AI Ethics.World & Smart Cities Americas Announce Global Partnership

Denver, Colorado, August 26th, 2022 — In a breakthrough partnership, **AIEthics.World LLC** - a global leader in AI Ethics and Ethical AI - joins forces with Smart Cities Americas LLC's **Smart City Expo Miami® -** an international ecosystem of cities, spanning all major continents, dedicated to supporting jurisdictions to advance their innovation of sustainable urban solutions

The purpose of this partnership is for both parties to bring AI Ethics and Ethical AI to the forefront of a broader and global audience. This unique partnership will equip the Smart City Expo Miami ecosystem of members and stakeholders with best-in-class AI Ethics and Ethical AI education curriculum to confidently adopt and advance the beneficial presence of artificial intelligence to serve their citizens and societies, honoring their sovereignty, diversity and cultures.

The flexibility of the partnership provides both parties with the agility to reach into a vast library of educational and experiential programs as well as define curated programs for cohorts of groups interested in a specific master class, course, or program. Cohorts have the agility to be taught online, or in a hybrid, or face-to-face educational experience. Furthermore, the partnership provides the flexibility for both parties to design new courses specific to the requirements of the Smart City Expo Miami members and stakeholders.

"Ethical AI is the new digital citizen", said Mathew James Bailey, CEO of AIEthics.World. "AI transparently embodying AI Ethics can assist cities to confidently take a giant leap toward their vision of a sustainable future. Our courses equip Smart City Expo Miami members and stakeholders to shepherd their future with Ethical AI, one that honors the values, diversity, sovereignty and cultures of their citizens, communities and societies. Furthermore, our courses equip regions to incorporate policy and legislation of artificial intelligence as well as measurement and control of the quality of Ethical AI from suppliers. We are thrilled to have the opportunity to work with Smart Cities Americas LLC and look forward to co-creating real, tangible benefits for cities across the world to flourish within the Age of AI".

"I am excited to join forces with AIEthics.World to interact with our global knowledge base creating new educational opportunities." Bernardo Scheinkman, Founder & CEO of Smart Cities Americas, the producer of the Smart City Expo Miami ®

"Artificial Intelligence is not just the simulation of human intelligence and processes, but also encompasses the ethical and moral goals of organizations which provide its services", said Katalin Bártfai-Walcott, CTO - Digital Data Strategy at the Intel Corporation   "Reliable and standardized metrics which provide comparable Ethical AI principles must be both technical attainable and culturally, organizationally relevant. These solutions provide a unique ability to understand the cultural and ethical goals for organizations as well the capability to provide metrics into assessments and possibly guide future financial, societal, relationships".
