# INTRODUCTION

Since 2012 Speciality Waterproof & Roof has proved its impact in the market with its waterproofing services throughout Gauteng. From its inception Speciality has specialized in different types of waterproofing solutions & weather protection systems for all types of structures.

Speciality is a local based company that specializes in the application of a variety of weather proof systems, which include torch applied modified bitumen membrane, self adhesive, spray-on and liquid applied membranes.

In addition, our technical knowhow also extends to all types of insulation including polyurethane foam. Our waterproofing expertise, experience, technical knowhow and skilled labor have made Speciality one of the market leaders in the South-Africa.

”

## About Us

Speciality Waterproof & Roof was established by Pieter Craucamp who consulted and specified for leading international paint and waterproofing system manufacturers in Southern-Africa and Europe. Our expertise and knowledge of coatings/specifications and applications is what sets us apart from the average paint and waterproofing contractor. Speciality offers our vast experience in Gauteng, delivering high quality residential and commercial painting and waterproofing services.

We offer more creative  
& efficient solutions  
Tomorrows Answers Today.

*The difference between mediocre and  
excellence is hard work!*

*-Pieter Craucamp*

## Focus on Engineering

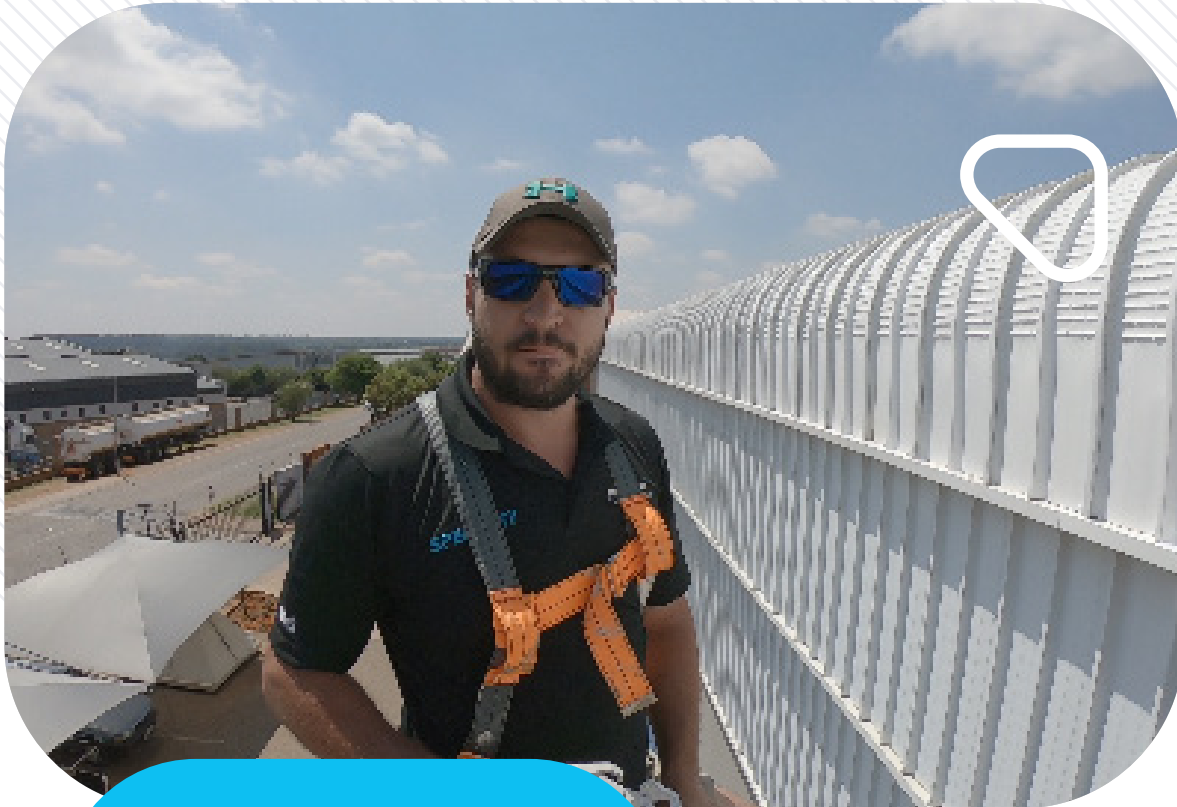

With structure protection, weatherproofing, insulation or general strengthening, although the materials and supplies that are used by Speciality are readily available on the market, the design and method of installation is key and could make the difference between a 10 year guarantee and a failing structure.

