, making claims that ‘35,000 votes were embedded for each Democratic candidate in Pima County’ (Ref 5), including for Biden where the votes were carefully moved around both at the local and federal level and depended on the voters turnout to avoid suspicion and to get the results required. There were dialogues surrounding the email as to whether it’s possible to check the data to verify the allegations to see whether the claims are true or false. An email with such accusations and no affidavit does not help the hearing. However, many allegations were made.

About 37 minutes into the video, allegations made that data was being moved around and that ‘the same amount went down and then went up for another. (5)’

The dark web and hackers

At around 2hrs and 15 minutes into the video it’s stated: the dark web, any hacker can get on there and make changes... machines are able to change the total...(Ref 5)

Dr. Shiva Ayyadurai discussed the ‘weighted race feature’ in the voting machine

At the Arizona hearing, Dr. Shiva Ayyadurai who was also referred to as Dr. Shiva discussed the electronic voting machines and its software feature known as the ‘weighted race feature’, along with the data from his September 1, 2020 primary senate race in Massachusetts. Although this information on the ‘weighted race feature’ was previously presented to viewers tuning into Dr. Ayyadurai’s lectures on You Tube, it was not until around December 7, 2020 that the news about the ‘weighted race feature’ in the voting machine began to echo across the nation. During the presentation, he presented a new graph, which was not previously seen on other You Tube videos. It was a new graph that they came up with within the last 24 hours before the hearing where massive tests were carried out using Pattern Recognition Analysis, an area which Shiva has been working in for over 40 years and thus an expert in this field.

At around 5 hours and 37 minutes into this video that’s over 10 hours long (Ref 6), a female thanked the Chairman and made the statement, “Sidney Powell had mentioned some conflict of interest with Dominion and these systems. She had said, her words are governors and secretaries of states and other politicians have invested interest in the system.” She continued on and asked, “does this lend to her claim that there might be some nefarious motive behind this system?” (Ref 6)

At round 5 hours and 38 minutes into the video, Dr. Ayyadurai addressed her question by first giving an account of his own experience while he ran for the US Senate in the Republican Primary Election in Massachusetts on September 1, 2020. He said, “I was deeply shocked when I found out that this weighted race feature existed.” He went on to explain how he and his team had acquired important data to review and ‘to validate whether the weighted race feature was on.’ As in this hearing, in previous videos, he had explained the ballot images, the cast votes records and the list votes records. He explained the process of what takes place when you put a paper ballot into the voting machine that an image is created. The paper is not tabulated but the images are. To verify the result the ballot images are required. He had applied to get the ballot images for the Massachusetts primary election. He said, “...The Secretary of States of Massachusetts - and I believe this may be true in many Secretaries of States across the country - they responded back to me saying they deleted the ballot images, in fact they destroyed them that they don’t have to save them by state law.” (Ref 6)

During the hearing, Dr. Ayyadurai said that it is disconcerting that the voting machine has this kind of software capability. He said, “do we have one person one vote or do we have one person not one vote.” He said, “... I think the courts needs to step in and re-clarify one person one vote going back to the 1964 equal protection clause of the United States constitution.” (Ref 6)

He stated USC20701 and 20702 “for Federal Elections those ballot images must be saved to validate the integrity of the election.” Aside from this weighted race feature in the machine, he discussed how Twitter had interfered in his senate race.

Dr. Ayyadurai’s Twitter account was suspended for 21 days during the election

Twitter, Facebook and Google were created for people to use, but there were concerns raised as to whether these platforms were conspire with each other to influence the

election. At around 5 hours and 39 minutes in the video, Dr. Ayyadurai stated that Twitter had suspended his account for 21 days during the election when he began talking about the 'weighted race feature' that existed in the electronic voting machine, but when he was tweeting earlier about election fraud, Twitter did not shut him down. That's another red flag. It's okay to tweet about election fraud on Twitter, but it's not okay to tweet about the 'weighted race feature' in the voting machine on Twitter.

Upon hearing Dr. Ayyadurai's elaboration on the voting machine, one of the members at the meeting said, "These machines are suppose to tabulate, not calculate, they are suppose to count one for one. These machines were built to do so (calculate) (Ref 6).

