

How to make a Butterfly Windsock Toilet Paper Roll Craft

What you need:

- paper roll (construction paper roll, toilet paper roll, kitchen paper towel rolls)
 - tissue paper in spring colors
 - construction paper in various colors
 - glue/tape/stapler
 - scissors
 - single hole puncher
 - yarn for hanging
 - black marker

Step by Step Instructions

Start by wrapping colored paper around your paper roll and stapling or taping it there.

With a single hole puncher, punch two holes one across the other on one side of the paper roll.

String yarn through both holes...

Tie the string together.

Cut long strips of tissue paper and glue them inside the toilet paper roll.

Use the colored paper provided and the butterfly template. Cut out the butterfly template and trace it onto the colored paper. Then cut out your colored butterfly.

Draw a face. Decorate the wings by cutting out shapes from the other colored paper provided and pasting them on the wings.

And stick on the toilet paper roll.

All done! Your Butterfly Windsock Toilet Paper Roll Craft is ready for using in the garden and butterfly virtual storytime. Check out the link [here](#). After you are done doing the storytime as many times as you want you can then hang your butterfly windsock in the window or from the ceiling and watch it dance and blow in the wind.