## Consulting

Having years of practical experience, our experienced team have the ability to technically support contractors and consultants when they feel the roof is not designed correctly or if the system proposed is weak. The system is studied by the engineers along with conducting pre-site visits to ensure that the area has been prepared and designed well enough for the materials to be installed. The engineering team will make recommendations to changes and will not commence until they are confident with the site conditions.

Focusing on these factors gives Speciality the ability to issue full guarantees on materials and installations on structures.

# Director Statement

*Quality, Consistency and Speed are the basic foundations of everything we do. We strive to building a strong relationship with all customers whilst insuring the three basic foundations are not forgotten.*

To provide all customers with solutions to their structure protection problems. With access to customised and high tech solutions and products, Speciality is committed to offer solutions at the customers required budget.

**Pieter Craucamp**  
Director

## Professional Staff.

At Speciality, our professional and industry-certified waterproofing and roof repair staff are ready to provide the expert services.

## Guarantees.

A specification is provided with every project to insure both a workmanship and product guarantee is issued.

## Passion.

Our passion is on display everyday, from our quality specifications right through to our on-site workmanship.

## What Makes Us A Success?

Our ability to service any local or global specification with our industry leading team of experts in the waterproofing sector.

# Our Services

*Trust the specialists with all your waterproofing needs. The expert team at Speciality Waterproof & Roof have over 15 years combined experience in the Waterproofing Industry. We only use Internationally recognised, industry leading products for all our waterproofing work. Applied in accordance with manufacturer's specifications.*

## Roof Repairs

We Offer the Following Roof Repairs Services: Rust Treatment and Prevention. Replace and Repair of broken roof tiles, valleys, ridging, gutters etc. New Roof Sheeting (IBR, corrugated iron, Chromadek, Kliplock). Flashing repair or replacement. Roofing underlay. Roof insulation. Fascia & Barge board repair or installation

## Airless Spray

We specialize in professional airless spraying technology and equipment. No matter what paint, texture or coating you need to spray, for domestic, industrial or large scale spraying projects. Using an airless paint sprayer can save you time, energy and provide a smoother, higher quality finish.

## Drone Inspections

Drone roof inspections are accomplished through piloting a drone equipped with a high-resolution camera into the air and capturing images which are compiled into detailed aerial maps of the inspection subject. This method is common with large buildings and properties with multiple buildings.

## Waterproofing

Cementitious Waterproofing.  
Liquid Waterproofing Membrane.  
Bituminous Membrane.  
Bituminous Coating.  
Polyurethane Liquid Membrane.  
EPDM Systems

## Cool Roofs

A cool roof is a roofing system that delivers higher solar reflectance (the ability to reflect the visible, infrared and ultraviolet wavelengths of the sun, reducing heat transfer to the building) and higher thermal emittance (the ability to radiate absorbed, or non-reflected solar energy) than standard designed roofing materials

## Rust Proof

Corrosion Protection and Coatings – when applied correctly, on properly prepared surfaces, modern paint and protection products can improve durability and extend maintenance intervals and even extend the lifespan of a structure such as roofs and silo's. Performance is optimised and ultimately reduces costs.

A satisfied customer is the best business strategy of all.  
— Pieter Craucamp

# Spray Disinfection of Surfaces

## Viral Disinfection

We believe we are uniquely qualified to apply disinfectant because we are experts in applying the right amount of coatings to non-uniform substrates, and we understand how to protect ourselves and our environment while spraying.

We are using a medical grade product that is food safe and leaves no residue behind. To keep everyone safe, we get setup outside and disinfect our equipment before entering the building.

Spray Disinfection of Surfaces: Why you should spray disinfectant?

In addition to direct human-to-human transmission, contaminated surfaces also pose a risk of transmitting viruses and pathogens. Especially in the current COVID-19 pandemic, this is of great importance: Studies show that SARS-CoV-2 viruses can survive for several days on surfaces that we come into daily contact with.

This makes us the ideal partner when it comes to disinfecting surfaces. With our mobile spraying units, the most common disinfectants can be applied to surfaces quickly, easily and even over large areas. In this way we support people through our innovation and contribute to an effective reduction of the spread of viruses.
