

PXT 701 TRAIN THE TRAINER AUTO EXTRICATION

Objective:

To provide instruction for those what want to become Extrication Instructors / Subject Matter Experts (SME's) within their own departments. This curriculum presents the SME with a thorough understanding of PXT's 201 course. The students will be able to recognize hazards, use equipment and implement techniques necessary to be able to effectively instruct their peers and recruits within their departments and to demonstrate the following:

- Size up existing and potential conditions at vehicle and machinery accident incidents
- Identify, contain, and stop fuel releases
- Recognize Alternative Fuel & EV vehicles
- Provide a safe working area, including the stabilization and isolation of all vehicles or machinery involved
- The use of Hand, Hydraulic, and Pneumatic tools in a 4-station rotation to include; *Command & Control, Patient Care, Hand Tools, E-Draulics, Cars on their Wheels, Sides and Tops.*
- Basic and Advanced Stabilization
- Establish extrication plans that align with the complex scenarios
- Protect victims during extrication or disentanglement.
- Perform interior stabilization
- Perform extrication and disentanglement operations involving packaging, treating, and removing victims trapped in passenger vehicles