The meeting continued and at the time 5:47:20, Mr. Rob DePitten (this may not be the correct spelling of his name, due to the clarity of the video) who had reviewed countless articles and clips and videos says, "I think this is the biggest fraud in the history of our constitution republic is taking place right before our eyes. The corrupt Mainstream media and tech oligarchs are colluding in an attempt to assassinate the American public true legal votes for our President Donald J Trump through corrupt Government officials across countless precincts and corrupt state officials and courts." (Ref 6). He said that what he 'identified is between 120,000 and 306,000 fake people.' He went over the data where there are approximately 1500 precincts in Arizona. He also presented data on a computer.

Section 6 - CEO's from Facebook, Twitter and Google confronted by US Senators on the interference in the 2020 election

In a You Tube video (Ref 7) an American Republican Senator asked, "Does Twitter have the ability to influence the election?" There was a pause then he continued on by saying, "Mr. Dorsey, you still deny you don't have the ability to interfere in our election?" The Senator pressed on, "Does Twitter have the ability to influence election and you said no. Do you still stand by that answer?"

The reply is, "Twitter as a company. No"

But the senator drilled him, "You don't think you have the ability by moderation policies by censoring ... you don't think that censorship withholding true information from the American public? You don't think that interferes in the election?"

The reply is, "Not our current moderation polices. Our current policies are to protect the conversations and the integrity of the conversations around the elections."

In another YouTube video (Ref 8) posted on November 17, 2020, an American Republic Senator, Josh Hawley, was asking a straightforward question to the CEO of Facebook, Mark Zuckerberg, and the CEO was not giving a clear answer. In the video, Hawley asked, "Do your Facebook content moderation team communicate with their counterparts at Twitter or Google?"

Zuckerberg answered, "Senator I am not aware of anything specific but I think it would be probably pretty normal for people to talk to their peers and colleges in the industry."

The Senator replied, "It would be normal but you don't do it?"

Zuckerberg answered, "I'm saying I'm not aware of any particular conversation but I would expect that some level of communications probably happens..."

The Senator asked, "How many items on the task platform reflect that Facebook, Twitter and Google are sharing information about websites or hashtags or platforms that they want to suppress?"

Zuckerberg replied, "Senator, I do not know."

From the two videos which I just mentioned above, there are discussions taking place on Twitter, Facebook and Google on the suppression of information, and since Dr. Ayyadurai's Twitter account was suspended for 21 days when he began tweeting about the 'weighted race feature' in the voting machine that can be used to change the votes, his account was suspended. The actions taken against Dr. Ayyadurai certainly say something about these social media platforms and that they are collaborating with others to censor individuals? Action speaks louder than words.

Section 7 - At the Arizona hearing Dr. Shiva Ayyadurai provided detailed on how Twitter suspended his account for 21 days and that the Secretary of State of Massachusetts and the National Association of State Election Directors NASED were involved in the scheme

The information, which Dr. Ayyadurai presented, at the Arizona hearing about his Twitter account being suspended was also discussed in a number of videos before the Arizona hearing. Similar to what he had already stated in other videos, in the 10 hour video (Ref 6) during the Arizona hearing, he said "...when I started sharing this on TWITTER on September 25, the Secretary of State in Massachusetts contacted TWITTER and shut me down for 21 days left in my election...And what came out in testimony in Massachusetts with a FEDERAL JUDGE here was that the Secretary of State of Massachusetts has a SPECIAL PARTNERSHIP WITH TWITTER where they were able to brand what I was sharing had validated the images were destroyed as election misinformation and in addition they called the National Association of State Election Directors NASED which is the Association of all the state election directors and they too got involved in contacting TWITTER to SHUT DOWN my TWEETS while I was exposing the ballot images which were destroyed which means the evidence showing that the weighted vote feature was on." Shiva said that this was quite extraordinary.

Twitter did not shut him down when he was tweeting about election fraud, but as soon as he started to expose the voting machine that has a 'weighted race feature' that can be used to increase votes for a party and at the same time decrease votes for the other party by the same amount or a different amount, Twitter had suspended his account for 21 days. That would interfere with him getting the message out. If it happened to Dr. Ayyadurai chances are there were other interferences in the election, else why would U.S Senators have hearings and asking the CEO's of Twitter, Facebook and Google on collaboration and also on interfering in the election.

Ayyadurai pressed on by saying, “State of Massachusetts Secretary of State and the State Election Directors found threatening because what I was essentially stating was the State Election Directors and a number of these states are concealing the actual evidence which directly correlate which can exposed whether the ‘weighted race feature’ was on, so yes, I do believe it’s nefarious and if you go look at the National Association State of Election Directors,” (Ref 6) answering the question where the word nefarious was used earlier in a question asked by a female during the hearing.

