### Subject: US DOD – DEEP [Debt Eradication Easement Program] StatUS

Dear Mr President,

First of all, I'd just like to say, “*Well done for all you have achieved in 2 short years and all you are about to achieve in the next six.*” For what I am about to propose, this letter, in its nature, must be highly presumptive, and so my apologies are offered and accepted, I'm hope, in advance.

Permit me to introduce myself. My name is Peter Smith and I live in England, Germany and France. I am an ex British Army Officer and have traded financial options on the CBOE and LIFFE

Exchanges with much success. I am 61 years of age, single and have a YouTube Channel which may be of interest: <https://www.youtube.com/c/PeterOfEngland>

### **The Plan - To End World Debt**

I should like to inform you, as a matter of courtesy, that I am planning a campaign to alleviate (to the point of extinction), the personal debt burdens of hundreds of thousands (++) of US Citizens (including US Veterans as priority) which have reached epidemic and unsustainable levels.

If you feel inclined to come out in public support of this project, then I should like to offer you the initiative here as part of an announcement for your 2020 Campaign Trail.

### **We Are the News Now! Time for us now to man up and Move Mountains of Debt**

I have taken this unilateral decision to act in this matter, as if we await the arrival of Central Bank intervention or other international relief, then I feel we will wait forever. The only actions from the ingrained & corrupt global banking corporatocracy, will be the imposition of more pain and more austerity. As you fully realize, “they” will never alter for the good that which they created for the bad. It is with this consideration I now write to you and hope that we can synchronistically move forward on the same issues and at the same time.

### **WeRe Bank Offers Remedy – Right on Queue**

I created **WeRe Bank** in 2011, which launched officially in the UK (then worldwide) in March 2015. The purpose of the bank is fundamentally to show the people how money is created and then have them create their own funding instead of having to rely on the criminal and rapacious money lenders of antiquity to bury them. WeRe Bank facilitates, educates, exposes the corruption and deceit and then provides the Total Solution for wealth separation and creation of money for time. TIME stands for “Time Is Moving Energy.”

Initially, promissory notes created by the members, were lodged with WeRe Bank ([www.werebank.co.uk](http://www.werebank.co.uk)) and then used to pay-off [or down] the debts they have been addicted to, by unscrupulous lending practices orchestrated by the global banking cartel’s “*money lending cabal*.” WeRe Bank in effect turned the individual member into his VERY own bank. WeRe Bank then acted as a confirmation intermediary for the clearing and processing of the funds from the member’s account to the payees account via his/her own bank – we acted as a referee and controller in effect. In addition, we show our members how to pay off their monthly ongoing service charges (utilities/mortgages/state and Federal taxes) – which are some of the largest burdens they have around their necks.

### **DEEP State – Welcomed**

The next phase is to now widen the scope of the Jubilee Pay Down [Debt Eradication and Easement Program (DEEP) State] by enlisting your help, that of the US treasury Dept, and the help of the Department of Defence (DOD) which has mysteriously parked some \$21 trillion dollars (<https://missingmoney.solari.com/>) in its Budget Accounts since 2015. My opinion is that this DOD “book credit” has been materialized or “magicked” into the DOD accounts in order facilitated a defensive back-stop should the World Bank, the IMF and the FED attempt to implode the US economy by creating a financial collapse in order to introduce their fiendishly evil SDR as the next leg down the IMF/WB/ Cabal’s Insanity Hole towards, “*Fiat Currency Nonsense II*”.

**The Plan**, simply stated, is to issue coupon/vouchers (upon proof of debt) to pre-screened applicants who simply request this service from WeRe Bank and the DOD. It will progress then in a controlled and regulated manner and pay off the accumulated debt burden which is the actual People's Credit on the US National Debt. These coupons will pass via The Office of The Paymaster General (DOD Equivalent) and be authorised by the Defense finance and accounting Service (perhaps). I envision that the service will attract a lot of interest!

I will intentionally keep this letter short for now and would appreciate a meeting with you (or one of your team) asap to discuss ways to progress the "*Debt Eradication Easement Program (DEEP) State*" in an effective and measurable manner." There are also Perish In Place (PIP) override strategies/matters to discuss as well as ET coalition chaos and Planetary Emergency Info-casts concerning pending Earth changes to review – Welcome to Space Force.

For your information, I will be using/propose using US Treasury, DOD and other government seals, signs and sigils on the paper work and coupons/vouchers produced – I mention this UPFRONT so that even if I do not receive a reply from you or your Office, I have notified you of my honourable intentions in a fully transparent manner so that these actions should not become an embarrassment. I now press forward with this issue and this request, directed to you, is a deliberate tactic to INCLUDE that which would never be able to INCLUDE itself [voluntarily] via an "official request due to the inertia of action and lumbering slowness of Executive Functionality in the "politics" of both."

Yours sincerely,

P. Smith
