

Jack with a Parachute

Materials

- Coffee Filter
- Pipe cleaners

Tools

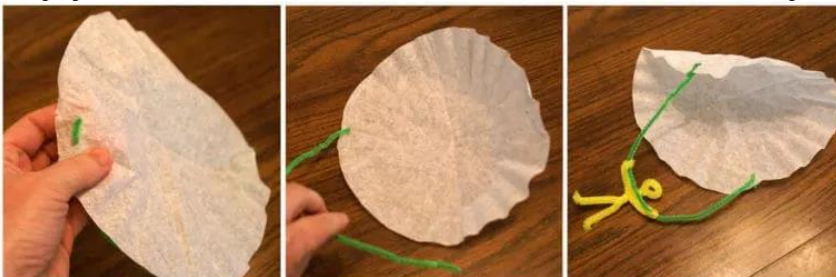

- Scissors

Instructions

1. First, you'll make a stick person from one pipe cleaner. Twist a loop in the middle for his head, bend back both ends for the arms, twist those ends together for the torso, then what's left is legs. Feel free to bend up the very end for feet.

2. Take a second pipe cleaner and poke one end through the edge of a coffee filter. Fold over once to secure. Take the free end and run through the "hands" of the stick figure (his arms are loops). Connect the free end to the coffee filter and bend up.

3. If you want to get fancy, you could decorate the filter with markers, but plain white works well too.

Take Jack and his parachute someplace high, like a playhouse, second floor deck, balcony or to your local park jungle gym. Gently release him and let him float to the ground.