Dr. Ayyadurai said, “...the State Election Directors and the Secretary of States are the ones who certified electronic voting systems, which means are they certifying electronic voting systems knowingly with the weighted race feature? In my view I know in Massachusetts that’s what was done....And knowingly telling the vendors to delete ballot images which are the evidence interconnect the weighted race feature being on and the ballot images, so Massachusetts, the factory settings of these electronics voting machines - the default factory settings - is to save all ballot images. What we discovered in Massachusetts is a tell the vendors to set that to off, which means delete, destroy all ballot images and I believe that many of these Secretary of States are involved in this, so yes I believe it is nefarious. (In the video this quote ends at the time 4:42:46)

Section 8 - Dr. Shiva Ayyadurai’s preparation for the Michigan hearing - Failure of the DOJ

Dr. Ayyadurai had prepared for the hearing in Michigan held on December 2, 2020, following the Arizona hearing, where he would expose the ‘Failure of the DOJ (Department of Justice)’, but was not called to testify. Exposing the DOJ would have sure caught some attention.

The title of a slide is ‘A Pattern Recognition Analysis of Michigan 2020 Trump-Biden.’ At time 15:10 in the video (Ref 9), he used ‘Pattern Recognition’ to figure out the ‘normal state of the system’ and the ‘abnormal state of the system.’

The Diebold Election Systems manual for voting machine and federal laws on voting In the manual, The Diebold Election Systems p. 2-126 (Ref 9) is mentioned in the video

Ayyadurai spoke about the Diebold Election Systems weeks before the Arizona or Michigan hearing. For the Michigan hearing, he had prepared information on the voting system that’s listed in the Diebold manual as seen in this video (Ref 9). The word ‘Diebold’ was used at the Pennsylvania hearing, but there were no mention of the ‘weighted race feature.’

Although lots of important information were presented at the Arizona hearing, Dr. Ayyadurai did not discuss the Diebold manual as he does in this video; he may have ran out of time at the Arizona hearing. In the manual as per highlight in the video, he shows what’s written in the manual: ‘Weighted races are tallied by weights, assigned from the

voter registration, and may be counted in Central Count vote centers only.’ That’s a major Red Flag. At time 14:15 in the video (Ref 9) he says, “The ballots images are being deleted which is a violation of Federal law.” He gives the law number 52 USC 20701 and his report says: all Records Generated in Connection with a Federal Election MUST BE SAVED for 22 MONTHS. It also states: The Department of Justice is NOT investigating this violation, in spite of knowing about it.

This is a real problem for the whole country and every citizen if the Department of Justice turns a blind eye to this.

Section 9 - FBI investigation 2020 election fraud

There are videos where Mark Zuckerberg had donated 300 million dollars to assist at the election, along with another company (Ref 10). On November 30, 2020, according to the media out of New York, NewsMax Stinchfield, during an interview with Phillip Kline, the FBI has already gotten involved with the investigations on election fraud (Ref 11). The Headline was FBI requests data on questionable ballots. Phillip Kline who is the Director of The Amistad Project and a former attorney general of the state of Kansas says, “...what our data shows is what we called the blood in the stream is, it’s after the crime is committed.” He says that they “have identified hundreds of thousands of ballots.” In their process they review data provided by the government and they contact voters to compare and see if what they are stating ‘reflected accurately in the voting process.’ (Ref 11)

In the process they came up ‘with tens of thousands of republican ballots that were not counted’ (Ref 11). Their collections shows ‘hundreds of thousands of republicans who say they never requested a ballot but they voted absentee by somebody else.’ ‘Identified people outside of the state who voted within the state’ (Ref 11). He stated that Mark Zuckerberg provided 400 million dollars into the 2020 election, while other video (s) mentioned the number 300 million (Ref 10).

Conclusion

As the discussions around the election, forced vaccination, the lockdown and wearing a mask continues, President Trump is not backing down without a fight and nor is Dr. Shiva Ayyadurai where the 2020 United States elections are concerned. Many wants to know that they’ve had a fair election and not one based on voting anomalies, and that democracy has won.

