

Sleeping Bunny and Carrot Bed Family Day Virtual Storytime Take and Make

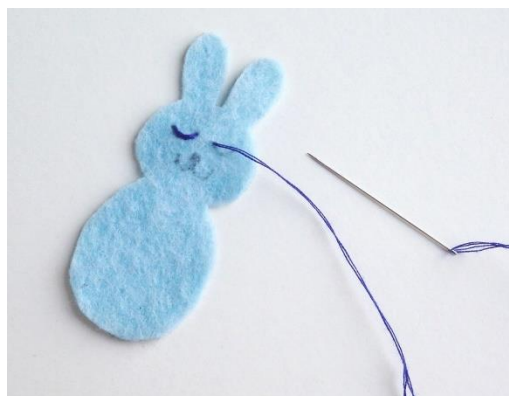

1. Felt fabric – orange, green and 2 or 3 other colors of your choice.
2. Scissors
3. Matching thread and needle
4. White glue or fabric glue
5. Pencil – to trace the template
6. Template provided

Instructions:

Cut out the patterns from the template. Trace the patterns on the selected felt fabrics and cut them out carefully.

There are 2 body parts for the bunny, take any one of the body parts and draw the face details on it lightly with a black marker.

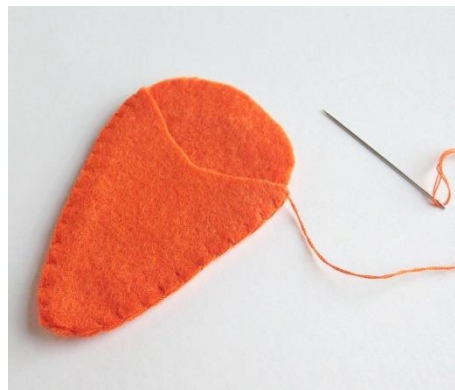

Sleeping Bunny and Carrot Bed Family Day Virtual Storytime Take and Make

Once the face is done attach the 2 inner parts of the ears and the heart. You can either glue or stitch these pieces, it's up to you! Then place the 2 body parts together with the detailed part on the top. Glue around the sides of both parts to join them. Make sure to keep a small opening at the bottom to turn the bunny into a finger puppet.

Take the 2 parts for the carrot with the smaller piece on the top of the big one, matching the bottom ends of both pieces. Glue around the sides to join both pieces. Keep the top of the smaller piece open.

You're almost done! To finish, just glue the 2 green leaf patterns on the top of the larger carrot piece. Place the larger leaf at the back and the smaller leaf in the front.

Now your bunny is ready to sleep in its little carrot bed! [Join our virtual storytime to sing "Sleeping Bunny" and other storytime favorites through this link to the Family Day Virtual Storytime!](#)
