

General Information
<p>Expel20 is designed to improve water movement in soil to promote drier surfaces. Expel20 will not change or affect soil properties but enhances drainage speed by reducing the surface tension of irrigation or rainwater.</p>
<p>CONTAINS NON-PLANT-FOOD INGREDIENTS:</p> <p>40% Propanediol 20% Poly(2-methyloxirane) 5% Docusate sodium</p>

Directions for Use					
<p>Expel20 can be applied with most conventional sprayers. Applications should begin in advance of seasonal onset of wet soil conditions, Expel20 may be applied as a spot treatment for low-lying and high moisture holding areas. Expel20 may also be applied on a scheduled spray program to maintain drier soil conditions. For best results, we suggest immediate watering in to help move the product from the leaf surface, followed by a normal irrigation cycle to move Expel20 into the soil.</p>					
Compatibility	Expel20 can be mixed with most chemicals used in turf management, however, it is recommended that field-testing be done on a small area before spraying to assure safety concerns are met.				
Application Interval	Applications should be made monthly during seasons of high moisture. Monthly rate can be applied in split applications.				
Application Rates	<table border="1"> <thead> <tr> <th>Application Rate</th> <th>2-4 oz/1000 ft²</th> </tr> </thead> <tbody> <tr> <td>Interval</td> <td>Monthly</td> </tr> </tbody> </table>	Application Rate	2-4 oz/1000 ft ²	Interval	Monthly
Application Rate	2-4 oz/1000 ft ²				
Interval	Monthly				

Precautionary Statements	First Aid	Storage & Disposal
<p>WARNING: KEEP OUT OF REACH OF CHILDREN </p> <p>Irritant to eyes, skin, and ingestion. Use proper gloves and goggles when handling and wash hands before touching eyes or eating. Get medical advice/attention if you feel unwell. Dispose of contents/container in accordance with local/regional/national and international regulations.</p>	<ul style="list-style-type: none"> INGESTION: Contact physician or poison control center. If victim is conscious and able to swallow, quickly give water or milk to dilute. Do not give sodium bicarbonate, vinegar, or fruit juices.