As I carry out my research, one of my main sources continues to be Dr. Shiva Ayyadura because of his background in the immune system and he was the first to expose in voting irregularities in the U.S 2020 elections. It first happened to him and then to President Trump. The data proved that fraud had taken place in the September 1, 2020 primary election in Massachusetts. Many have signed affidavits, making allegations that fraud had taken place in the November 3rd, 2020 federal election, and are coming

forward with their allegations by putting everything they have on the line. Ayyadurai have presented data that are not adding up for the September 1 and November 3, 2020 elections. Where do they go from here? Are the damages already done and cannot be reversed? It looks like the battle to reclaim democracy is still on and the fight is strong.

‘On the step of the Supreme Court’ (Ref A) Shiva leads a crowd with the words resonating ‘One person, one vote’ and ‘Truth, Health and Freedom.’ Shiva Ayyadurai had also created the first complete email system as a 14-year-old teenager in New Jersey or you can say he is the inventor of the first email (electronic mailing) system and shortened the name to ‘email’. On the Internet, another person name Ray Tomlinson is sometimes said to be the inventor of email. There are some confusions on this because Tomlinson did not create an electronic mailing system; he created a different technology and they are confusing his technology with the name ‘email’ which was created by the 14 year old, Shiva. We are looking at two different people that created two different technologies. In Section 1 of this research paper I already explained that Dr. Ayyadurai came up with the term ‘email.’ In Ray Tomlinson own words in a video, he said “The term (referring to email) wasn’t coined until several years later’ (Ref I), meaning that it was Shiva that came up with the term ‘email’ for his electronic mailing system which he created in 1978, and that Ray Tomlinson created a different technology before 1978 but it was not the electronic mailing system (email). Therefore why are people using the term ‘email’ when speaking of Tomlinson’s invention? Why all the confusion? It’s very simple to explain and to understand this. As stated in Section 1 of this report, Ayyadurai came up with the term ‘email’ in 1978, when he wrote a complete electronic mailing system and called it ‘email’ which mimics what a physical mailing system does which have addresses, dates, time, inbox, outbox etc... This is what Ayyadurai is claiming he did on the computer by writing about 50,000 lines of code to create the electronic mailing system. It was not Tomlinson that did this. Tomlinson did something very different. Tomlinson sent an electronic message from a computer to more than one computer by using an @ symbol. He could have used any symbol but he chose the @ symbol. That’s not an email system he created with the inbox, outbox etc... He sent an electronic message from one computer to more than one computer. Electronic messages were already used on computers, so Tomlinson did not even invent an electronic message which people are confusing it to be an electronic mailing system, nor did Tomlinson wrote 50,000 lines of code to create the email system with the inbox, outbox etc.... The whole world uses the term ‘email’ because Dr. Ayyadurai named his electronic mailing system ‘email.’ A You Tube video (Ref F) clearly says that ‘Ray Tomlinson wrote a software program over the period of about a week that used file-transfer protocols and send-and-receive features.’ He is sending a message, and the other computers are receiving that message. So that’s understandable. That’s not an electronic mailing (email) system based on what we know an email software does that mimics how a physical mailing system works. Since Shiva created the first email system, later on others would add to it as technology as time moves forward, and that only makes sense, but the fact is, the 14-year-old Shiva Ayyadurai was the one who created or invented the first email system and not Ray Tomlinson. Give credit were deserves.

It’s very simple to understand the difference in what Dr. Shiva Ayyadurai created and what Ray Tomlinson created. It’s two different technologies. It seems like there’s a deliberate and planned movement created to blemish and flaw the success of a 14-year-

old Indian teenager in the United States of America that invented the first email system. From the comments I'm reading on videos, its mainly people with British names that are trying to take away the credit from Shiva because he is Indian and are giving the credit to Tomlinson because he is 'white.' All they are trying to do is confuse everyone and lie to everyone. My opinion is, if Shiva Ayyadurai's name was Dickie, Volare, Smith, Johnson, Tomlinson, Tom, Dick and Kirkpatrick etc... and maybe if Shiva's skin tone were not of dark complexion, they would have no problems understanding this. But all they want to do is to create confusion for some thinking that nobody would stand up to them, and today Dr. Ayyadurai is standing up and speaking up against the 2020 United States election fraud and the ones that's involved in the fraud.

Dr. Ayyadurai said that Twitter had suspended his account for 21 days. Did Twitter interfere in his election? There have been meetings with Senators and the CEOs of Facebook, Twitter, and Google about influencing the election using their platforms and communicating with others. There has to be a reason why all of those meetings took place. During covid pandemic and the U.S 2020 election many videos and channels are also being censored and taken down, obviously to suppress information. Thus, I must give my own example to show that these things are happening to individuals and that people are collaborating and scheming and plotting against individuals. It was around the year 2017, while I was writing about my songs 'True Love' and 'A Kiss Goodnight' in the 'Diverse City' Magazines and around that time Disney came out with a project called 'A Kiss Goodnight' which also includes a song. I created two pages on my Facebook account called 'True Love' and 'A Kiss Goodnight' after my original songs from the 1990s and which I have been writing about and promoting around the year 2017, and to discuss some similarities of recent songs '24 Karat Magic' by Bruno Mars to my song 'True Love', and Lady Antebellum (now called Lady A) song called Just A Kiss (Goodnight) which came out around 2011 around the same time I gave a copy of a tape to someone that claimed he knows everything about music and that he is a producer, and also similarities to my song 'A Kiss Goodnight' to the recent Disney project called A Kiss Goodnight. As soon as I went to update my Facebook page called 'A Kiss Goodnight' bang! I was knocked off my Facebook account and I was not allowed back in. I tried for a while with my user name and password but my account was seized by Facebook. I had contact Facebook about four times and got no reply, and as I tried to get back into my Facebook account, I was not allowed. Due to this, I lost all of my contacts to relatives and friends made through Facebook of people I knew when I was a boy in Guyana and have not seen in decades, and I had also made some friends on Facebook and I lost connection to most because of what Facebook did. Like many people that signed affidavits and putting their lives and career on the line to tell the truth about the 2020 election, I have no reason to lie about any of this and I have proof that I have written all of my songs and books. But when others are scheming and plotting against you and censoring you, how do you stop their deceptions? My opinion is Facebook had interfered in me getting my message out about my original books and music being sampled and samples being used by world famous musicians, with no contract and no permission, and I had never ever made a penny from any of my songs and music. Based on my experience, social media platforms like Facebook has conspired against me, and if this can happen to me then it's happening to others, and what they did to me is unlawful. Dr. Ayyadurai said that Twitter had suspended his account and he came up with amazing

proof and information to prove that platforms as such are conspiring against individuals and have interfered in the 2020 election. Also concerning the witnesses that came forward to speak up on the U.S 2020 election fraud, I do not see any reason why anybody would make up false claims about the 2020 election, then sign an affidavit to risk everything they gave, unless they are telling the truth to the whole world; many people have already come forward fighting for democracy and to stop the fraud and deceptions taking place.

We're at a crossroad in history where if truth does not win, the whole world will spiral downwards in many ways. From the 'step of the Supreme Court' Shiva leads the crowd, "One person, one vote," he continues the battle, "Truth, Freedom and Health." The Battle for Democracy continues, but will the battle win the fight, or will humanity lose and never return to the way we were before the election and covid pandemic? We're at the crossroads of history. Never before have we seen and experienced what's taking place today, as it certainly looks like we're about to lose control of our bloodstream and democracy. But the fight continues. The battle can still be won! Only time will tell.

Disclaimer1: There may be errors in this article due to the lack of clarity in some of the videos or typing error or spell check correcting my writing, or from hacking. As I write and my work evolves from day to day, I keep copies to show the evolution of my writing as I do for my songs and music. Sometimes references are removed or there may be new updated information why I may miss, or wrong information may be presented in a video. If there are any invalid information or oversight in this article, once brought to my attention, I will investigate, make clarifications and do my best to resolve. Sometimes source information are taken down, removed, or links are changed which I may not have access to.

Disclaimer2: As I write, knowing that there's a lot of electronic theft and fraud taking place, as seen with the 2020 election, I have copies of my work, showing the evolution of my work, in writing and in music, and the changes evolved are seen, showing that I am doing all of my work and research on my own, but if someone or a group hacks and steals my work and then uses it and claim that they wrote all of my work and ideas, that's something beyond my control. My past work speaks for itself that if I could have done so much and have many copies of my writing and music as they evolved, along with all of my education, then I have no reason to lie and use anyone else's work, and it's others that are using my work and ideas. There's a lot of corruption, deception and fraud taking place, as seen and proven with the 2020 election, and people are getting way with it. If there's any oversight on my part, once brought to my attention, I will investigate, research and do my best to resolve all issues.
